Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 6% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	A linear shaped site located within the village of Harston partially within and outside the settlement framework. Wide and local views are limited due to intervening built form and settlement edge woodland. Development upon the site would have a limited impact to the landscape character and views. With a sympathetic approach to landscape mitigation this impact would be beneficial.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Green
Biodiversity and Geodiversity Officer Comments 2021	No impact on sites designated for nature conservation. Trees and hedgerows may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species such as nesting birds. Buildings may be suitable to support roosting bats; surveys and mitigation will need to be included, but appears to be entirely feasible. Otherwise, site likely to be of low ecological value. All schemes need to deliver at least 10% measurable biodiversity net gain.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site would not have a detrimental impact on any designated site, or those with a regional or local protection.

Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 11% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	New information includes further representations and a LVIA and Green Belt Review, and mentions boundary changes and a reduction in number of units. Even with a reduction in residential units the proposed development would have a permanent detrimental effect on views and landscape character. Therefore, the original RAG rating remains unaltered.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This large site on the east edge of Hauxton, if developed, would effectively double the size of the main village of Hauxton. Development would encroach on the gap which provides valuable landscape buffering between the main settlement and the M11. Overall, the potential scale of development would cause irreversible harm to the character of this very small village. The development framework boundary should be considered with higher value as development to the edges would harm the character of the landscape surrounding the village as well as the character of the village itself.

Flood Risk Officer Comment 2021	-
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	This is an irregular shaped site which was previously occupied by a waste water treatment facility. It sits to the west of Cambridge Road (A10) and to the north-west of Hauxton village and well outside development framework. The existing building footprint is approx. 2.5ha and the remaining area is scrub with established trees, copses and hedges around the perimeter. Trumpington Meadows Country Park southern edge and River Cam are located to the north. A further drain or brook runs through western boundary and adjoins the bridleway along the southern boundary. Beyond these is agricultural land. The site is accessed through a junction with the A10, adjacent to a sports ground. Although the site is not typical of the both LCA it sits within the Green Belt, on an important edge between Hauxton and Trumpington, serving as a buffer along the south bank of River Cam, adding to the openness of the country park and stopping coalescence between settlements. Any proposed development would be an encroachment into the countryside and would have a detrimental effect on the landscape character and sensitivities around the River. Therefore it is considered that the site is not suitable for development.

Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-

Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No likely impact on Statutory designated sites for nature conservation. However, the site is present adjacent to the River Cam County Wildlife Site, which is an important ecological corridor. The site also contains coastal and floodplain grazing marsh and deciduous woodland Priority habitat, which may be difficult to compensate via on-site mitigation. There are also buildings, grasslands, scrub and hedgerows on site that are likely to have ecological value. Applications may find provision of a 10 % net gain in biodiversity difficult within their redline boundaries.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (24%). Partly in Flood Zone 3 (75%).. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 4% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Red
Flood Risk Officer Comment 2021	The site is wholly or largely within Flood Zones 2 or 3 such that it cannot accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace and/or the site is a ‘dry island’ whereby all potential accesses to the adopted public highway require crossing land that is within Flood Zones 2 or 3.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site comprises part of the River Cam, part of a woodland, hardstanding which forms part of a car park and three Listed Buildings. The River Cam divides in the west, looping around the site before re-joining in the east and enclosing the site. The site is within the Green Belt and outside the Development Framework boundary and lies mostly inside a County Wildlife Site. Most boundaries benefit from an extremely good level of vegetation cover and the site has an enclosed woodland character. Development of any type in this location is not feasible and is inappropriate. The site is in the countryside and preservation of the rural countryside character is important. The woodland should be retained as it acts as landscape buffer and is key in screening views from the River Cam outwards., as well as providing an enclosed landscape character for the river setting.

Biodiversity and Geodiversity RAG Assessment 2023	-

Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Application unlikely to require Natural England consultation. The River Cam County Wildlife Site runs through the site. It is cited for its relatively unpolluted and not overly canalised stretches as well as stands of pollard willows. There are potential priority habitats within the site as the wooded areas have been highlighted by Natural England and are registered on the National Forest Inventory in 2014. Previous applications on this site have proposed renovating the current buildings and not building additional structures. If that is still the proposal then the site can be assessed as Amber; however, if the buildings are to be demolished and significant habitat removed, this site should be assessed as Red. There are no other apparent priority habitats within the site; however, there are buildings grasslands, wooded areas, on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their redline boundaries and may need to find off-site compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site would have a detrimental impact on designated sites, or those with a regional or local protection which cannot be reasonably mitigated or compensated as appropriate. -----OR----- Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated. .

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is a small site. Development on this site would essentially bridge the gap between the village and development outside of the framework boundary to the west. Development here would do well to retain the trees along the western boundary they are key in screening views. The site is in the countryside and preservation of the rural countryside character is important. The site acts as a green gap between the modern development to the west and the historic core of the village and serves an important purpose in that regard, to retain the character and setting of the villages.
