

Site information	-
Site ID	115683
HELAA Site ID	OS043
Suitable Site Area (ha)	9.43
Ward/Parish	Coleridge
Greenfield or Previously Developed?	Previously Developed Land
Category of site	Densification of existing urban areas
Category of settlement	Cambridge City
Current use(s)	-
Proposed development	Mixed use
Proposed employment floorspace (m2)	8000
Proposed residential capacity	550
Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 13% lies in a 1 in 30 year event. 6% lies in a 1 in 100 year event. 18% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	The site is a large industrial estate on the south side of the railway line opposite the Cambridge Station (Central). Landscape impacts are low. Buffering or integration with the existing residential development surrounding the site will be critical to the success of the site. Areas of Open Space for residents will also be important for their recreation and amenity needs. These recommendations fall within the parameters of the existing allocation and are supported
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-

Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require an assessment of recreational impact on nearby SSSIs. Otherwise unlikely to impact on designated sites. Boundary trees, hedgerows and Open Mosaic Habitat (if present e.g. in railway sidings) may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Site likely to be of low ecological value, although buildings may support roosting bats or nesting birds if suitable. Opportunities to enhance ecological networks and deliver biodiversity net gain.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 39% lies in a 1 in 30 year event. 8% lies in a 1 in 100 year event. 9% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	The Site is currently developed as an industrial estate with warehouse/office and warehouse/retail type units. Effectively the site is a 'backland' site since it has no frontages onto the highway. The only landscape impacts lie in the impacts on the existing trees both non-TPO (offsite) and TPO. Any development should be mindful of avoiding negative impacts on the trees and allow sufficient space for tree planting as part of the development.

Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	The site is a large industrial/commercial estate with frontages onto both Cherry Hinton Road and Coleridge Road. Landscape impacts are Low. Any development should be mindful of avoiding negative impacts on nearby offsite trees. Adequate space needed for large tree planting.
Biodiversity and Geodiversity RAG Assessment 2025	-

Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Green
Biodiversity and Geodiversity Officer Comments 2021	Unlikely to impact on designated sites for nature conservation. Consultation with Natural England unlikely to be required. Boundary trees and hedgerows may be of ecological value. Buildings and hardstanding unlikely to be of ecological value, although buildings may support roosting bats (if suitable). Opportunities to deliver biodiversity net gain.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site would not have a detrimental impact on any designated site, or those with a regional or local protection.

Available	-
Is the site controlled by a developer or landowner who has expressed an intention to develop?	The site is an existing Local Plan Allocation but there is no evidence it is currently available.
Are there known legal or ownership impediments to development?	No
Is there planning permission to develop the site?	No relevant recent planning history
When will the site be available for development?	0-5 Years
Available RAG	Red
Achievable	-
Is there a reasonable prospect that the site will be developed?	The land has not been promoted by the landowner and or developer and therefore it is not known to be available for development. The site has a low existing use value and development is likely to be economically viable at an appropriate density.

Achievable RAG	Amber
Capacity	-
Prevailing Density (weighted) (dwellings per ha)	30
Residential capacity at prevailing density	21
Estimated employment space (m2)	0
Estimated start date	0-5 Years
Estimated annual build-out rate (pa)	40-75
Development completion timescales (years)	0-5 Years

Site information	-
Site ID	116106
HELAA Site ID	200823
Suitable Site Area (ha)	1.19
Ward/Parish	Coleridge
Greenfield or Previously Developed?	Previously developed land
Category of site	Densification of existing urban areas
Category of settlement	Cambridge City
Current use(s)	Residential
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	90
Suitability	-
Adopted Development Plan Policies RAG 2025	Green

Adopted Development Plan Policies Comment 2025	Development of the site is compatible and consistent with Development Plan policies and allocation.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood zone: Wholly in Flood Zone 1; Surface water flooding: 13% lies in a 1 in 30 year event, 3% lies in a 1 in 100 year event and 12% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	-
Flood Risk Officer Comment 2021	-
Landscape RAG Assessment 2025	Amber
Landscape Comment 2025	A part of the site is protected open space, which contributes positively to the character of the wider neighbourhood. Any proposals to remove the open space would lead to an objection in principle. Mature trees on the site should also be retained to protect existing character. Context-driven development that supports placemaking and responds to the above constraints could be accommodated elsewhere on the site.
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	-
Landscape Comment 2021	-
Biodiversity and Geodiversity RAG Assessment 2025	Green
Biodiversity and Geodiversity Officer Comments 2025	A development of the size and scale described would not provide any specific ecological risks to statutory or non-statutory designated sites. However, this does not remove the likelihood of protected and priority species being impacted, nor that a development of the type described would likely be eligible for mandatory biodiversity net gain.
Biodiversity and Geodiversity Guideline Comments 2025	Development of the site would not have a detrimental impact on any designated site, or those with a regional or local protection.

Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	-
Flood Risk Officer Comment 2021	-
Landscape RAG Assessment 2025	Green
Landscape Comment 2025	The area is defined as pre-1900 Residential Terraces and Large Terraces in the Cambridge Landscape Character Assessment (2003). The buildings do not represent a defining characteristic of this character type. The potential landscape impacts of developing the site are low. Buffering or integration with the existing residential development surrounding the site will be critical to the success of the site. Areas of Open Space for users of the site will also be important for their recreation and amenity needs.
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	-
Landscape Comment 2021	-
Biodiversity and Geodiversity RAG Assessment 2025	Amber
Biodiversity and Geodiversity Officer Comments 2025	All residential developments will require an assessment of recreational impact on nearby SSSIs. Otherwise, development of the site is unlikely to impact on designated sites. Boundary trees, hedgerows and open mosaic habitat (if present e.g. in railway sidings) may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Site likely to be of low ecological value, although buildings may support roosting bats or nesting birds if suitable. Opportunities to enhance ecological networks and deliver biodiversity net gain.
Biodiversity and Geodiversity Guideline Comments 2025	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.
