

Accessibility RAG Assessment 2025 - Officer Verified	-
Accessibility Comment 2025	Inadequate accessibility to key local services, transport, and employment opportunities.
Site Access RAG Assessment 2025	-
Site Access Officer Comment 2025	-
Site Access RAG Assessment 2023	Amber
Site Access Officer Comment 2023	Based on the new information provided, the site access assessment remains unchanged. The proposed site is acceptable in principle subject to detailed design.
Site Access RAG Assessment 2021	Amber
Site Access Officer Comment 2021	The proposed site is acceptable in principle subject to detailed design.
Transport and Roads RAG Assessment 2025	-
Transport and Roads Guideline Comments 2025	-
Transport and Roads RAG Assessment 2023	Amber
Transport and Roads Guideline Comments 2023	Based on the additional information provided, the assessment scoring remains amber as the site would be dependent on delivery of the proposed C2C route and potentially East-West rail or equivalent. As part of this, it will need to provide high quality non motorised user and enhanced Passenger Transport routes linking to Cambridge, St Neots and surrounding areas and must be considered in the context of the proposed A428 improvements scheme. The proposal would also require a robust Travel Plan.
Transport and Roads RAG Assessment 2021	Amber
Transport and Roads Guideline Comments 2021	Any potential impact on the functioning of trunk roads and/or local roads could be reasonably mitigated.
Noise, Vibration, Odour and Light Pollution RAG Assessment 2025	-
Noise, Vibration, Odour and Light Pollution Guideline Comments 2025	-
Noise, Vibration, Odour and Light Pollution RAG Assessment 2023	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2023	New information provided has not changed the assessment. The site is capable of being developed to provide healthy internal and external environments in regard to noise / vibration/ odour/ Light Pollution after careful site layout, design and mitigation. Further specific details and assessments will be required as detailed design information becomes available for noise, vibration, odour and lighting.

Noise, Vibration, Odour and Light Pollution RAG Assessment 2021	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2021	The proposed site will be affected by road traffic noise from nearby main roads, but is acceptable in principle subject to appropriate detailed design considerations and mitigation. The site is capable of being developed in regard to vibration/ odour/ light Pollution after careful site layout, design and mitigation.
AQMA RAG Assessment 2025	-
Air Quality Officer Comment 2025	-
AQMA RAG Assessment 2023	Amber
Air Quality Officer Comment 2023	The additional information provided does not significantly affect air quality issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment. The site is located outside an AQMA but there is potential for an impact on AQMA which will require inherent / intrinsic designed in Air Quality mitigation.
AQMA RAG Assessment 2021	Amber
Air Quality Officer Comment 2021	Large residential scheme proposed - potential for AQMA traffic impact without mitigation. Site does not lie within an AQMA.
Contaminated Land RAG Assessment 2025	-
Contaminated Land Officer Comments 2025	-
Contaminated Land RAG Assessment 2023	Amber
Contaminated Land Officer Comments 2023	The additional information provided does not significantly affect environmental health issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment as this is a site previously in agricultural use with the potential for historic contamination and planning conditions will be required.
Contaminated Land RAG Assessment 2021	Amber
Contaminated Land Officer Comments 2021	Previous agricultural land use. Potential for historic contamination, conditions required.
Overall Suitability Score	Red

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 6% lies in a 1 in 30 year event. 3% lies in a 1 in 100 year event. 7% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development upon this site would have a significant adverse impact to the landscape character. it would amalgamate with the new strategic site of Cambourne West with a significant impact upon the rural villages of Caxton and Eltisley and the rural countryside. No buffer would be available between the new strategic site and appear congruous with the local landscape character and an urbanisation of the rural landscape. Even with a significant reduction in residential numbers with landscape mitigation measures the harm would still be significant adverse and permanent.

Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-

Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require consideration of impact on nearby SSSIs. Any developments which could cause air pollution would require consultation with Natural England. Caxton Moats County Wildlife site is adjacent to the south-east boundary (would need to be buffered /protected). Wooded copses, grassland margins, boundary hedgerows and watercourses may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Eastern Brook transects site and scheme would need to be carefully designed to accommodate the watercourse. Arable habitats likely to be of low ecological value, although may support farmland bird populations. Records for great crested newt and badger within site. Buildings and mature trees may support roosting bats (if suitable).
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Whilst the site is largely limited in visibility from the surrounding area, it serves as a buffer between the village of Eltisley and the A428. Development would introduce back land development which is largely uncharacteristic of such a small village. The village includes a number of paddocks and smaller enclosed fields which buffer the settlement from the wider countryside. This characteristic would be partly lost by development of this site and as such would cause harm to the setting of the village.

Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There are no apparent priority habitats within the site; however, there are buildings, grasslands, woodland areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their redline boundaries and will need to find off-site compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2021	The site would adversely impact valued countryside frontages along St. Neots Road as well as introduce significant amounts of development into an area of countryside. Development of the site would harm the NCA/LCA in the local area and incur significant, unacceptable change to the small group village of Eltisley

Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	Eltisley has a highly distinctive village form with a central triangular green and linear development away from the centre. The adjacent part of the village is particularly sensitive in containing the Grade II* church. A large development site such as this must be extremely carefully managed to sustain and respect the village form without detracting. Development on the site must preserve not only the form of the village, and views, but also the experiential qualities around SS John the Baptist and Pandionia.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is a large agricultural field to the north west of the village of Eltisley. It is a rural location, outside the village settlement framework. Development upon this site would have a significant adverse impact upon the landscape character. It would be an encroachment into the countryside, detached from the settlement of Eltisley and an urbanisation of the rural landscape. Even with a reduction in residential numbers and landscape mitigation measures the impact would be still be an adverse impact, incongruous with the local landscape characteristics and permanent.

Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The proposed site would have a significant impact on the linear and small nature of the Caxton settlement. Caxton remains a very linear small village extending along four main cross routes and only just beginning to extend along a fifth, which if continued would change the form and shape of the village into more of a triangular one. This development would begin to set a precedent for that change which is not supported.
