| Landscape RAG<br>Assessment 2023                            | Red  |
| Landscape Comment 2023                                      | New information has been submitted to support development of the site including a concept masterplan and text in response to the previous landscape assessment. The response does not address the potential impact of new buildings on the landscape character of the site, its rural setting and edge of village location and so the assessment remains red. The Parish Council information doesn not change our assessment HS 07/10/22                               |
| Landscape RAG<br>Assessment 2021                            | -  |
| Landscape Comment 2021                                      | -  |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2025     | Amber  |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2025   | Having considered the updated information, the overall assessment score remains unchanged. A development of the size and scale described would likely meet the criteria set out by Natural England that would raise concerns regarding impacts to statutory protected sites. This includes increases in recreational pressure on nearby statutory protected sites.   |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2025 | Development of the site may have a detrimental impact on a designated site or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.  |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2023     | Amber  |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2023   | Discharge to ground or surface water of more than 5m³ per day would require consultation with Natural England. All new housing developments will also require assessment of increased visitor pressure on nearby SSSIs. The deciduous woodland Priority habitat is present within the site boundary. The arable land on site is likely to contain limited ecological value, but may contain potential to support breeding and wintering populations of farmland birds. |

| Proposed residential capacity                 | 1500-2000                                    |
| Suitability                                   | -  |
| Adopted Development<br>Plan Policies RAG 2025 | Amber  |

| Adopted Development<br>Plan Policies Comment<br>2025        | Development of the site has some potential policy constraints, but these could be overcome through the planning application process.  |
|---|---|
| Flood Risk RAG<br>Assessment 2025                           | Amber   |
| Flood Risk Officer<br>Comment 2025                          | Flood Zones: Partially in Flood Zone 2 (2%). Partially in Flood Zone 3 (4%). Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 4% lies in a 1 in 1000 year event.  |
| Flood Risk RAG<br>Assessment 2023                           | -   |
| Flood Risk Officer<br>Comment 2023                          | -   |
| Flood Risk RAG<br>Assessment 2021                           | Amber   |
| Flood Risk Officer<br>Comment 2021                          | The site is within flood zones 3a or 3b.  |
| Landscape RAG<br>Assessment 2025                            | -   |
| Landscape Comment 2025                                      | -   |
| Landscape RAG<br>Assessment 2023                            | -   |
| Landscape Comment 2023                                      | -   |
| Landscape RAG<br>Assessment 2021                            | Red   |
| Landscape Comment 2021                                      | The site is located to the north of the village of Foxton. Development upon this site would be an encroachment into the countryside and have a significant adverse effect upon the rural local landscape character and existing gateway into the village of Foxton. Minor development could be accommodated to the south east of the site but significant landscape mitigation works would be required to enhance the new village edge.                                     |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2025     | -   |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2025   | -   |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2025 | -   |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2023     | Amber   |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2023   | A Preliminary Ecological Appraisal has been submitted. This identifies that deciduous woodland Priority habitat is present within the site, as well as other habitat with ecological value. The assessment identifies the need for further surveys for Great Crested Newt, bats, Water Vole, Otter, badger and reptiles. The development may still cause visitor pressure on nearby SSSI's. Therefore, the further information has not changed the RAG scoring of the site. |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2023 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.   |

| Biodiversity and<br>Geodiversity RAG<br>Assessment 2021     | Amber  |
|---|--|
| Biodiversity and<br>Geodiversity Officer<br>Comments 2021   | All new housing developments will require assessment of increased visitor pressure on nearby SSSI. Priority habitats within the site include deciduous woodland, with a ditch lying adjacent to the western boundary; however, there are grassland, hedges and wooded boundaries on site that are also likely to have ecological value.  |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2021 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.  |
| Policy RAG Rating 2025 Policy Officer Comment 2025          | -  |
| Policy RAG Rating 2023 Policy Officer Comment 2023          | -  |
| Policy RAG Rating 2021                                      | Green  |
| Policy Officer Comments<br>2021                             | Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.  |
| Historic Environment RAG<br>Assessment 2025                 | -  |
| Historic Environment<br>Comments 2025                       | -  |
| Historic Environment RAG<br>Assessment 2023                 | Amber  |
| Historic Environment<br>Comments 2023                       | The additional information includes an initial Heritage Appraisal which concludes that there is potential for the development of certain areas of the site to cause harm to the significance of heritage assets and care will be required to mitigate this harm. It further states that based on the information available this harm would be less than substantial although it is not possible to define any more precisely the levels of impact at this stage until more detail is available. Given this lack of certainty and the need for mitigation of harm the Amber rating remains appropriate. |
| Historic Environment RAG<br>Assessment 2021                 | Amber  |
| Historic Environment<br>Comments 2021                       | The site is adjacent to a Scheduled Monument site so care needed. Development of the site could have a detrimental impact on a designated or non-designated heritage asset or the setting of a designated or non-designated heritage asset, but the impact could be reasonably mitigated.  |
| Archaeology RAG<br>Assessment 2025                          | -  |
| Archaeology Officer<br>Comment 2025                         | -  |
| Archaeology RAG<br>Assessment 2023                          | Red  |

| Archaeology Officer<br>Comment 2023                        | The additional information provided within the Geophysical Survey aligns with information held on the Historic Environment Record. However the Desk Based Assessment does not take account of limitations of magnetometer survey and does not acknowledge significance of Roman landscape. Continuity with designated assets indicates that assets should be considered under footnote 68. Therefore based on the additional information and the response above, the assessment score remains as red.   |
|--|---|
| Archaeology RAG<br>Assessment 2021                         | Red   |
| Archaeology Officer<br>Comment 2021                        | Contains extensive cropmarks of Roman settlement, part of the same complex as the scheduled Brown Spinney Roman settlement and of demonstrably equivalent status to designated heritage assets  |
| Accessibility RAG<br>Assessment 2025 -<br>Automated        | Amber   |
| Accessibility RAG<br>Assessment 2025 - Officer<br>Verified | -   |
| Accessibility Comment 2025                                 | Adequate accessibility to key local services, transport, and employment opportunities. Proposed development would require accompanying primary school and community centre  |
| Site Access RAG<br>Assessment 2025                         | -   |
| Site Access Officer<br>Comment 2025                        | -   |
| Site Access RAG<br>Assessment 2023                         | Amber   |
| Site Access Officer<br>Comment 2023                        | Based on the new information provided, the site access assessment remains unchanged. The proposed site is acceptable in principle, subject to detailed design at a planning application stage.  |
| Site Access RAG<br>Assessment 2021                         | Amber   |
| Site Access Officer<br>Comment 2021                        | The proposed site is acceptable in principle subject to detailed design.  |
| Transport and Roads RAG<br>Assessment 2025                 | Amber   |
| Transport and Roads<br>Guideline Comments 2025             | Based on the updated information, the overall site score remains unchanged. Site is adjacent to Foxton Station. The site will need to provide high-quality local non-motorised user routes and passenger transport routes linking to Foxton Station and Cambridge, making significant contributions to the delivery of the Melbourn Greenway. Development of the site will be dependent on significant improvements to the A10 and its junction with the M11 including delivery of a bridge (or bridges) over the railway. Will require a robust Travel Plan. |
| Transport and Roads RAG<br>Assessment 2023                 | Amber   |

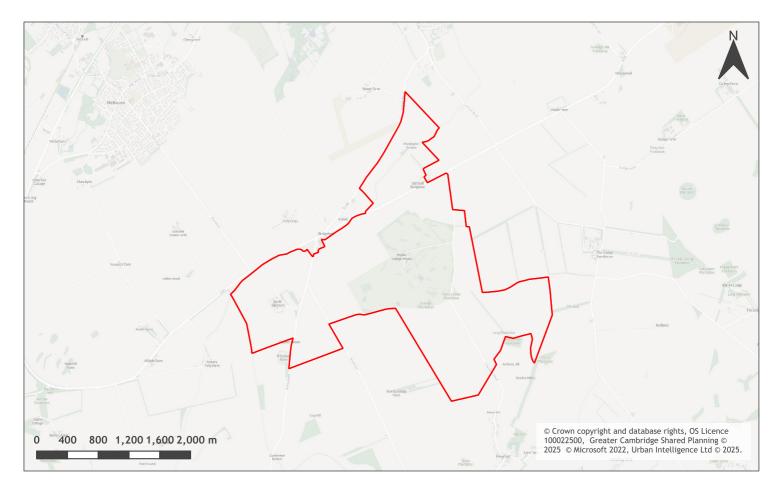

| Transport and Roads<br>Guideline Comments 2023                            | Site is adjacent to Foxton Station. Based on the new information, the assessment score has been amended to amber. The site will need to provide high quality local non motorised user routes and passenger transport routes linking to the station and Cambridge, making significant contributions to the delivery of the Melbourn Greenway. The site will be dependent on significant improvements to the A10 and its junction with the M11 including delivery of a bridge (or bridges) over the railway. Will require a robust Travel Plan. |
|---|---|
| Transport and Roads RAG<br>Assessment 2021                                | Red   |
| Transport and Roads<br>Guideline Comments 2021                            | Transport Assessment and Travel Plan required.  |
| Noise, Vibration, Odour<br>and Light Pollution RAG<br>Assessment 2025     | -   |
| Noise, Vibration, Odour<br>and Light Pollution<br>Guideline Comments 2025 | -   |
| Noise, Vibration, Odour<br>and Light Pollution RAG<br>Assessment 2023     | -   |
| Noise, Vibration, Odour<br>and Light Pollution<br>Guideline Comments 2023 | New information provided has not changed the assessment. Detailed site specific assessments will be required for any future planning applications at this location.   |
| Noise, Vibration, Odour<br>and Light Pollution RAG<br>Assessment 2021     | Amber   |
| Noise, Vibration, Odour<br>and Light Pollution<br>Guideline Comments 2021 | The proposed site will be affected by road traffic noise from nearby main roads and by railway noise (and possibly vibration) but is acceptable in principle subject to appropriate detailed design considerations and mitigation.  |
| AQMA RAG Assessment<br>2025   | -   |
| Air Quality Officer<br>Comment 2025                                       | -   |
| AQMA RAG Assessment 2023  | Amber   |
| Air Quality Officer<br>Comment 2023                                       | The additional information provided does not significantly affect air quality issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment. The site is located outside an AQMA but there is potential for an impact on AQMA which will require inherent / intrinsic designed in Air Quality mitigation.  |
| AQMA RAG Assessment<br>2021   | Amber   |
| Air Quality Officer<br>Comment 2021                                       | Large site and lots of residential units - potential for AQMA traffic impact without mitigation. Site does not lie within an AQMA.  |
| Contaminated Land RAG<br>Assessment 2025                                  | -   |
| Contaminated Land Officer Comments 2025                                   | -   |
| Contaminated Land RAG<br>Assessment 2023                                  | Amber   |

| Contaminated Land<br>Officer Comments 2023  | The additional information provided does not significantly affect environmental health issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment as this is a site previously in use for agriculture and agricultural buildings with the potential for historic contamination and planning conditions will be required. |
|---|--|
| Contaminated Land RAG<br>Assessment 2021  | Amber  |
| Contaminated Land Officer Comments 2021   | Previous agricultural buildings and land use. Potential for historic contamination, conditions required.   |

| Flood Risk Officer<br>Comment 2021                          | -   |
| Landscape RAG<br>Assessment 2025                            | Red   |
| Landscape Comment 2025                                      | Having considered the submitted information, the site has been scored Red. The site is in the Southern Chalk Hills Landscape Character Area, which is a distinctive, high and undulating landscape with steep sided valleys and long views from high points. The site appears to include an area of rare chalkland landscape around Heydon. Development of such a large scale would irreversibly damage the landscape character and views and would not be acceptable in this location.   |
| Landscape RAG<br>Assessment 2023                            | -   |
| Landscape Comment 2023                                      | -   |

| Landscape Comment 2021                                      | -   |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2025     | Amber   |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2025   | Having considered the submitted information, the site has been assessed as Amber. A development of the size and scale described would meet the criteria set out by Natural England that would raise concerns regarding impacts to statutory protected sites. This includes increases in recreational pressure on nearby SSSIs. The proposed site contains priority habitat which will require assessment and possible compensation if removed. Heydon Pit and RSV CWS, which supports at least 6 calcareous indicator species, lies in proximity to the site and would require bespoke mitigation or compensation to remove any risk of harm. |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2025 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.  |

| Policy Officer Comments 2021                                | Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.  |
| Historic Environment RAG<br>Assessment 2025                 | Red  |
| Historic Environment<br>Comments 2025                       | Large site on very open chalk land rising to Heydon village Conservation Area crossed by Bran Ditch Scheduled Monument and historic landscape features. Concept plan indicates substantial harm to Scheduled Monument. High level of harm through loss of important landscape setting to Heydon Conservation Area and multiple Listed Buildings. Harm cannot be mitigated with proposed quantum. Development surrounding grade II listed barn at Heydon Grange in centre of site results in high 'less than substantial harm' from loss of rural setting. Development of the site would cause substantial harm, or severe or significant "Less than substantial harm" to a designated heritage asset or the setting of a designated heritage asset which cannot be reasonably mitigated. |

| Archaeology Officer<br>Comment 2025                        | The site is crossed by the nationally important Bran Ditch, an Anglo-Saxon linear boundary designated as a Scheduled Monument. The site is located in a rich archaeological landscape of prehistoric and Roman date. It is bisected by the Roman road Harcamlow Way, which is nationally important and designated as a scheduled monument. Development would have a detrimental impact on this heritage asset which cannot be mitigated. |

| Accessibility Comment 2025                                 | Inadequate accessibility to key local services, transport, and employment opportunities. Proposed development would require accompanying primary school, secondary school, local centre/employment provision, community centre, health centre and district centre/superstore   |
| Site Access RAG<br>Assessment 2025                         | Amber  |
| Site Access Officer<br>Comment 2025                        | The site has been scored as Amber based on the information submitted for consideration. The site is acceptable in principle, subject to greater detail and consultation. A significant level of infrastructure will be required outside the site boundary to encourage more sustainable transport links.   |
| Site Access RAG<br>Assessment 2023                         | -  |

| Transport and Roads RAG<br>Assessment 2025                 | Amber  |

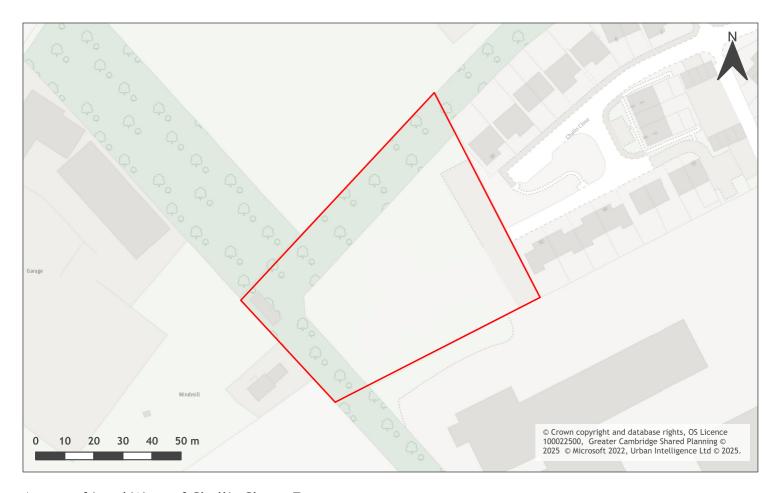

| Transport and Roads<br>Guideline Comments 2025                            | Having considered the submitted information, the site has been scored Amber. The A505 is a heavily trafficked road. The junctions around the site will be heavily impacted by this site. There are no sustainable transport links to existing sustainable transport infrastructure. Given the scale and location of the site, it will mostly be a car-dependent development. Previously, the County Council were considering a scheme along the A505 corridor, which would have assisted in making this site more feasible, but this scheme has been put on hold. This means there has to be more of a focus on non-motorised modes, which could be very difficult to facilitate due to land constraints. |

| Flood Risk RAG<br>Assessment 2021                           | Amber  |
| Flood Risk Officer<br>Comment 2021                          | The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.   |
| Landscape RAG<br>Assessment 2025                            | Amber  |
| Landscape Comment 2025                                      | The proposals outline a change in use from residential to employment. The previously proposed residential use was supported in landscape terms, but we are more cautious in support for an employment use. Conservative height and scale must be adopted within any design to limit impact on neighbouring residential development. Developable area will likely be constrained by existing trees, as well as the additional planting required to buffer a larger building(s) from the surrounding area. |
| Landscape RAG<br>Assessment 2023                            | -  |
| Landscape Comment 2023                                      | -  |
| Landscape RAG<br>Assessment 2021                            | Green  |
| Landscape Comment 2021                                      | Development upon this site would have a negligible impact to the landscape settlement character. Landscape enhancement measures to include the following: the development to reflect the existing settlement rural characteristics, existing boundary planting to be protected and retained and a new landscape buffer to be included to the south of the site.  |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2025     | Amber  |

| Policy Officer Comments 2021                                | Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.  |
| Historic Environment RAG<br>Assessment 2025                 | Amber  |
| Historic Environment<br>Comments 2025                       | Based on the new information provided, the assessment score has not changed. This site sits outside but between two conservation areas and to the west of Challis Close. Any development of more than two storeys has the potential to harm the setting of the conservation areas but a R&D building of an appropriate scale, well screened might be possible. Development of the site could have a detrimental impact on a designated or non-designated heritage asset or the setting of a designated or non-designated heritage asset, but the impact could be reasonably mitigated. |
| Historic Environment RAG<br>Assessment 2023                 | -  |

| Biodiversity and<br>Geodiversity RAG<br>Assessment 2021     | Amber  |

| Biodiversity and<br>Geodiversity Officer<br>Comments 2021   | All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There are no other apparent priority habitats within the site; however, there are grasslands, introduced shrub, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies. |
|---|--|
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2021 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.  |

| Landscape RAG<br>Assessment 2021                            | Red  |
| Landscape Comment 2021                                      | This is medium sized grass field outside and abutting the settlement edge of Foxton. Wide and local views are high with long distant views out towards the south of the site. Development upon this site would be an encroachment into the countryside, it would be permanent and urbanising the rural landscape. Residential units would also be harmful to the existing views both towards and out of the village with a significant impact to the sensitive urban edge as outlined in the neighbourhood plan. |

| Biodiversity and<br>Geodiversity RAG<br>Assessment 2021     | Amber  |
|---|--|
| Biodiversity and<br>Geodiversity Officer<br>Comments 2021   | All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There are no apparent priority habitats within the site; however, there are grasslands, woodland areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies. |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2021 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.  |

| Historic Environment RAG<br>Assessment 2021                 | Amber  |
| Historic Environment<br>Comments 2021                       | This field lies outside the village edge with only a few buildings in the vicinity. Foxton has not been greatly developed beyond its original form and development here would extend the village further west and change rural views into and out of the village. Development of the site could have a detrimental impact on a designated or non-designated heritage asset or the setting of a designated or non-designated heritage asset, but the impact could be reasonably mitigated.                                      |

| Adopted Development<br>Plan Policies Comment<br>2025        | Development of the site has some potential policy constraints, but these could be overcome through the planning application process.  |
|---|---|
| Flood Risk RAG<br>Assessment 2025                           | Amber   |
| Flood Risk Officer<br>Comment 2025                          | Flood Zone: Partly in Flood Zone 2 (3%). Partly in Flood Zone 3 (5%) Surface Water Flooding: None   |
| Flood Risk RAG<br>Assessment 2023                           | -   |
| Flood Risk Officer<br>Comment 2023                          | -   |
| Flood Risk RAG<br>Assessment 2021                           | Amber   |
| Flood Risk Officer<br>Comment 2021                          | The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.  |
| Landscape RAG<br>Assessment 2025                            | -   |
| Landscape Comment 2025                                      | -   |
| Landscape RAG<br>Assessment 2023                            | -   |
| Landscape Comment 2023                                      | -   |
| Landscape RAG<br>Assessment 2021                            | Red   |
| Landscape Comment 2021                                      | Development upon this site would be an encroachment into the countryside, it would be permanent and urbanising the rural landscape. Wide and local views are high with long distant views out towards the south of the site. Residential units would also be harmful to the existing views both towards and out of the village with a significant impact to the sensitive urban edge as outlined in the neighbourhood plan. There is little scope to mitigate these effects without causing adverse harm to the existing landscape character. |

|---|---|
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2023 | -   |
| Biodiversity and<br>Geodiversity RAG<br>Assessment 2021     | Amber   |
| Biodiversity and<br>Geodiversity Officer<br>Comments 2021   | All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There is a watercourse that runs adjacent to the southwest corner of the site that will require surveys and probable mitigation. There are no apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies. |
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2021 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.   |

| Flood Risk RAG<br>Assessment 2025                           | Amber   |
| Flood Risk Officer<br>Comment 2025                          | Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 16% lies in a 1 in 1000 year event  |
| Flood Risk RAG<br>Assessment 2023                           | -   |
| Flood Risk Officer<br>Comment 2023                          | -   |
| Flood Risk RAG<br>Assessment 2021                           | Green   |
| Flood Risk Officer<br>Comment 2021                          | The site is at low risk of flooding (within flood zone 1) and no risk from surface water flooding   |
| Landscape RAG<br>Assessment 2025                            | -   |

| Landscape Comment 2023                                      | -   |
| Landscape RAG<br>Assessment 2021                            | Green   |
| Landscape Comment 2021                                      | The site is overgrown with scrub and tree planting with an existing allotment to the west. Wide views are negligible and local views are high. Development upon this site would be an enhancement and be consistent with the existing settlement pattern. |

| Biodiversity and<br>Geodiversity RAG<br>Assessment 2021     | Amber   |

| Biodiversity and<br>Geodiversity Officer<br>Comments 2021   | All new housing developments will require assessment of increased visitor pressure on nearby SSSI. The site is comprised predominately of woodland, removal of this woodland is unlikely to be compensated (biodiversity net gain) within the red line boundary of the site; therefore applicants will need to provide biodiversity net gain through offsite compensation. All wooded areas are likely to hold ecological value. |
|---|--|
| Biodiversity and<br>Geodiversity Guideline<br>Comments 2021 | Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.  |
