Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (20%). Partly in Flood Zone 3 (57%) Surface Water Flooding: 27% lies in a 1 in 30 year event. 14% lies in a 1 in 100 year event.
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zones 3a or 3b.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Amber
Landscape Comment 2023	Additional supporting information has been submitted including a landscape and visual appraisal. However, the landscape and visual appraisal is the same as the original submission and so the RAG rating remains amber.
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site, within the Green Belt, is an irregular shaped agricultural field, outside and abutting the development framework which forms an area of rural separation between the edge of the village and buildings to the north. Wide views are limited due to vegetation and local views are limited. Amenity views to the south are high. Development upon the site would have an adverse effect on the landscape character of the area; however, with careful design it may be possible to mitigate landscape impacts.

Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is a very good example of the Western Claylands character type. It encompasses long views from the crests of rolling hillsides. The changing of this countryside view out to Madingley Rise and its windmill would be a significant loss to the city. Development on this site would unalterably damage the character of the area as well as cause harmful impact on the Setting of the City. The site also currently provides a buffer between the developed area of Cambridge and the hinterland beyond the motorways. The site is an important countryside feature allowing Cambridge to remain closely connected to it's rural hinterland.

Biodiversity and Geodiversity Guideline Comments 2023	-
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Any agricultural/industrial development that could cause air pollution, all general combustion, waste, and composting treatments will require consultation with Natural England. The site is 150m north of Madingley Wood SSSI cited for being an ancient woodland and for its educational value to the University of Cambridge. There are several areas of deciduous woodland that are listed on the 2014 National Forest Inventory and are likely to be classified as priority habitat. This includes a large central block of 7.4 ha. There are numerous watercourses and drains within the boundary that will require survey and probable mitigation. There are no other apparent priority habitats within the site; however, there are buildings, grasslands, woodland areas, ditches, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Historic Environment Comments 2025	-
Historic Environment RAG Assessment 2023	-
Historic Environment Comments 2023	-
Historic Environment RAG Assessment 2021	Red
Historic Environment Comments 2021	The site is clearly visible from the American cemetery which sits on higher ground and development on the lower half of the site would potentially harm the setting of the Grade I registered park and garden and the Grade II* memorial. To the east Madingley Hall also sits on higher ground and in the winter this site is again very visible from the Hall and within the Grade II* registered garden. Development across the whole site would potentially harm the setting of these heritage assets. It might be possible to develop the northern section of land.

Is the site controlled by a developer or landowner who has expressed an intention to develop?	The site is an existing Local Plan Allocation and confirmation of its availability has been confirmed in the Greater Cambridge Housing Trajectory and Five year Housing Land Supply
Are there known legal or ownership impediments to development?	No
Is there planning permission to develop the site?	Planning permission granted for mixed use development of 1,593 homes and supporting uses on adjoining site in Cambridge. The site in south Cambridgeshire has yet to gain planning permission.
When will the site be available for development?	0-5 Years
Available RAG	Green
Achievable	
Is there a reasonable prospect that the site will be developed?	Land is known to be available, evidenced through the published housing trajectory. The site has a low existing use value and development is likely to be economically viable at an appropriate density.
Achievable RAG	Green

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is a medium sized isolated grass field located to the south west of the village of Girton. Wide and local views are limited due to road infrastructure and boundary planting. Development upon this site would have an adverse impact to the landscape character. It would be an encroachment into the countryside, permanent, urbanising the rural landscape and harmful to the village gateway or approach. The development would also be isolated and appear incongruous to the settlement of Girton.

Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 2% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	The new information includes a representation response. It is considered that the rebuttal does not alter the original assessment. The site is seeking to develop a piece of existing farmland in the greenbelt. This section of greenbelt between Histon and Girton is valued strongly for it's purpose of maintaining separation between Histon, Girton and Cambridge. Development, however small, would undermine this valued rural character.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Wide and local views are limited due to boundary planting and low-lying topography. However, amenity views are high particularly from the south west of the site. Development upon this site would have a significant adverse impact to the rural landscape character. A significantly reduced development with landscape measures could be acceptable.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Green
