Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 3% lies in a 1 in 30 year event. 2% lies in a 1 in 100 year event. 11% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Green
Flood Risk Officer Comment 2021	The site is at low risk of flooding (within flood zone 1) and no risk from surface water flooding
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	This is a brownfield site located approximately 500m from the development framework of the village of Little Abington. Wide, local and amenity views are limited due to existing mature vegetation. Development upon the site will have a beneficial effect to the existing local landscape character. There will be negligible effects to the wider landscape, views and visual amenity.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (7%). Surface Water Flooding: None
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is a grass paddock in a rural location located to the west of the village of Great Abington outside the settlement framework. Wide views are negligible however, local views are high due to lack of boundary vegetation. Development upon this site would be detached from the existing settlement framework. However, with a sympathetic approach the significant adverse harm could be mitigated.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSIs. Housing developments above 50 dwellings would require consultation with Natural England. Grasslands, hedges and trees on site are likely to have ecological value and may qualify as Habitats of Principal Importance. Applications may find provision of a net gain in biodiversity of a minimum of 10% difficult within their red line boundaries and may need to find off-site compensation.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	-
Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Red
Historic Environment Comments 2021	The openness of this part of the village would make any development on this site difficult to implement without having a significant impact on the setting of the two grade II* listed buildings close by. In addition it would go against the built form of the village in this part of the conservation area which is generally to the east of the High Street. This harm cannot be reasonably mitigated.

Landscape Comment 2023	-
Landscape RAG	Amber
Assessment 2021	
Landscape Comment 2021	The site is a small field within the Hall Farm complex of buildings and constituting a piece of back land. It is unclear how access might be achieved on this site and this may impact on a TPO tree bank. The context of the immediate area suggest that the unit numbers may be too high for the site. The site is otherwise developable with little impact on views or character but is dependent on retention of trees, context awareness and access.

Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	A reduction in scale to approximately 10 units to follow the existing settlement pattern to the north may be acceptable. Development of the site could have a detrimental impact on a designated or non-designated heritage asset or the setting of a designated or non-designated heritage asset, but the impact could be reasonably mitigated.

Contaminated Land Officer Comments 2021	Potential for historic contamination, conditions required.
Overall Suitability Score	Amber
Further constraints	-
Agricultural Land Classification Grade 1	0
Agricultural Land Classification Grade 2	27.55
Agricultural Land Classification Grade 3	72.45
Agricultural Land Classification Grade 4	0
Agricultural Land Classification Non Agricultural	0
Agricultural Land Classification Urban	0
Source Protection Zone	100
Highways England Zones	A11
Available	-
Is the site controlled by a developer or landowner who has expressed an intention to develop?	No evidence of landowner support for submission
Are there known legal or ownership impediments to development?	Yes - No evidence of landowner support for submission.
Is there planning permission to develop the site?	No relevant recent planning history
When will the site be available for development?	0-5 Years
Available RAG	Amber
Achievable	-
Is there a reasonable prospect that the site will be developed?	The land has not been promoted by the landowner and or developer and therefore it is not known to be available for development. The site has a low existing use value and development is likely to be economically viable at an appropriate density.

Achievable RAG	Amber
Capacity	-
Prevailing Density (weighted) (dwellings per ha)	30
Residential capacity at prevailing density	47
Estimated employment space (m2)	0
Estimated start date	0-5 Years
Estimated annual build-out rate (pa)	40-75
Development completion timescales (years)	0-5 Years

Site information	-
Site ID	115924
HELAA Site ID	40343
Suitable Site Area (ha)	3.92
Ward/Parish	Linton
Greenfield or Previously Developed?	Greenfield
Category of site	Integrating homes and jobs - Southern cluster
Category of settlement	Within or adjacent to Minor Rural Centre
Current use(s)	-
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	100
Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (2%). Partly in Flood Zone 3 (2%) Surface Water Flooding: None
Flood Risk RAG	- Surface Water Flooding, None
Assessment 2023	
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zones 3a or 3b.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	New supporting text has been submitted but does not include any detail on landscape or any new information about landscape and therefore the assessment remains red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site forms a prominent part of the landscape entrance to Linton, along with site 355 to the north, with wide, open views of the site available approaching the village on Back Road from the north west. The site is visually associated with the River Granta, valley woodlands landscape, and the historical fishponds and moat. It also forms a prominent part of the landscape setting of Linton from PROWs and viewpoints on Rivey Hill. Development on this site would introduce an isolated tongue of development, beyond the Development Framework, stretching into the countryside and would have unacceptable landscape and visual effects to the north western edge of Linton and the Valley and Rivey Hill landscapes. Even very limited development on this site would be difficult without causing landscape harm.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No additional information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.

Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. The southwest boundary of the site lies adjacent to the River Granta CWS, designated for not being grossly modified by pollution or canalisation, and supporting concentrations of pollard willows. The northern boundary lies adjacent (opposite side of the road) to the Furze Hills RSV CWS, which supports a population of a nationally rare plant species. There are priority deciduous woodlands registered on the 2014 National Forests Register along with floodplains grazing marsh adjacent to the River corridor There are no other apparent priority habitats within the site; however, there are grasslands, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2025	-
Policy Officer Comment 2025	-
Historic Environment RAG Assessment 2025	-
Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	Green
Historic Environment Comments 2023	The additional information has not changed the RAG rating which was green. There will be no detrimental impact on any heritage assets as there are none close to the site.
Historic Environment RAG Assessment 2021	Green
Historic Environment Comments 2021	Development of the site would have either a neutral or positive impact, but importantly not have a detrimental impact on any designated or non-designated heritage assets.
Archaeology RAG Assessment 2025	-
Archaeology Officer Comment 2025	-
Archaeology RAG Assessment 2023	Amber
Archaeology Officer Comment 2023	Based on the additional information provided, the assessment for the site remains unchanged as Amber as there is evidence of archaeology in the area that will require further investigation.
Archaeology RAG Assessment 2021	Amber
Archaeology Officer Comment 2021	Archaeological evaluation of the adjacent site identified archaeology of Bronze Age and Iron Age date.
