Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (1%). Partly in Flood Zone 3 (5%).. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 3% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development in this location would significantly alter the size, shape and significance of Bourn as a settlement. To some extent, the site is 'separated' from Bourn by a series of large paddocks and estate plots such that a strip of 'countryside buffer' could be achieved, however, the site would constitute a new village on it's own. Any development would need to be separated from Bourn such that it does not appear as a large agglomeration of development.

Biodiversity and Geodiversity Guideline Comments 2023	-

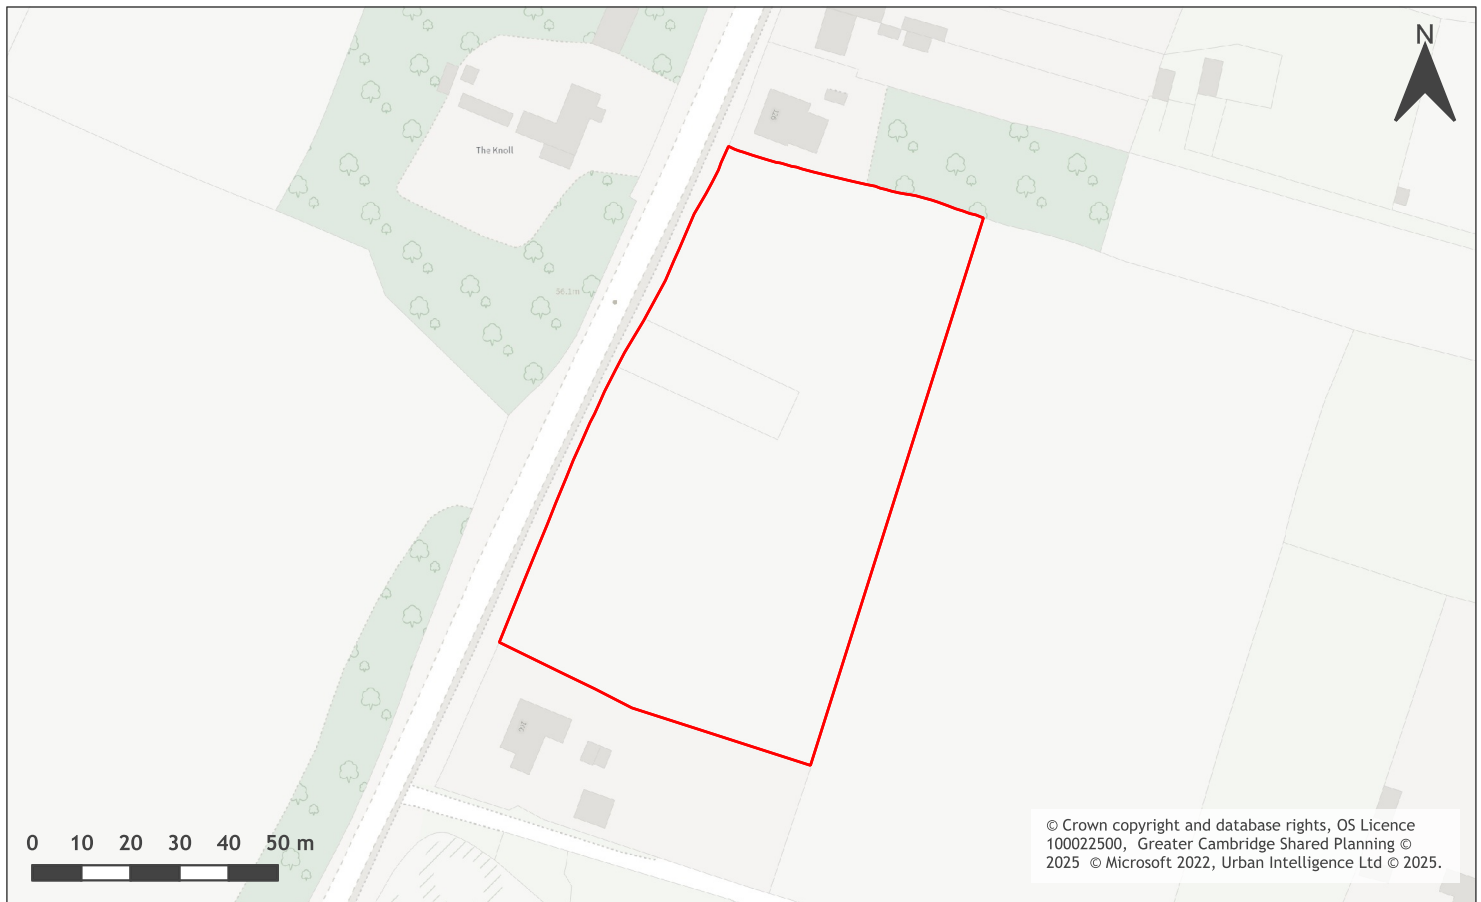

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments would require consideration of recreational impacts on nearby SSSIs. All development would require consultation with Natural England in relation to indirect impacts on nearby SSSIs (closest is 610m). Kingston Amenity Area Local Nature Reserve and Cambridge-Bedford Disused Railway County Wildlife site are within the southern boundary. Any impact on this site would be unacceptable. Amber assumes that a standoff area to this feature and alternative green space can be accommodated. Boundary hedgerows, trees and watercourses including Bourn Brook may qualify as Habitats of Principal Importance/be of high ecological value and support protected and notable species. Bourn Brook in particular would require careful consideration as this bisects the site; there are water vole and kingfisher records for the Brook. Arable habitats likely to be of low ecological value, although may support farmland bird populations. Building may support roosting bats and ponds within 250m may support great crested newt (if suitable).
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber

Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. There are no apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find off-site compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	Located adjacent to and abutting the existing settlement edge to the west of Bourn, the site is part of an existing linear shaped agricultural field. Wide and local views are limited due to surrounding vegetation; however, amenity views are high. Development would have a significant adverse impact upon the settlement character and represent an encroachment into the countryside. However, with a reduced number of residential units this harm could be mitigated with existing boundary planting protected and retained and a significant landscape buffer included to the west of the site.

Biodiversity and Geodiversity Guideline Comments 2023	-

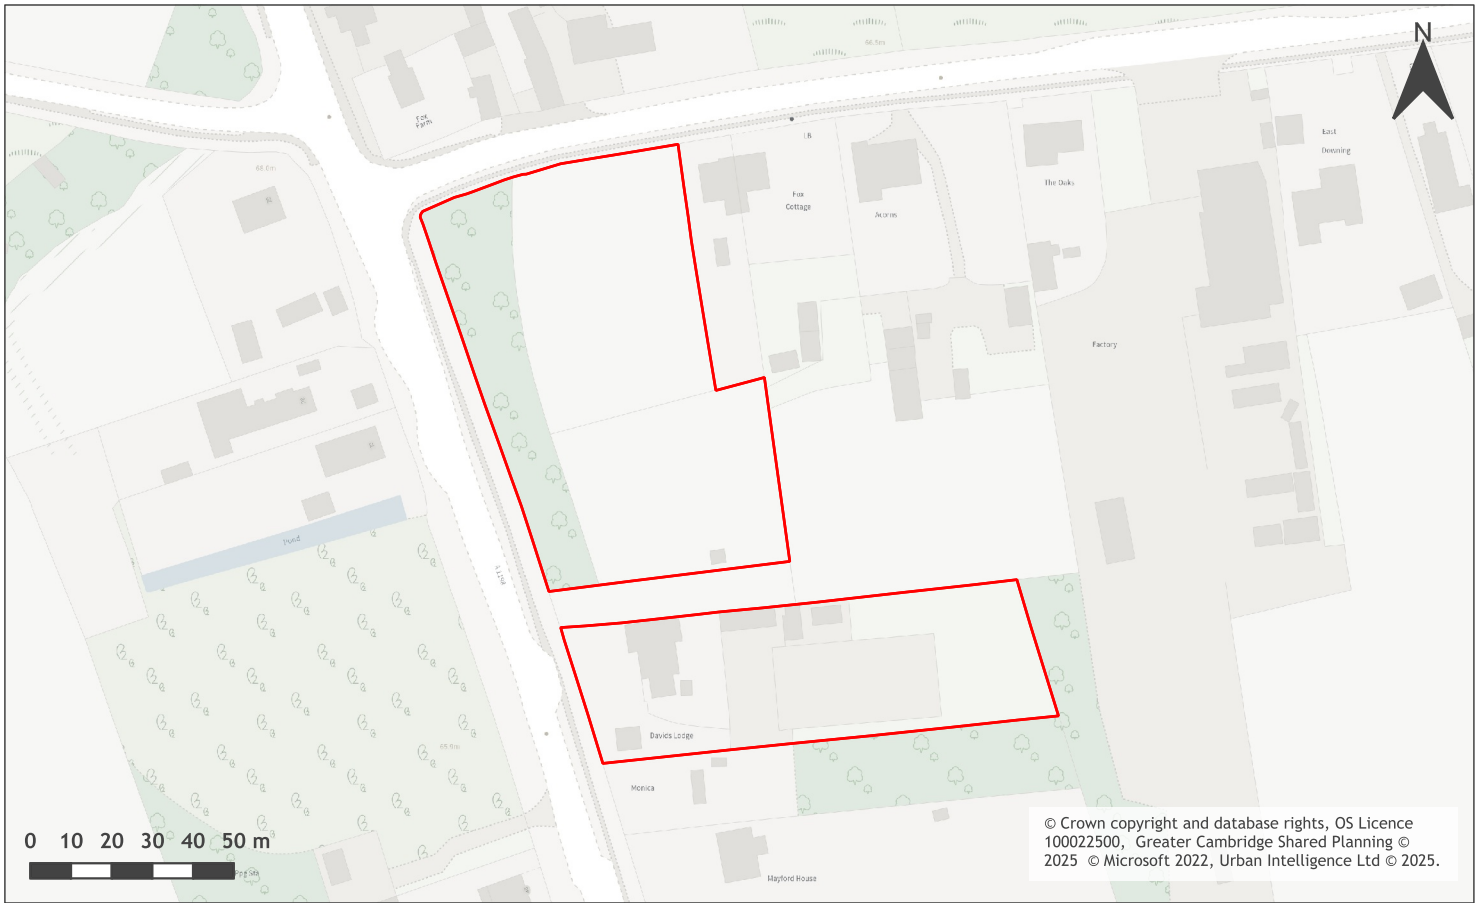

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. The north-western boundary of the site lies adjacent to the Ruddy Lane CWS which is designated for its nationally rare plant and important hedgerows. There are no apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Contaminated Land RAG Assessment 2023	-
Contaminated Land Officer Comments 2023	-
Contaminated Land RAG Assessment 2021	Green
Contaminated Land Officer Comments 2021	No prior history of development.
Overall Suitability Score	Red
Further constraints	-
Agricultural Land Classification Grade 1	0
Agricultural Land Classification Grade 2	100
Agricultural Land Classification Grade 3	0
Agricultural Land Classification Grade 4	0
Agricultural Land Classification Non Agricultural	0
Agricultural Land Classification Urban	0
Source Protection Zone	0
Highways England Zones	A428
Available	-
Is the site controlled by a developer or landowner who has expressed an intention to develop?	The site was submitted by the landowner and/or site promoter who has confirmed that the site is available for development in the timescales indicated.
Are there known legal or ownership impediments to development?	No
Is there planning permission to develop the site?	No relevant recent planning history
When will the site be available for development?	0-5 Years
Available RAG	Green

Achievable	-
Is there a reasonable prospect that the site will be developed?	The land has been promoted by the landowner and or developer and is known to be available for development. The site has a low existing use value and residential development is likely to be economically viable at an appropriate density.
Achievable RAG	Green
Capacity	-
Prevailing Density (weighted) (dwellings per ha)	30
Residential capacity at prevailing density	17
Estimated employment space (m2)	0
Estimated start date	0-5 Years
Estimated annual build-out rate (pa)	40-75
Development completion timescales (years)	0-5 Years
