Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Red
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (2%). Partly in Flood Zone 3 (8%).. Surface Water Flooding: 2% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Red
Flood Risk Officer Comment 2021	The site is wholly or largely within Flood Zones 2 or 3 such that it cannot accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace and/or the site is a 'dry island' whereby all potential accesses to the adopted public highway require crossing land that is within Flood Zones 2 or 3.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Views towards this site from the surrounding area are possible, but the conditions of the site with existing development all around it, would allow it to blend in with existing development. The proposals would need to allow for strengthening of the buffers against most boundaries to ensure it extends the village edge character in context. The proposals suggest that all units will be located within the back of the site where the allotments currently are, therefore impact on allotment provision would need to be considered. There are also TPO trees on site.

Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and any residential development above 50 outside of current urban area will require consultation with Natural England. There are no apparent priority habitats within the site; however, there are small buildings, grasslands, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Proposed employment floorspace (m2)	0
Proposed residential capacity	18
Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: None
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	A written response to the previous assessment has been submitted and argues that the site does not have an important countryside frontage and, due to the bowling green, play and recreation facilities, views to and from the countryside are interrupted. Despite the neighbouring recreation and community facilities the site is still an important green space in the village and is typical of the older areas of Fulbourn. Development of 18 new homes would have a negative impact on the landscape character of this part of the Village and therefore the rating remains red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This site is within the village of Fulbourn, located outside and abutting the development framework. The site is also located within the Fulbourn Village Design Guide area and designated as the Home End Character Area, fields with sensitive visual relationship with the village and key outward views from the village. Development upon this site would have a significant adverse impact to the Important Countryside Frontage and the design guidance principles outlined in the Fulbourn Village Design Guide. Even with a significant reduction in residential units the impact would still be significantly adverse.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-

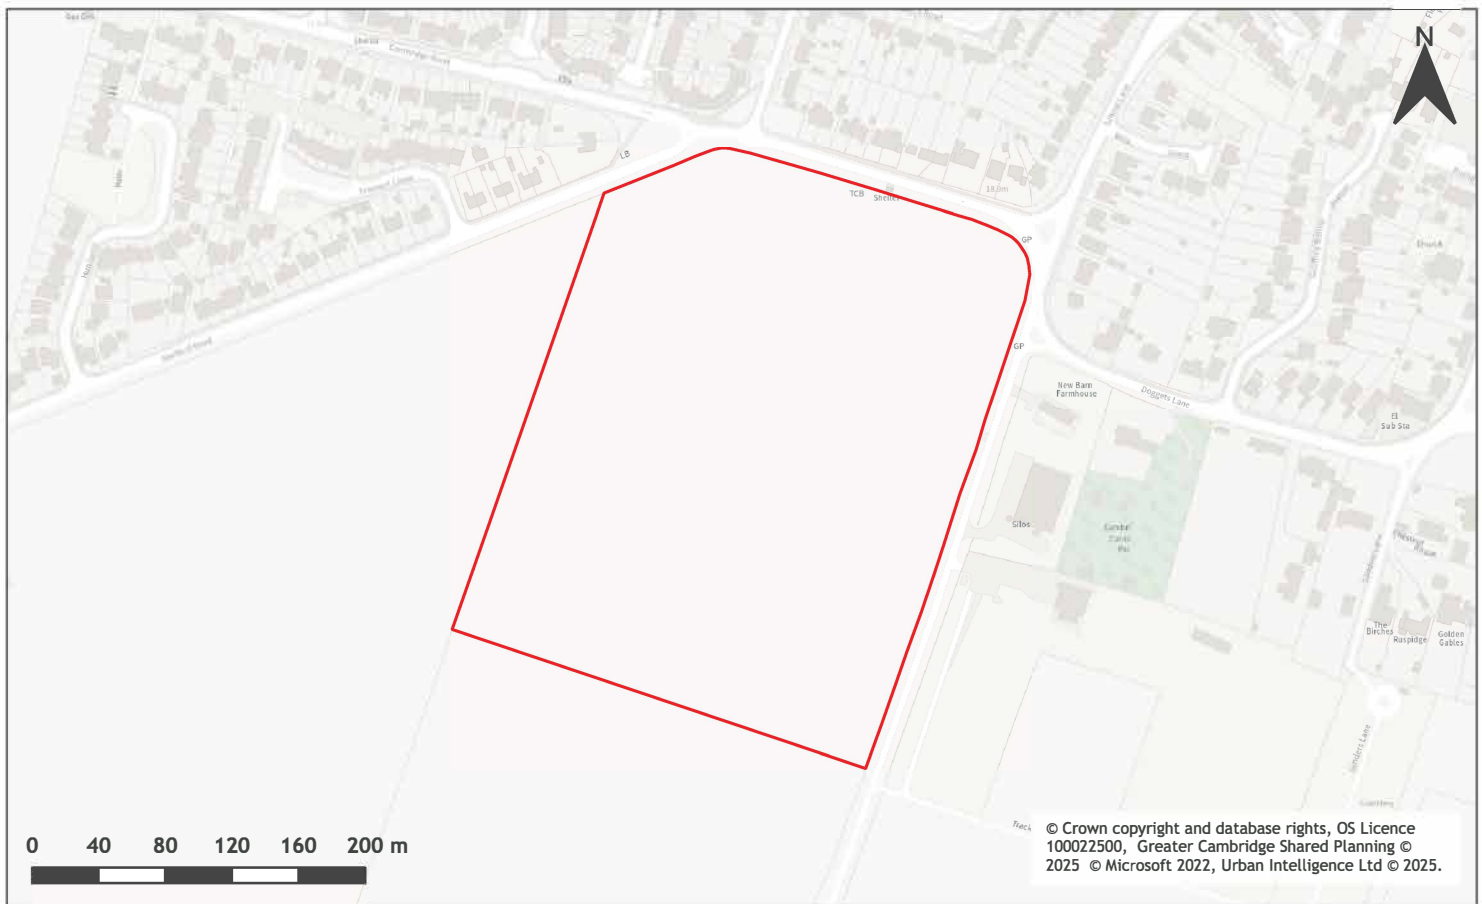

Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	The further supporting information acknowledges that an ecological assessment is required. However, as no additional information has been provided in relation to ecology impacts and mitigation, there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments would require consideration of recreational impacts on nearby SSSIs. Fulbourn Fen SSSI is 500m north-east. Boundary habitats including hedgerows and mature trees may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Otherwise site likely to be of relatively low ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2025	-
Policy Officer Comment 2025	-

Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 1% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Green
Flood Risk Officer Comment 2021	The site is at low risk of flooding (within flood zone 1) and no risk from surface water flooding
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	A written response to the previous assessment has been submitted and questions text in the previous assessment. For clarity, the site is on the southern edge of Fulbourn and is an open field outside the current Development Framework, inside the greenbelt and in a highly visible location in an open, fenland landscape. A masterplan has not been submitted with the proposal. Given the lack of any masterplan documents or technical information to support the proposal, the HELAA assessment remains red as the development is likely to have significant adverse impacts on landscape character and lead to encroachment into the countryside.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development of the site would have a significant adverse impact on the landscape character of the area to the south of village. The development would also impact on key views to and from the village. Even with a reduction in residential units, inclusion of a view gap and landscape mitigation measures development would still have a significant impact to the landscape character and principles outlined within the Village Design Guide.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber

Biodiversity and Geodiversity Officer Comments 2023	The supporting information outlines that the site should be reclassified as 'Green' in terms of biodiversity and geodiversity. However, no detailed information has been provided on whether mitigation will be required to avoid impacts upon nearby SSSI's, albeit it is acknowledged that this will be undertaken at application stage, including consultation with Natural England. As a result, there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require an assessment of recreational impact on nearby SSSIs. Any housing development over 50 dwellings or resulting in discharge to ground or surface water of more than 2m ³ /day would require consultation with Natural England in relation to Fulbourn Fen SSSI 930m east. Boundary hedgerows may qualify as Habitats of Principal Importance/be of high ecological value. Arable habitats likely to be of low ecological value, although may support farmland birds.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Flood Risk RAG Assessment 2025	Green
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: None
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Green
Flood Risk Officer Comment 2021	The site is at low risk of flooding (within flood zone 1) and no risk from surface water flooding
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	A written response to the previous assessment has been submitted which includes a concept masterplan and preliminary landscape and visual appraisal. The concept masterplan includes a more generous green structure and buffer zones than the previous proposal. However, this site is very open and visible and would introduce a significant amount of development to the south of Shelford Road which currently forms a strong boundary to the village and prevents encroachment into the countryside. Therefore the site assessment remains red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site consists of the northern end of a large arable field on the southern edge of Fulbourn, within the Green Belt. The topography is gently undulating and there are extensive views to and from the village in this location. Development of the site would have a significant adverse impact on the landscape character of the area. Development would also impact on key views to and from the village. Even with a reduction in residential units, inclusion of a view gap and landscape mitigation measures, development would have a significant impact on the landscape character.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber

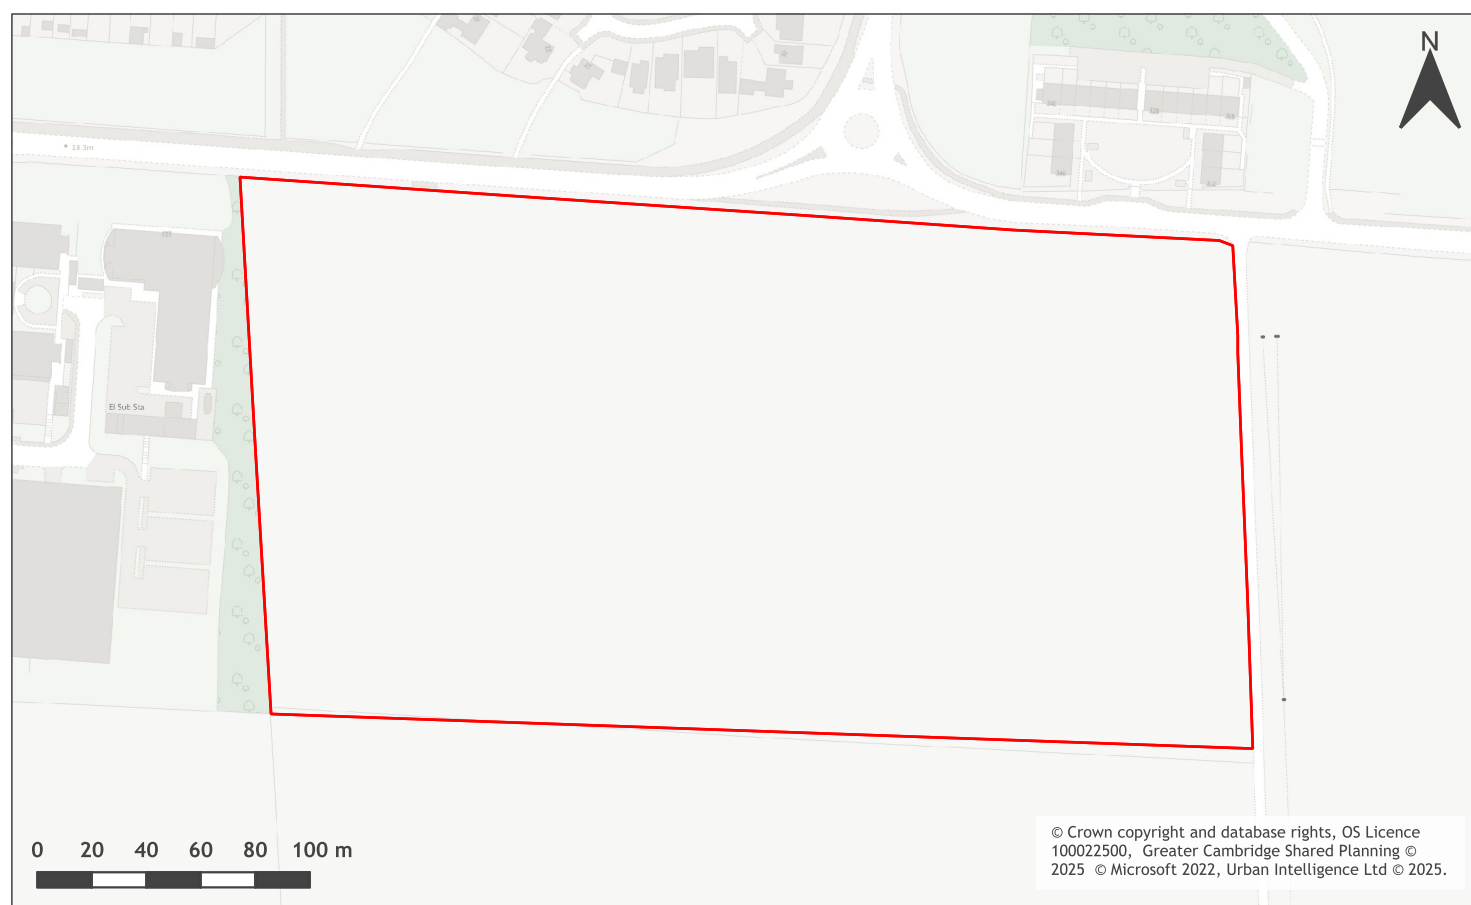

Biodiversity and Geodiversity Officer Comments 2023	No detailed information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require an assessment of recreational impact on nearby SSSIs. Any development resulting in discharge to ground or surface water of more than 5m ³ /day would require consultation with Natural England in relation to Fulbourn Fen SSSI 1.1km east. Boundary hedgerows may qualify as Habitats of Principal Importance/be of high ecological value. Arable habitats likely to be of low ecological value, although may support farmland birds.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Site Access Officer Comment 2021	The proposed site is acceptable in principle subject to detailed design.
Transport and Roads RAG Assessment 2025	-
Transport and Roads Guideline Comments 2025	-
Transport and Roads RAG Assessment 2023	Amber
Transport and Roads Guideline Comments 2023	Based on the new information provided the Amber assessment remains unchanged. The site will need to provide high quality local Non-Motorised User links into the Fulbourn Greenway and passenger transport routes linking to Cambridge. The site will potentially impact on the congested Cambridge Road and junctions further into Cambridge and therefore may require a 'trip budget' approach.
Transport and Roads RAG Assessment 2021	Amber
Transport and Roads Guideline Comments 2021	Any potential impact on the functioning of trunk roads and/or local roads could be reasonably mitigated.
Noise, Vibration, Odour and Light Pollution RAG Assessment 2025	-
Noise, Vibration, Odour and Light Pollution Guideline Comments 2025	-
Noise, Vibration, Odour and Light Pollution RAG Assessment 2023	Amber

Noise, Vibration, Odour and Light Pollution Guideline Comments 2023	New information provided has not changed our assessment. The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation. Detailed site specific assessments will be required for any future planning applications at this location.
Noise, Vibration, Odour and Light Pollution RAG Assessment 2021	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2021	The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation.
AQMA RAG Assessment 2025	-
Air Quality Officer Comment 2025	-
AQMA RAG Assessment 2023	Green
Air Quality Officer Comment 2023	The additional information provided does not significantly affect air quality issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment. The site does not lie within an AQMA and there will be minimal traffic impact on AQMA.
AQMA RAG Assessment 2021	Green
Air Quality Officer Comment 2021	Site does not lie within an AQMA. Minimal traffic impact on AQMA.
Contaminated Land RAG Assessment 2025	-
Contaminated Land Officer Comments 2025	-
Contaminated Land RAG Assessment 2023	Amber
Contaminated Land Officer Comments 2023	The additional information provided does not significantly affect environmental health issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment as this is a site previously in agricultural use with the potential for historic contamination and planning conditions will be required.
Contaminated Land RAG Assessment 2021	Amber
Contaminated Land Officer Comments 2021	Previous agricultural land use. Potential for historic contamination, conditions required.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	Impacts on the local character are fairly high as the site is very visible from Fulbourn Road due the rising topography to a ridge beyond the edges of the site; however, such impacts could be mitigated by allowing for a landscape buffer made up of native shrubs and trees against the south edge of the site. In addition, hedgerow and tree planting against the east edge of the site is required in the event the existing line of leylandii is ever removed. The clause within the current allocation policy remains adequate, although the impact of climate change and biodiversity may demand more land take for landscape.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSIs, LNRs and CWSs, specifically Norman Cement Pits, Cherry Hinton Brook, the Spinney and Coldham's Common and Barnwell East LNR. The site supports priority habitats including woodland and chalk grassland and protected species, including bats and water voles. A considerable proportion of the site is designated as local wildlife site, although currently in poor condition following site clearance. Red assessment given due to potential loss of designated site, although it is acknowledged that the Local Plan Policy 15 seeks to mitigate this loss which has then potential to warrant amber rating.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is a large Green Belt site located to the west of the village of Fulbourn. Development upon this site would have a significant adverse impact upon the landscape character. It would be an encroachment into the landscape, permanent, an urbanisation within the rural landscape and the amalgamation of the village with Capital Park. The development would also impact important landmarks (Windmill), the essential visual gap and key views to the village. Even with a reduction in residential units and landscape mitigation measures, development would still have a significant impact on the landscape character in this very visible location.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (12%). Surface Water Flooding: 3% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	The site area has been reduced to only include the south west part of the site and a brief supporting statement has been submitted. The site is still a very open, visible field outside the main built core of the Village and contributes to the rural setting and character of Fulbourn. The assessment remains red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This site is located to the south east of the village of Fulbourn. Wide views are limited due to boundary vegetation. However local views are filtered and limited. Development upon this site would have a significant adverse impact to the landscape character. it would be permanent, isolated and encroachment into the rural countryside. Even with a reduction in residential numbers the impact would still be harmful to the landscape character.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber

Biodiversity and Geodiversity Officer Comments 2023	The further supporting information acknowledges that an ecological assessment is required. However, as no additional information has been provided in relation to ecology impacts and mitigation, there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments would require consideration of recreational impacts on nearby SSSIs. Fulbourn Fen SSSI is 255m north. Any residential development of more than 50 dwellings would require consultation with Natural England. Boundary habitats including hedgerows, trees and watercourses may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Arable habitats likely to be of low ecological value although may support farmland birds.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Policy RAG Rating 2023	-
Policy Officer Comment 2023	-
Policy RAG Rating 2021	Green
Policy Officer Comments 2021	Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.
Historic Environment RAG Assessment 2025	-
Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	Amber
Historic Environment Comments 2023	The site boundary has been significantly reduced. There are now no heritage assets on or within the immediate setting of the site, and therefore the assessment score can be changed to green.
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	Development of the site could have a detrimental impact on setting of the Conservation Area and listed building but the impact could be reasonably mitigated.
