Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Application is unlikely to require consultation with Natural England. Grassland has been identified as potential Habitat of Principal Importance/priority habitat under Higher Level Stewardship (lowland calcareous grassland). Boundary hedgerows may also qualify as Habitats of Principal Importance/be of high ecological value. Impacts on priority habitats would need to be minimised through scheme design which may make delivery more challenging, but on some sites, compensation/mitigation is possible, particularly if habitat quality is variable. Bat roost records nearby. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 2% lies in a 1 in 100 year event. 7% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site comprises arable land located in the northern part of Guilden Morden, outside of the Development Framework Boundary, but abuts it in the north, east and south. The site comprises Policy NH/13 Important Countryside Frontage and faces a Protected Village Amenity Area (Policy NH/11). The site is generally well contained, but is open at the eastern and southern boundaries permitting views in. The site has a strong countryside character and infiltrates Guilden Morden by supplying a connection between the street scene and the surrounding rural area. This area is to be protected and development on any part of this site compromises the protected connection.

Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	Although there is an Important Countryside Frontage upon the western boundary, visibility to the countryside is restricted due to the mature boundary hedge line. With careful landscape mitigation works the site could be capable of accommodating some development without resulting in material harm to the surrounding countryside's landscape character and views from the local area though this would have to be tested through an LVIA. Typical landscape mitigation principles would include: Layout of development restricted to the north and east of the site which is offset from 'Frontage', access via the eastern corner of the site and a well treed character with wide hedgerows. Development of the site would have a detrimental impact on sensitive landscapes which may potentially be mitigated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is outside of the Development Framework Boundary and therefore in the countryside. Preservation of the rural countryside character is important. Development on this site would essentially infill and extend the settlement into the countryside eastward along High Street/Church Street. The distinctive, linear settlement pattern of local context must be retained .This is highly unachievable when considering Policy NH/13 Important Countryside Frontage which covers the northern and western boundaries. The site has a strong countryside character and infiltrates Guilden Morden by supplying a connection between the street scene and the surrounding rural area.

Greenfield or Previously Developed?	Greenfield
Category of site	Dispersal: Villages
Category of settlement	Within or adjacent to Group Village
Current use(s)	-
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	10
Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: None
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Green
Landscape Comment 2023	The submitted information confirms the alteration of the site boundary to exclude the pocket of woodland in the southwest corner of the site and also the individual dwelling in the northeast corner of the site. This alteration is in line with recommendations of the previous assessment. Along with strengthening of the vegetated boundaries between the site and the eastern edge for screening, it is considered that development would not be harmful to the local landscape character
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is a medium sized site outside of the Development Framework Boundary and therefore in the countryside. Preservation of the rural countryside character is important.  A key concern here is the woodland that abuts the site in the north and west, development in this location would adversely impact the adjacent settings of woodland and County Wildlife Site. The woodland contributes to the rural landscape character and removal of it to facilitate development here is not advisable. Limited development of the site that reflect the pattern of the existing village and with landscape mitigation may be possible.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	

Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No additional information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Application unlikely to require Natural England consultation. The northern boundary of the site is adjacent to the Woodland Grange CWS, designated for its neutral grassland and areas of traditional orchard. There are no apparent priority habitats within the site; however, there are woodland areas, grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development throughout the site would have a significant adverse impact upon the landscape character and views. It would appear incongruous with the existing settlement pattern, encroach into the landscape, permanent and urbanisation of the open rural countryside. However, with a significant reduction in residential units this harm could be reduced subject to landscape mitigation measures. Typical measures would include the following: development to be restricted to a linear development along Brook End reflecting existing settlement characteristics / pattern, street facing properties, large rear gardens, existing boundary hedgerows and trees retained and protected other than access requirements and a new landscape buffer to be provided to the rear of properties creating a new settlement edge.
