Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	The site is grass field outside and abutting the settlement framework bordered by gappy hedgerows with a small stream running through the site. Wide views are negligible and local views are filtered through existing gappy hedgerows Development would have a limited impact upon the settlement character. With a sensitive approach inclusive of landscape mitigation measures the site would be enhanced.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Application unlikely to require Natural England consultation. There is a ditch which divides the site in two and will require survey and probable mitigation. There are no other apparent priority habitats within the site; however, there are grasslands, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
