Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 12% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is well enclosed by hedgerows and intermittent trees along the western and southern boundaries. Landscape impacts are largely low in nature. Local views in and out are constrained by existing vegetation offsite. Contextual densities will be required to ensure any development fits in with the surrounding rural village context and allows for buffering vegetation to be utilised. The development must include landscape mitigation.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential development will require assessment of recreational pressure on nearby SSSIs. Any development is likely to require consultation with Natural England. Eversden and Wimpole Woods Special Area of Conservation is 1.4km south-west. The SAC is designed due to the presence of barbastelle bats; impact on this species will need to be considered and a Habitats Regulations Assessment may be required. Boundary habitats including hedgerows and adjacent woodland may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Otherwise, habitats are likely to be of low ecological value. Applications will need to achieve 10% measurable biodiversity net gain either on-site or off-site to meet emerging UK Government and local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site comprises agricultural land, outside of the Development Framework Boundary, but abutting it, and extends north west into the countryside. The site is largely open, it is enclosed by the village in the east, but forms part of the wider open arable setting elsewhere. The site is large and would essentially see development in the countryside, extending the village considerably, moving away from the existing pattern of loose knit housing formed around main roads altering the character of the village. Development of the site should reflect the density and pattern of the existing village with development restricted to areas closest to the roadside. Landscape mitigation measures would be required to successfully integrate development into the rural setting.

Flood Risk Officer Comment 2021	The site is within flood zones 3a or 3b.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is outside of the development framework boundary and would essentially see development in the countryside, disconnected from the village and any other development. This proposal moves away from the existing pattern of loose knit housing formed around main roads and will alter the character of the village significantly.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	A Preliminary Ecological Appraisal has been provided to support the application. This indicates that impacts from increased recreational pressures upon nearby SSSI's is unlikely, due to site containing less than 50 units. However, the assessment acknowledges that further guidance from Natural England will be required. Therefore, there is no change to the assessment scoring. Based on the proposed masterplan, it is now considered likely that a 10% net gain in biodiversity can be achieved.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. A watercourse runs adjacent to the northeast boundary of the site that will require surveys and probable mitigation. There are no apparent priority habitats within the site; however, there are, grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require assessment of recreational pressure on nearby SSSIs. Any development is likely to require consultation with Natural England in relation to Orwell Clunch Pit SSSI. Site is 1.6km from Eversden and Wimpole Woods Special Area of Conservation which is designated for populations of barbastelle bats. Impacts on this species will need to be considered; avoidance/mitigation measures and a Habitats Regulations Assessment may be required. Boundary habitats including drain, hedgerows and trees and adjacent woodland may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Arable habitats are likely to be of low ecological value but may support farmland bird populations. Pond within site may support great crested newt (if suitable).
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is partially in and partially outside of the development framework boundary following the pattern of the neighbouring properties, it also abuts the Conservation Area. The wider landscape setting is largely rural comprising rolling arable parcels of land with large, scattered blocks of woodland and sometimes orchards, south bound is the main village. Preservation of the rural countryside character is important; however, a reduced density development on this site may be appropriate, subject to landscape mitigation measures, specifically to limit views from the countryside looking into the site with additional tree and hedgerow planting to boundaries.

Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. The site is approximately 160m from the Orwell Clunch Pit SSSI. There are no apparent priority habitats within the site; however, there are grasslands, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	-
Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Red
Historic Environment Comments 2021	This site is in the historic core of Orwell. New development has been focussed to the south of High Street. This is a sensitive site, the Grade I Church of St Andrew and the former Rectory form a focal group within the village. Development to the rear of the former rectory with its attendant access has the potential to cause harm to the setting of the church and the conservation area. This harm cannot be reasonably mitigated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Amber
Landscape Comment 2023	Additional information has been submitted in support of the representation but does not include any information which affects the landscape assessment and therefore the RAG rating remains amber.
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is in the countryside and currently has enough screening on site to limit views but could benefit further screening north to limit views of the countryside looking into the site. Preservation of the rural countryside character is important. The site abuts the Protected Village Amenity Area and should retain character and tranquillity of the village. This area of the site could incorporate open space and must not be densified. Density and pattern of new developments must reflect that of the existing village.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No detailed information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. All non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. There are no apparent priority habitats within the site; however, there are grasslands, scrub, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Landscape RAG Assessment 2021	Red
Landscape Comment 2021	An irregular shaped large site outside the development framework and a rural location. Wide views are limited but local and amenity views are high. Development upon this site would have a significant adverse impact to the local landscape character. It would be an encroachment into the landscape, an urbanisation of the rural landscape and permanent. Even with a reduction in residential units with landscape mitigation measures the harm would still be adverse, unacceptable and incongruous with the rural landscape.
