- 1% (1 in 100) AEP Event
- 0.1% (1 in 1000) AEP Event

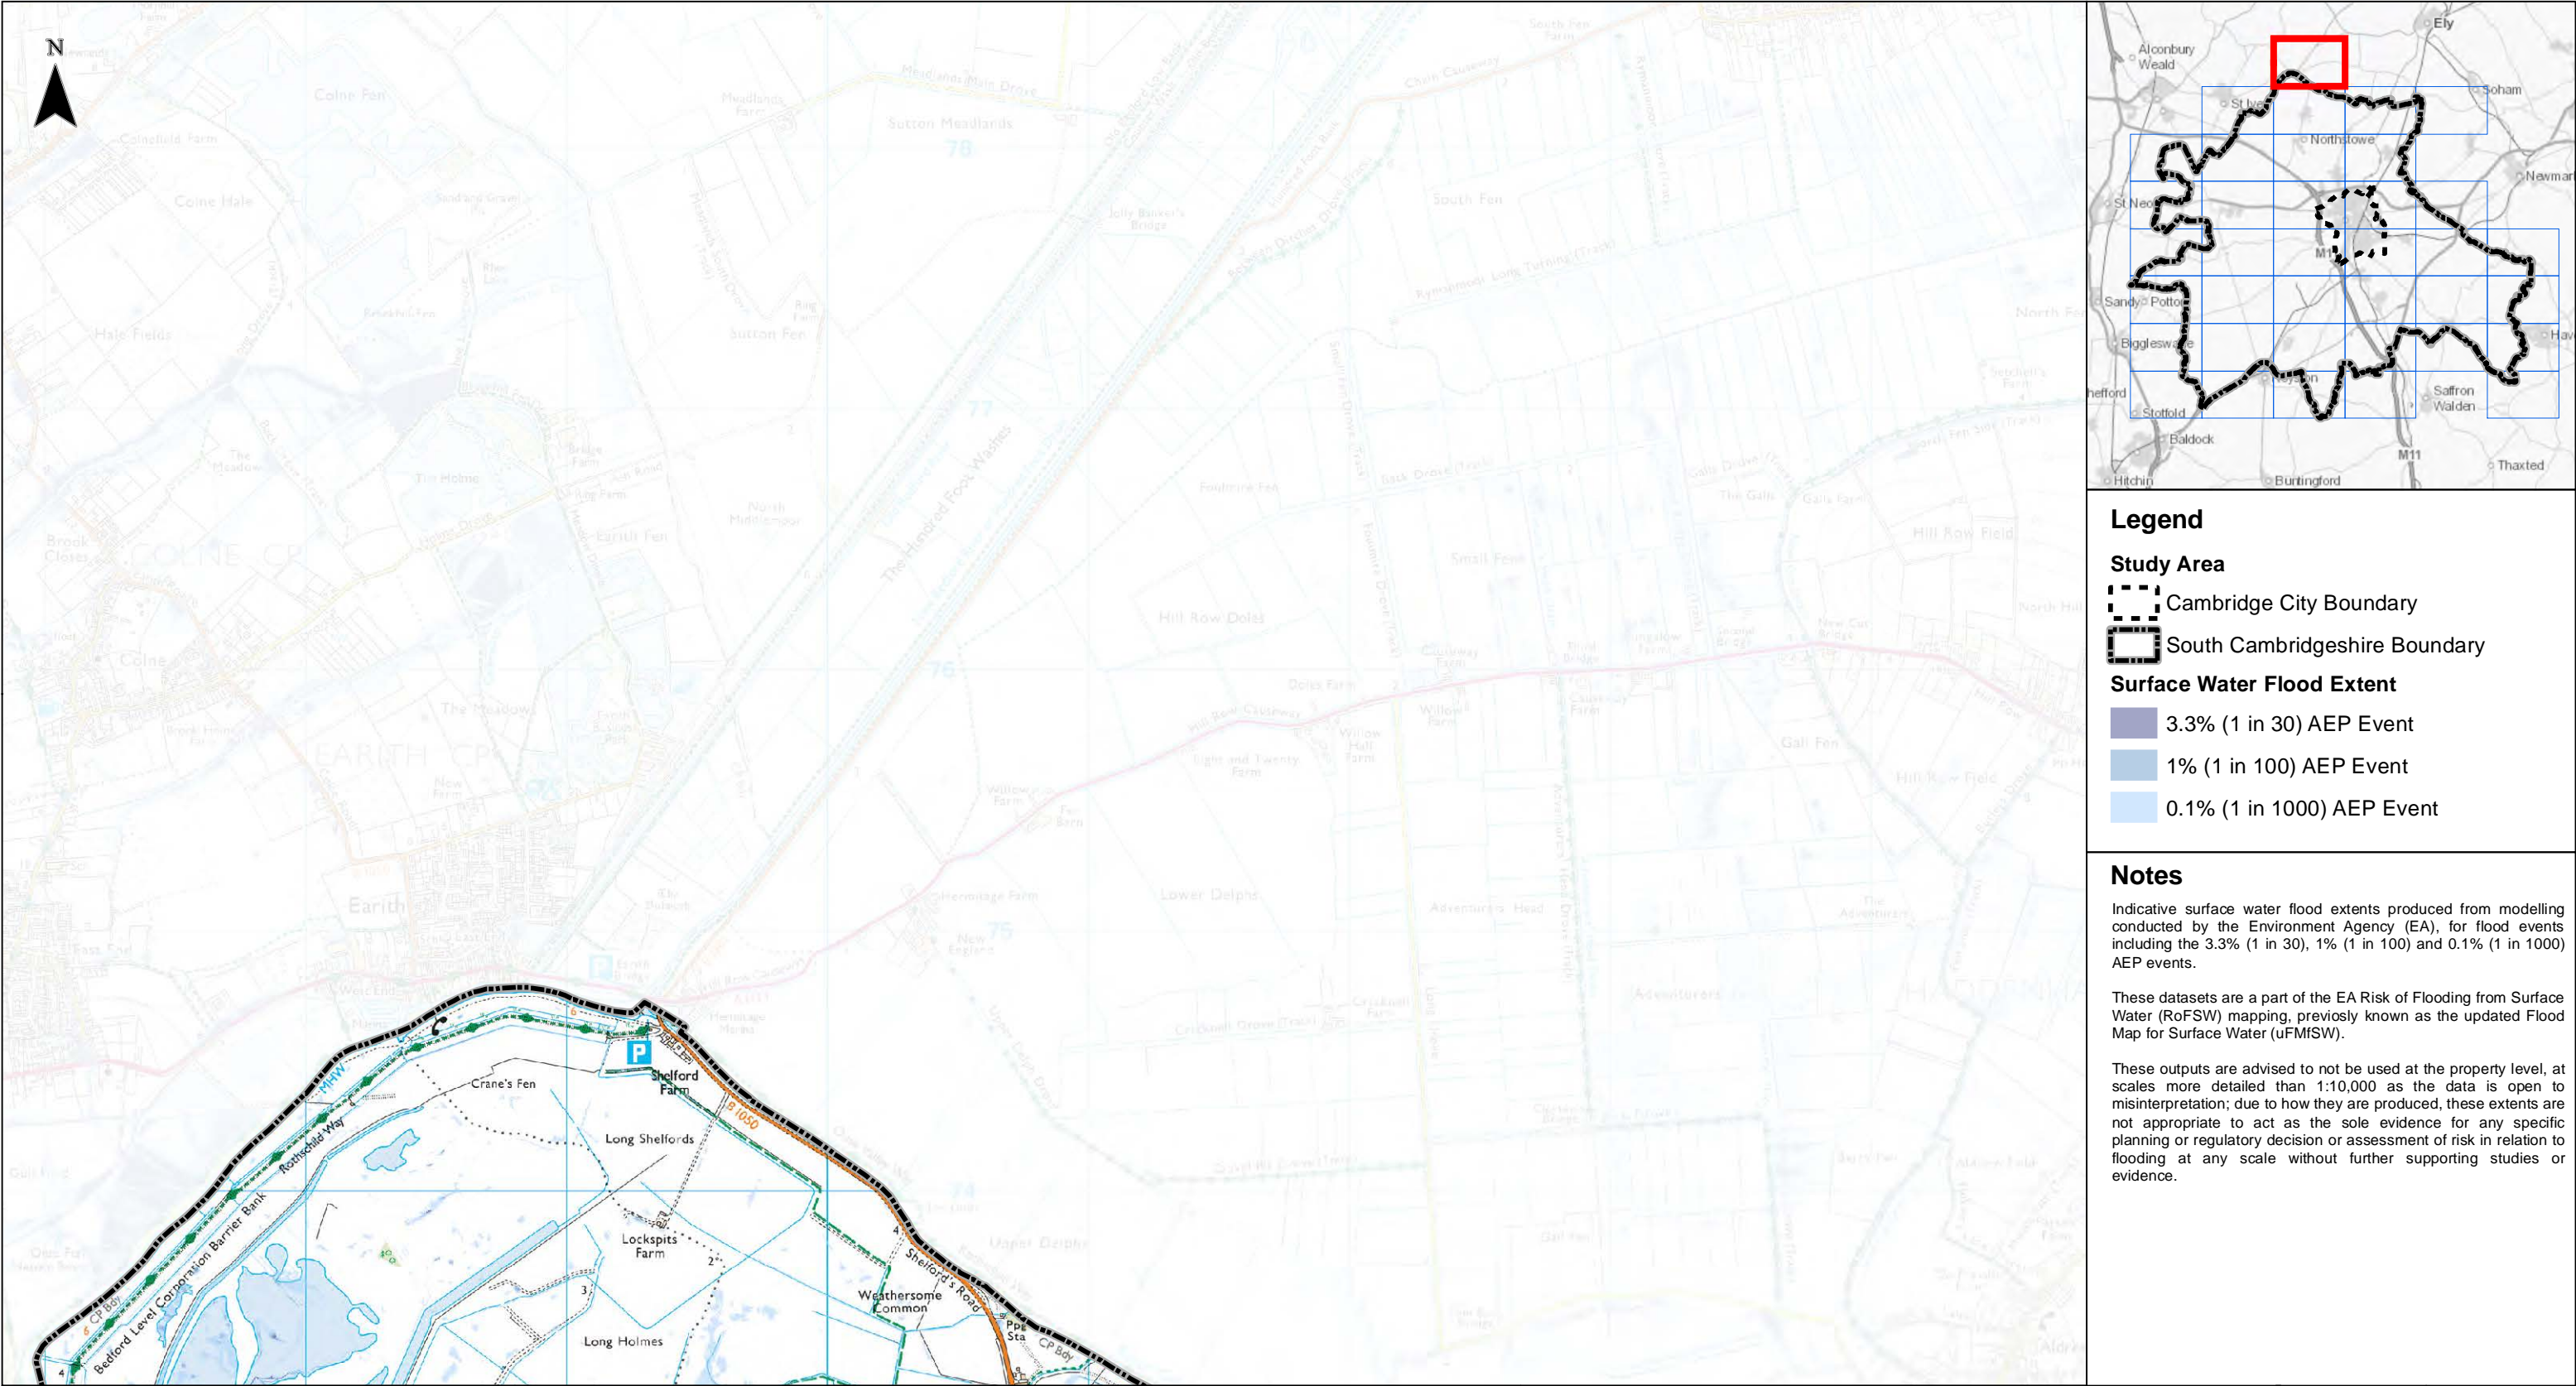

**Notes**

Indicative surface water flood extents produced from modelling conducted by the Environment Agency (EA), for flood events including the 3.3% (1 in 30), 1% (1 in 100) and 0.1% (1 in 1000) AEP events.

These datasets are a part of the EA Risk of Flooding from Surface Water (RoFSW) mapping, previously known as the updated Flood Map for Surface Water (uFMSW).

These outputs are advised to not be used at the property level, at scales more detailed than 1:10,000 as the data is open to misinterpretation; due to how they are produced, these extents are not appropriate to act as the sole evidence for any specific planning or regulatory decision or assessment of risk in relation to flooding at any scale without further supporting studies or evidence.

Indicative surface water flood extents produced from modelling conducted by the Environment Agency (EA), for flood events including the 3.3% (1 in 30), 1% (1 in 100) and 0.1% (1 in 1000) AEP events.

These datasets are a part of the EA Risk of Flooding from Surface Water (RoFSW) mapping, previously known as the updated Flood Map for Surface Water (uFmFSW).

These outputs are advised to not be used at the property level, at scales more detailed than 1:10,000 as the data is open to misinterpretation; due to how they are produced, these extents are not appropriate to act as the sole evidence for any specific planning or regulatory decision or assessment of risk in relation to flooding at any scale without further supporting studies or evidence.
