

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 5% lies in a 1 in 30 year event. 3% lies in a 1 in 100 year event. 13% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This location it is seen as being within the developed area although in a very rural location. The site could be developed with a reduction in the number of dwellings and with due consideration of its village edge and rural location. If the density were to be lowered and appropriate edge treatment to soften views and integrate any development into the surroundings were to be incorporated some development could be achieved.

Biodiversity and Geodiversity RAG Assessment 2023	-
Biodiversity and Geodiversity Officer Comments 2023	-
Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Green
Biodiversity and Geodiversity Officer Comments 2021	Application unlikely to require Natural England consultation. There is a ditch that runs adjacent to the northern boundary that will require surveys and possible mitigation. There are no other apparent priority habitats within the site; however, there are grasslands, scrub, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site would not have a detrimental impact on any designated site, or those with a regional or local protection.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 4% lies in a 1 in 30 year event. 4% lies in a 1 in 100 year event. 4% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional information provided submits a reduction in unit numbers and describes a particular placement for the units. However, this reduction does not alter the original assessment in relation to urbanisation of the rural countryside and conflicts with allocation for open space (SC/1).
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site lies to the north of the village outside and abutting the development framework. Development upon this site would have a significant adverse impact upon the landscape character. Residential units would be permanent, urbanise the rural landscape and be an encroachment into the countryside. Development of the site would also conflict with its allocation for open space (SC/1) and remove the openness of the land and the provision of outdoor recreation activities.
Biodiversity and Geodiversity RAG Assessment 2025	-
Biodiversity and Geodiversity Officer Comments 2025	-
Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No additional information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.

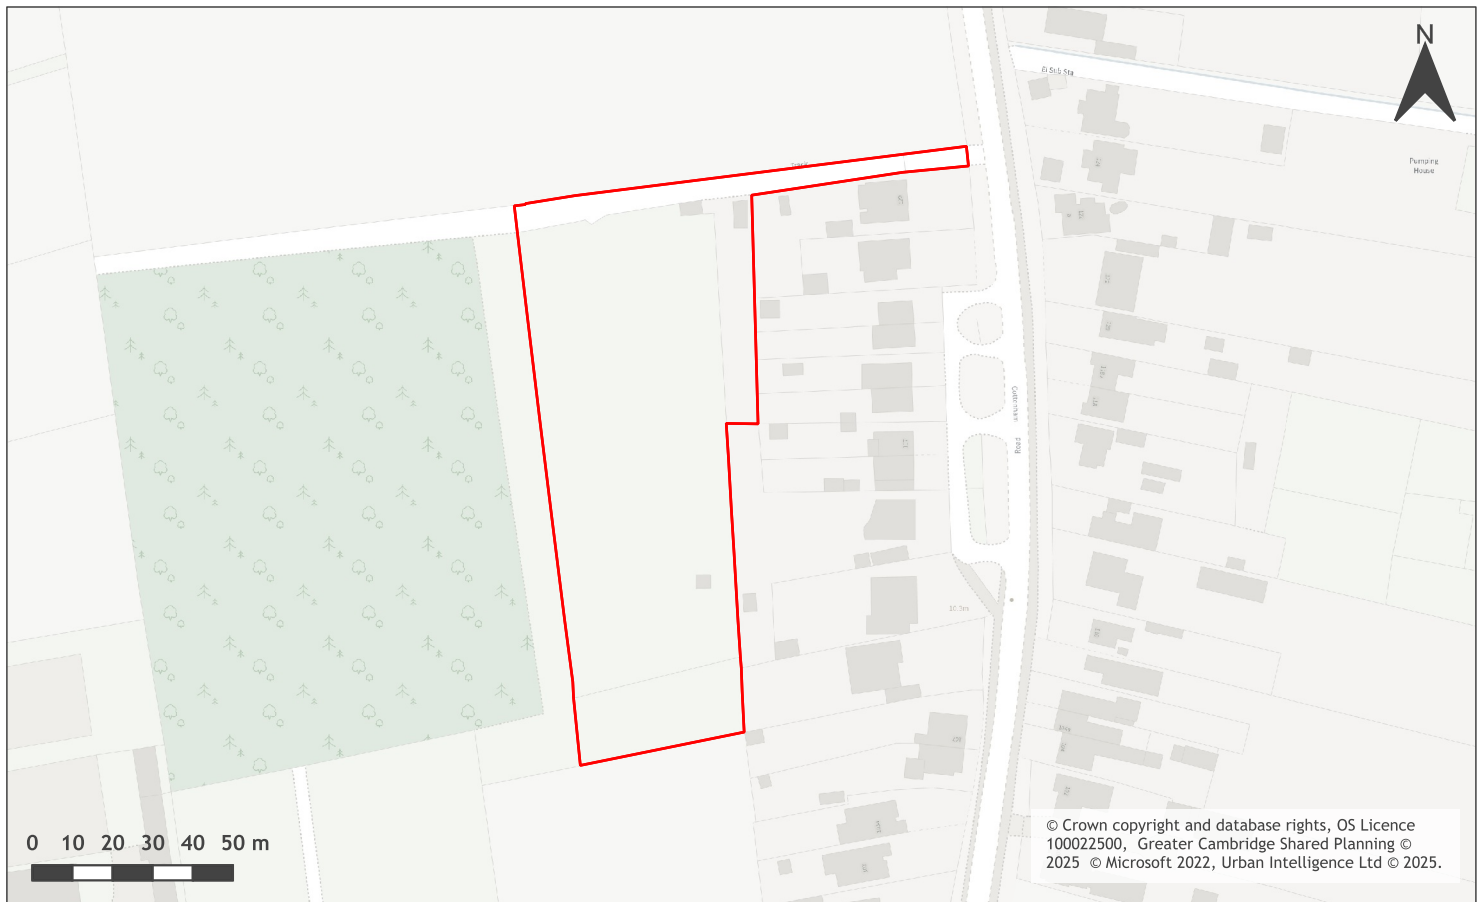

Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Discharge of water/waste above 20m ³ per day to ground or surface water likely to require consultation with Natural England. Boundary hedgerows may qualify as Habitats of Principal Importance/priority habitat and be of high ecological value. Otherwise, site likely to be of low ecological value (arable). Farmland bird populations may be present.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development upon this site would have a significant adverse impact upon the Protected Village Amenity Area and the designated important green space. Development would erode the green buffer between this end of Impington and the A14/City of Cambridge. In addition, development would further degrade of the separation, and amalgamate Impington with Cambridge. Even with a reduction in residential units the harm would still be significantly adverse.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Consultation with Natural England would be required for more than 50 dwellings or industry/infrastructure over 1000m ² . Histon Road SSSI is 115m south-east but is designated for geological reasons so impact may be unlikely. Arable habitats are likely to be of low ecological value, although may support farmland bird populations. Boundary watercourses, hedgerows and grassland margins may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species such as water vole. All applications should achieve 10% net biodiversity gain to meet the NPPF, Local Plan Policy NH/4 and emerging local and UK Government Policy.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
