- Flood Zone 3a
- Flood Zone 3b

Notes

The Flood Map for Planning (Rivers and Sea) is the Environment Agency's best estimate of the areas of land at risk of flooding, when the presence of flood defences are ignored. The information provided is largely based on modelled data and is therefore indicative rather than specific. The different Flood Zones are outlined below:

Flood Zone 1 - Comprised of land having a less than 1 in 1,000 (0.1%) annual probability of river or sea flooding in any year.

Flood Zone 2 - The area of land having between a 1 in 100 (1%) and 1 in 1,000 (0.1%) annual probability of river flooding or 1 in 200 (0.5%) and 1 in 1,000 (0.1%) annual probability of sea flooding in any year.

Flood Zone 3a - The area of land assessed as having up to a 1 in 100 (1%) annual probability of river flooding or a greater than 1 in 200 (0.5%) annual probability of flooding from sea in any year.

Flood Zone 3b - The functional floodplain, showing areas that act as a balancing reservoir, storage basin or balancing pond; land where water has to flow or be stored in times of flood to attenuate and delay the peak.

It should be noted the information indicates the flood risk to areas of land and is not sufficiently detailed to show whether an individual property is at risk of flooding.

The information provided is largely based on modelled data and is therefore indicative rather than specific. The different Flood Zones are outlined below:

Flood Zone 1 - Comprised of land having a less than 1 in 1,000 (0.1%) annual probability of river or sea flooding in any year.

Flood Zone 2 - The area of land having between a 1 in 100 (1%) and 1 in 1,000 (0.1%) annual probability of river flooding or 1 in 200 (0.5%) and 1 in 1,000 (0.1%) annual probability of sea flooding in any year.

Flood Zone 3a - The area of land assessed as having up to a 1 in 100 (1%) annual probability of river flooding or a greater than 1 in 200 (0.5%) annual probability of flooding from sea in any year.

Flood Zone 3b - The functional floodplain, showing areas that act as a balancing reservoir, storage basin or balancing pond; land where water has to flow or be stored in times of flood to attenuate and delay the peak.

It should be noted the information indicates the flood risk to areas of land and is not sufficiently detailed to show whether an individual property is at risk of flooding.

Notes

The Flood Map for Planning (Rivers and Sea) is the Environment Agency's best estimate of the areas of land at risk of flooding, when the presence of flood defences are ignored. The information provided is largely based on modelled data and is therefore indicative rather than specific. The different Flood Zones are outlined below:

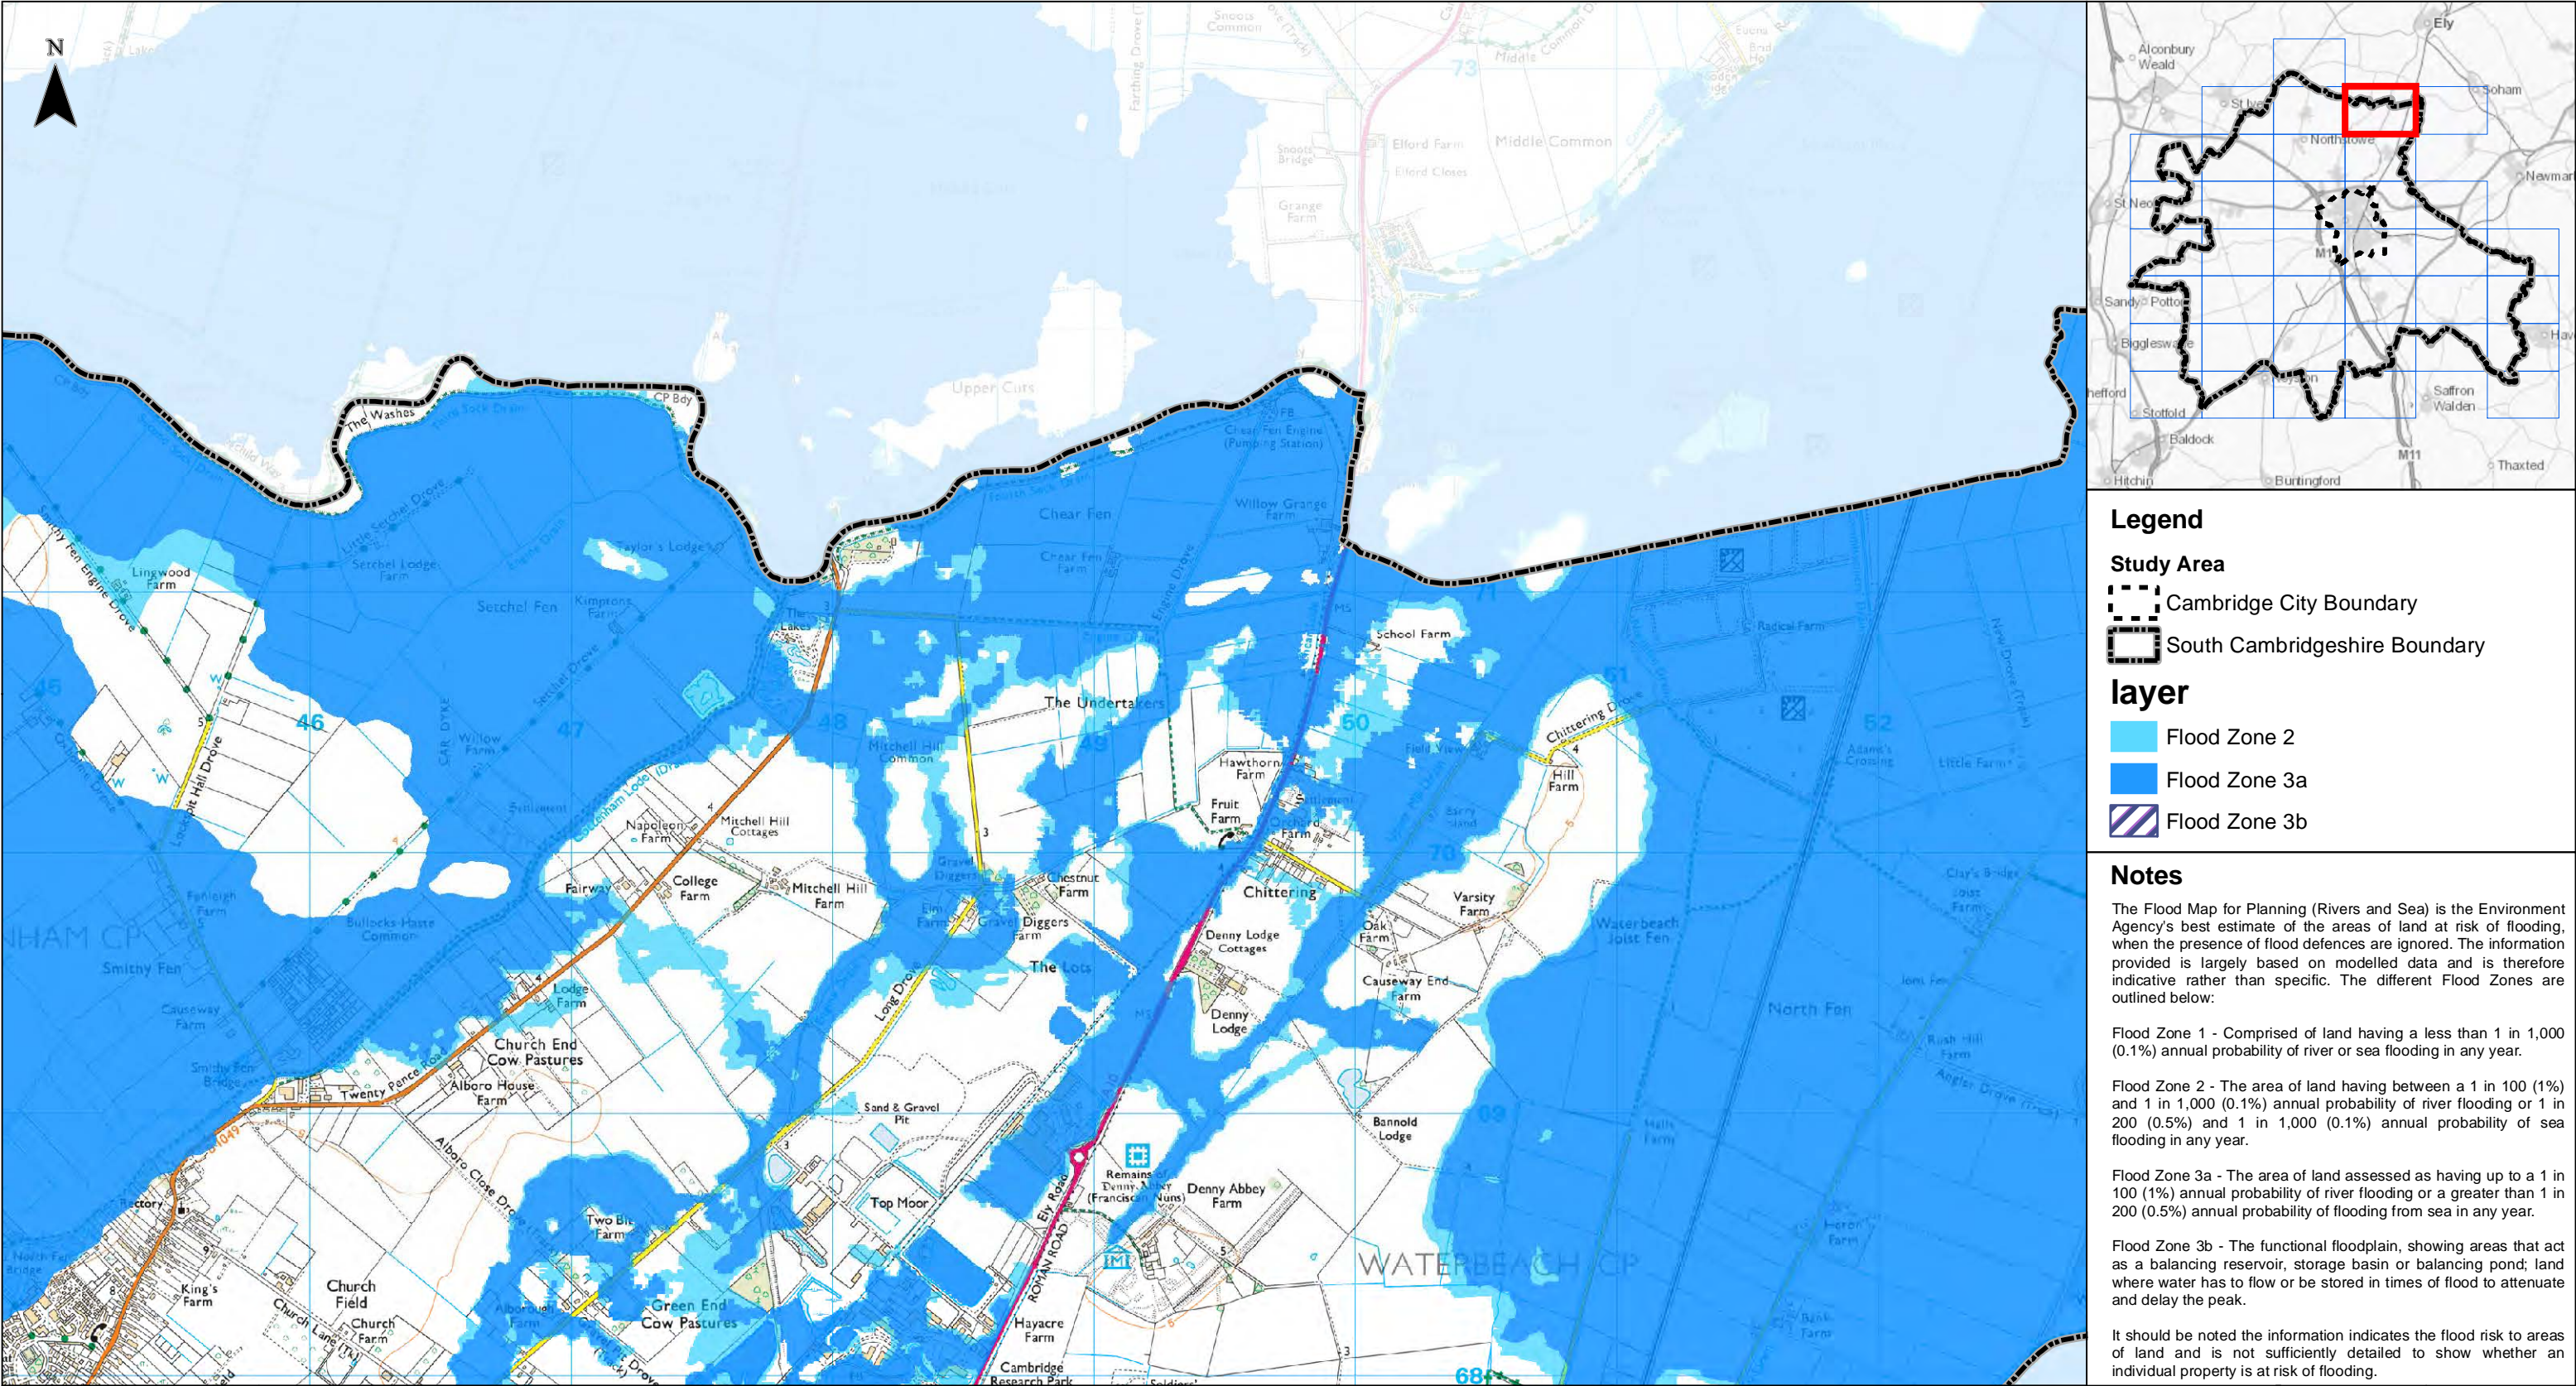

Flood Zone 1 - Comprised of land having a less than 1 in 1,000 (0.1%) annual probability of river or sea flooding in any year.

Flood Zone 2 - The area of land having between a 1 in 100 (1%) and 1 in 1,000 (0.1%) annual probability of river flooding or 1 in 200 (0.5%) and 1 in 1,000 (0.1%) annual probability of sea flooding in any year.

Flood Zone 3a - The area of land assessed as having up to a 1 in 100 (1%) annual probability of river flooding or a greater than 1 in 200 (0.5%) annual probability of flooding from sea in any year.

Flood Zone 3b - The functional floodplain, showing areas that act as a balancing reservoir, storage basin or balancing pond; land where water has to flow or be stored in times of flood to attenuate and delay the peak.

It should be noted the information indicates the flood risk to areas of land and is not sufficiently detailed to show whether an individual property is at risk of flooding.

Notes

The Flood Map for Planning (Rivers and Sea) is the Environment Agency's best estimate of the areas of land at risk of flooding, when the presence of flood defences are ignored. The information provided is largely based on modelled data and is therefore indicative rather than specific. The different Flood Zones are outlined below:

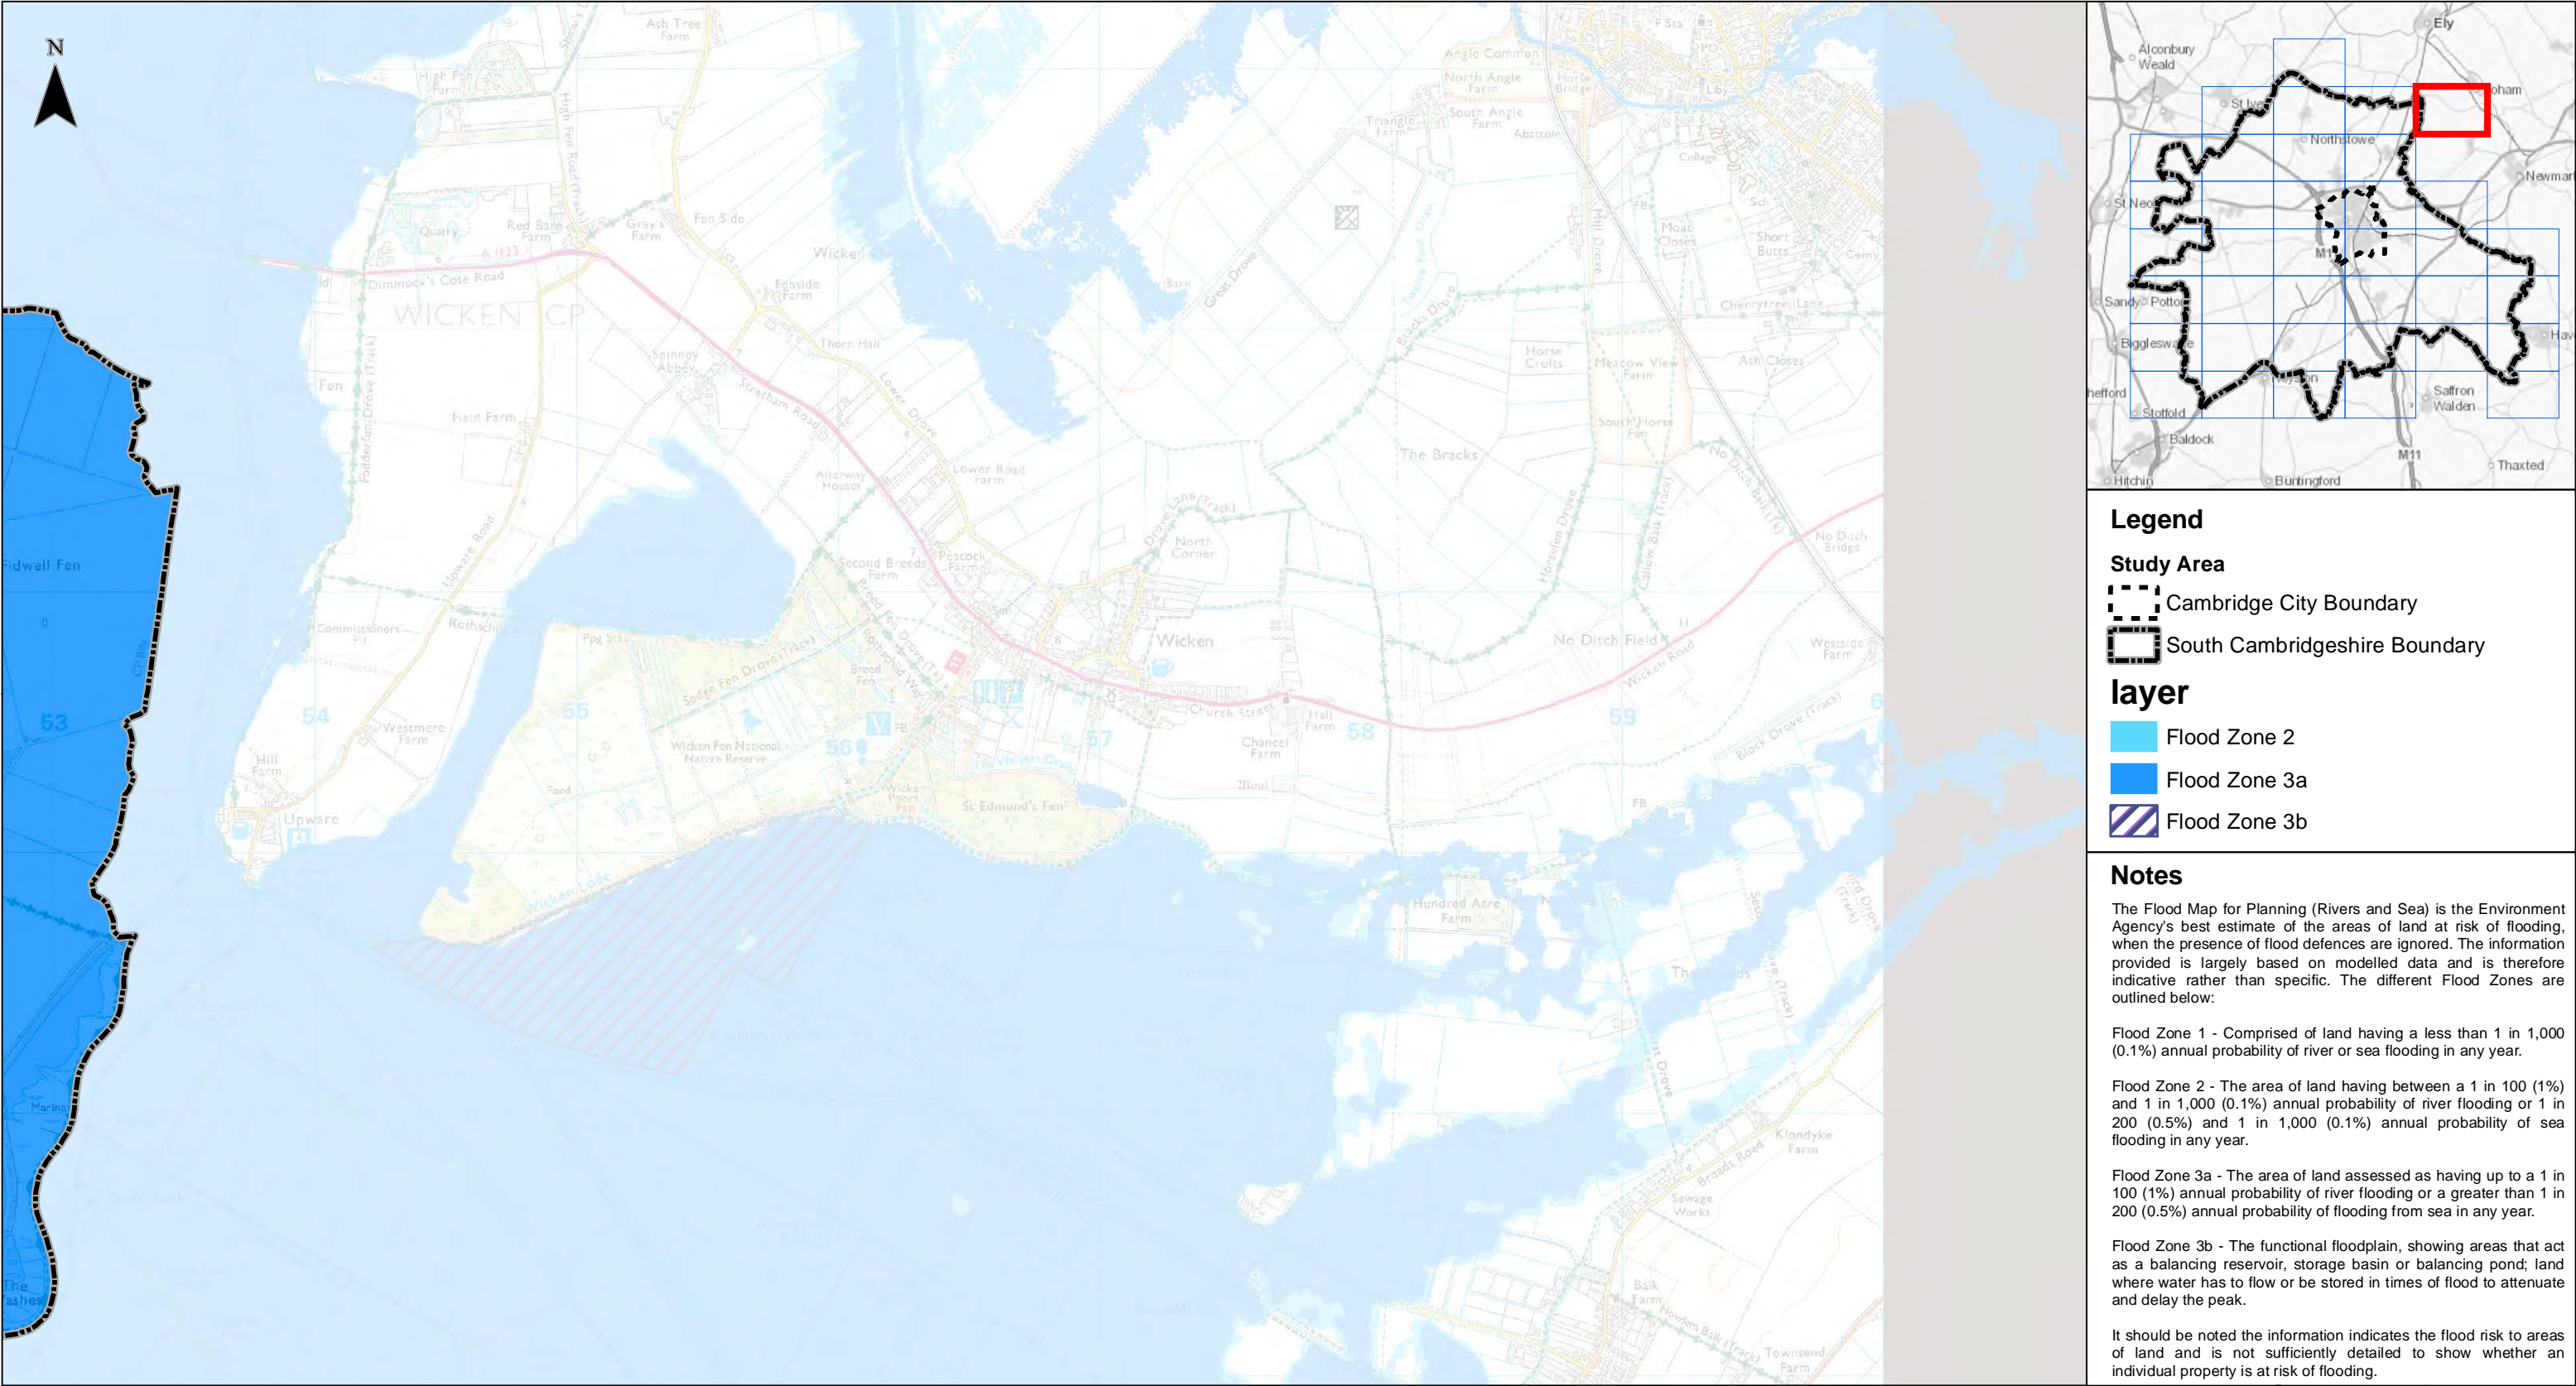

Flood Zone 1 - Comprised of land having a less than 1 in 1,000 (0.1%) annual probability of river or sea flooding in any year.

Flood Zone 2 - The area of land having between a 1 in 100 (1%) and 1 in 1,000 (0.1%) annual probability of river flooding or 1 in 200 (0.5%) and 1 in 1,000 (0.1%) annual probability of sea flooding in any year.

Flood Zone 3a - The area of land assessed as having up to a 1 in 100 (1%) annual probability of river flooding or a greater than 1 in 200 (0.5%) annual probability of flooding from sea in any year.

Flood Zone 3b - The functional floodplain, showing areas that act as a balancing reservoir, storage basin or balancing pond; land where water has to flow or be stored in times of flood to attenuate and delay the peak.

It should be noted the information indicates the flood risk to areas of land and is not sufficiently detailed to show whether an individual property is at risk of flooding.

The Flood Map for Planning (Rivers and Sea) is the Environment Agency's best estimate of the areas of land at risk of flooding, when the presence of flood defences are ignored. The information provided is largely based on modelled data and is therefore indicative rather than specific. The different Flood Zones are outlined below:

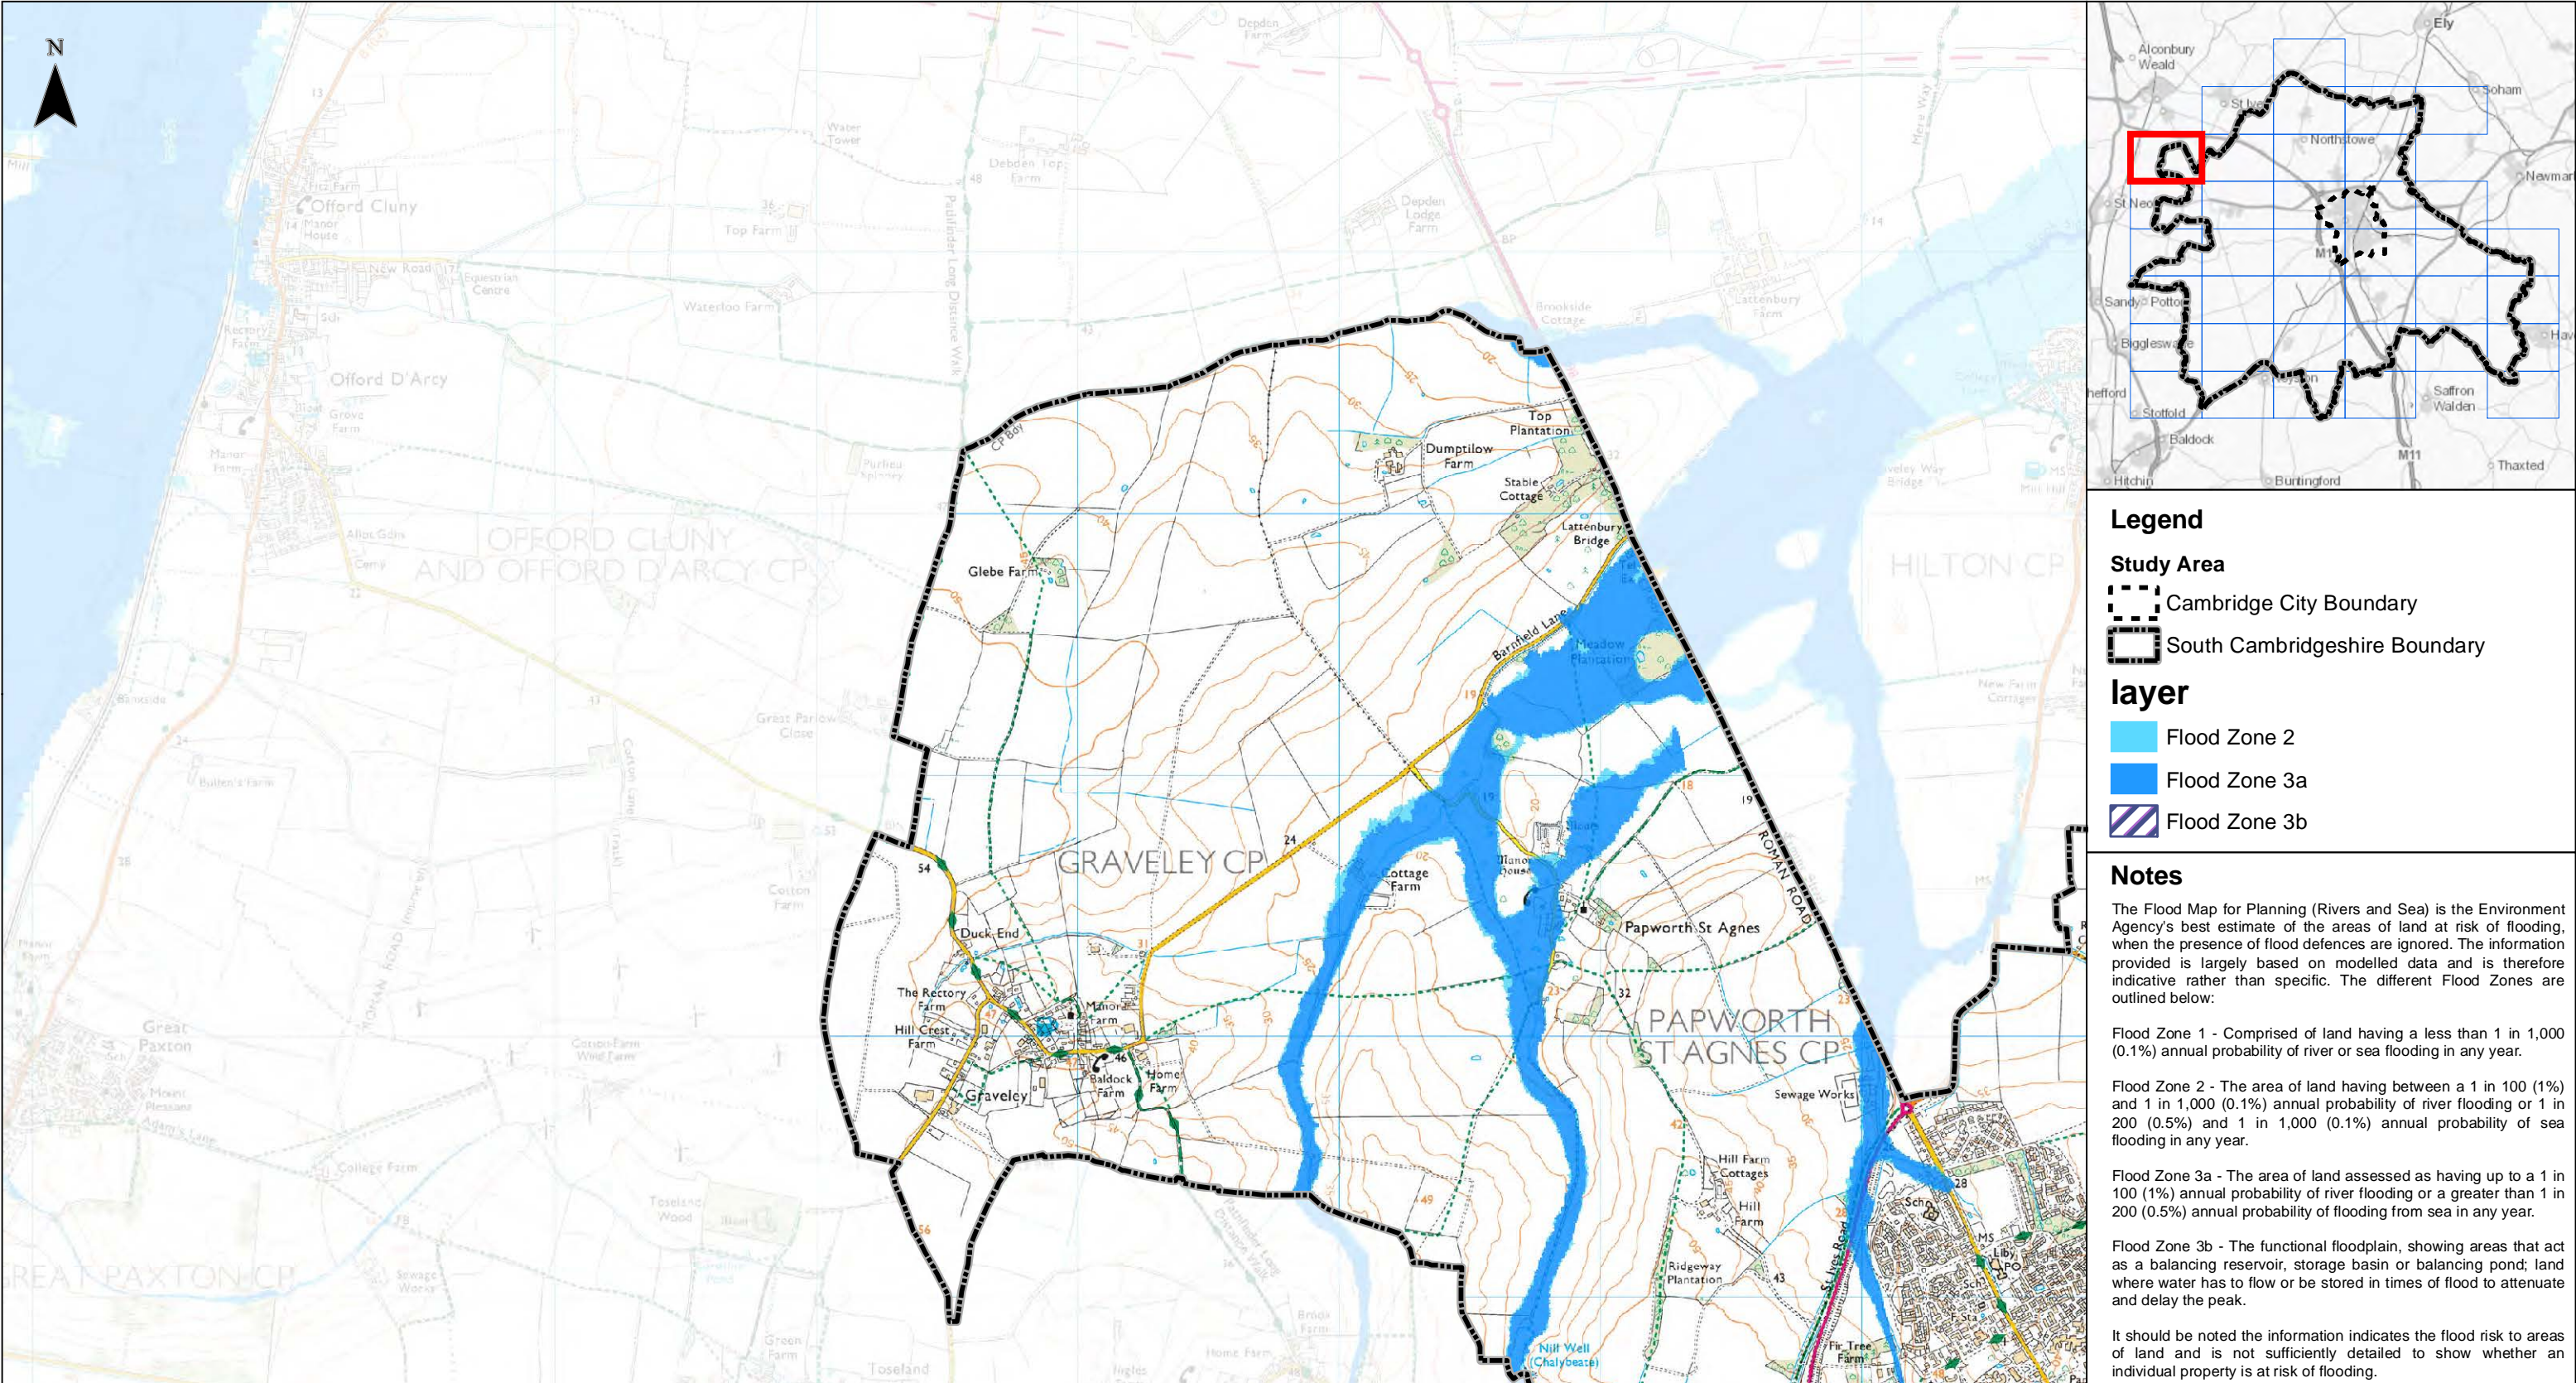

Flood Zone 1 - Comprised of land having a less than 1 in 1,000 (0.1%) annual probability of river or sea flooding in any year.

Flood Zone 2 - The area of land having between a 1 in 100 (1%) and 1 in 1,000 (0.1%) annual probability of river flooding or 1 in 200 (0.5%) and 1 in 1,000 (0.1%) annual probability of sea flooding in any year.

Flood Zone 3a - The area of land assessed as having up to a 1 in 100 (1%) annual probability of river flooding or a greater than 1 in 200 (0.5%) annual probability of flooding from sea in any year.

Flood Zone 3b - The functional floodplain, showing areas that act as a balancing reservoir, storage basin or balancing pond; land where water has to flow or be stored in times of flood to attenuate and delay the peak.

It should be noted the information indicates the flood risk to areas of land and is not sufficiently detailed to show whether an individual property is at risk of flooding.
