Archaeology RAG Assessment 2021	Amber
Archaeology Officer Comment 2021	Previous evaluation has identified features in the site relating to the medieval village.
Accessibility RAG Assessment 2025 - Automated	Amber
Accessibility RAG Assessment 2025 - Officer Verified	-
Accessibility Comment 2025	Inadequate accessibility to key local services, transport, and employment opportunities. Proposed development would not require delivery of accompanying key services
Site Access RAG Assessment 2025	Amber
Site Access Officer Comment 2025	The site has been re-assessed as Amber based on the new information provided. The site is acceptable in principle, subject to further detail and consultation. A significant level of infrastructure will be required outside the site boundary to encourage more sustainable transport links. It is unclear whether these sustainable transport links can be achieved within the local available constraints.
Site Access RAG Assessment 2023	-
Site Access Officer Comment 2023	-
Site Access RAG Assessment 2021	Red
Site Access Officer Comment 2021	If over 100 dwellings two points of access are required to accord with the advice of the Cambridgeshire Fire and Rescue.
Transport and Roads RAG Assessment 2025	Amber
Transport and Roads Guideline Comments 2025	Any potential impact on the functioning of trunk roads and/or local roads could be reasonably mitigated. The development would need to provide mitigation to reduce the vehicle impact and encourage active travel and public transport use. A Transport Assessment and a Travel Plan will be required.
Transport and Roads RAG Assessment 2023	-
Transport and Roads Guideline Comments 2023	-
Transport and Roads RAG Assessment 2021	Amber
Transport and Roads Guideline Comments 2021	Any potential impact on the functioning of trunk roads and/or local roads could be reasonably mitigated.
Noise, Vibration, Odour and Light Pollution RAG Assessment 2025	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2025	The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation.

Noise, Vibration, Odour and Light Pollution RAG Assessment 2023	-
Noise, Vibration, Odour and Light Pollution Guideline Comments 2023	-
Noise, Vibration, Odour and Light Pollution RAG Assessment 2021	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2021	The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation.
AQMA RAG Assessment 2025	Amber
Air Quality Officer Comment 2025	Based on the additional information provided, assessment of the site remains unchanged as Amber. The site falls outside the Air Quality Management Area (AQMA). However, due to the scale of the site, the number of units proposed and the location, inherent/intrinsic designed-in air quality mitigation measures and conditions may be necessary to offset impacts on designated AQMAs.
AQMA RAG Assessment 2023	Amber
Air Quality Officer Comment 2023	The additional information provided does not significantly affect air quality issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment. The site is located outside an AQMA but there is potential for an impact on AQMA which will require inherent / intrinsic designed in Air Quality mitigation.
AQMA RAG Assessment 2021	Amber
Air Quality Officer Comment 2021	Reasonably large site and lots of residential units - potential for AQMA traffic impact without mitigation
Contaminated Land RAG Assessment 2025	Amber
Contaminated Land Officer Comments 2025	Previous agricultural land use. Potential for historic contamination, conditions required.
Contaminated Land RAG Assessment 2023	-
Contaminated Land Officer Comments 2023	-
Contaminated Land RAG Assessment 2021	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 5% lies in a 1 in 30 year event. 6% lies in a 1 in 100 year event. 16% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	A small agricultural field set in a rural location. Wide views are negligible however, local views and amenity views are high due to lack of boundary planting and existing topography. Development upon the site would have adverse harm and incongruous with the existing settlement character. Development would be permanent and an encroachment into the countryside. There is little scope to mitigate the adverse effects without themselves having an impact on the settlement character.

Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	-
Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	Separation between the 'C20' Coton and the historic core of the village is quite distinct. St Peter's is a landmark feature and marks the west entrance to the Conservation Area. Development on the site must not affect views of the church in its rural setting. This may affect how far to the rear of site (rising land) can accommodate development. The approach to/exit from the Conservation Area and quality of arrival views towards St Peter's may be diminished or 'crowded' without a large set back of any building line from the roadside.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 4% lies in a 1 in 30 year event. 2% lies in a 1 in 100 year event. 4% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional information replies to the previous helaa assessment and includes an updated Vision document. However the proposed changes do not address landscape impact concerns. The development has a damaging effect over the village's sense of arrival causing irreversible harm to the views and local openness, and constitutes a significant step towards development sprawling therefore the previous RAG assessment remains unchanged.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is highly visible with extensive views in and out of the site to the south, north and west. Development of the site would push the village developed area further eastward towards Barton and although there are isolated clustered residential and commercial properties between Comberton and Barton they are not perceived as part of the village. An extensive residential development on the land at the junction of Barton Road and Long Road would have a negative impact on the surrounding open and rolling landscape character.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-

Biodiversity and Geodiversity RAG Assessment 2023	-

Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There are no apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site consists of a long narrow plot to be rear of two residential dwellings to the north of Barton Road, Comberton. There are open views of the site from the west and north. Development as proposed could be achieved dependent on the scale and massing of the development. There would be an increase of impact on the landscape character if scale and massing were not appropriate to the rural surroundings. Adequate edge treatment to soften views and integrate any development into the surroundings would be essential.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 4% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional information includes a reply to the previous helaa assessment and provides a reduction in units from 250 to 200. Any proposed development is outside development framework, and would cause irreparable harm to the local openness, village edge and landscape character, which would be unalterable and not possible to mitigate against, therefore the previous RAG assessment remains unchanged.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is part of the panoramic views because of the open nature of the landscape and also because of its location on higher and sloping land. There are no PROW on the land or nearby. The site is land locked apart from access onto Branch Road to the north and currently isolated from the main area of the village. Development of the site would push the village envelope further northward having negative impact of the surrounding open and rolling landscape character.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-

Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. The southwestern boundary of the site lies adjacent to a ditch which will require survey and possible mitigation. There are no other apparent priority habitats within the site; however, there are grasslands, extensive wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2025	-
Policy Officer Comment 2025	-
Historic Environment RAG Assessment 2025	-
Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	-
Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Green
Historic Environment Comments 2021	Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets.
Archaeology RAG Assessment 2025	-
Archaeology Officer Comment 2025	-
Archaeology RAG Assessment 2023	-
Archaeology Officer Comment 2023	-
Archaeology RAG Assessment 2021	Amber
Archaeology Officer Comment 2021	Located to the south of an extensive cropmark complex of probable Iron Age settlement

Highways England Zones	M11 North
Available	
Is the site controlled by a developer or landowner who has expressed an intention to develop?	The site was submitted by the landowner and/or site promoter who has confirmed that the site is available for development in the timescales indicated.
Are there known legal or ownership impediments to development?	No
Is there planning permission to develop the site?	No relevant recent planning history
When will the site be available for development?	6-10 Years
Available RAG	Green

Achievable	-
Is there a reasonable prospect that the site will be developed?	The land has been promoted by the landowner and or developer and is known to be available for development. The site has a low existing use value and residential development is likely to be economically viable at an appropriate density.
Achievable RAG	Green
Capacity	-
Prevailing Density (weighted) (dwellings per ha)	30
Residential capacity at prevailing density	310
Estimated employment space (m2)	0
Estimated start date	6-10 Years
Estimated annual build-out rate (pa)	50
Development completion timescales (years)	11-15 Years
