Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zones: Site is wholly within Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 2% lies in a 1 in 100 year event. 5% lies in a 1 in 1000 year event.
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	Red
Landscape Comment 2025	New information has been submitted in relation to the proposed new busway, which roughly dissects the site north to south. The presence of the busway does not alter previous landscape concerns greatly and arguably further degrades the rural character of the site. Previous findings continue to apply and the development of the site is likely to cause harm to the openness of the landscape character and the purposes of the Green Belt.
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional comments question the previous assessment scoring. In landscape terms, any development of the site would cause harm to the local openness, character and views in this area, which would be unalterable and not possible to mitigate against. Therefore there is no change to the original assessment score.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	A large site located to the north west of the village of Milton. Wide and local views are high due to lack of intervening vegetation and built form. Development upon this site would have a significant adverse impact to the local landscape character. It would be an encroachment into the landscape, isolated, an urbanisation of the rural landscape and permanent. Even with a reduction in residential units with landscape mitigation measures the harm would still be adverse, unacceptable and incongruous with the rural landscape.

Biodiversity and Geodiversity Officer Comments 2025	-

Biodiversity and Geodiversity Guideline Comments 2025	-
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No additional information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Any discharge of water, or liquid waste of more than 20m <sup>3</sup> to ground a day may require Natural England consultation. There are no apparent priority habitats within the site; however, there are buildings, grasslands, woodland areas, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Archaeology RAG Assessment 2025	Amber
Archaeology Officer Comment 2025	The assessment for for the site remains unchanged. Archaeological investigations would be necessary in advance of construction.
Archaeology RAG Assessment 2023	Amber

Archaeology Officer Comment 2023	Based on the additional information provided, the assessment for the site remains unchanged as Amber as there is evidence of archaeology in the area that will require further investigation.
Archaeology RAG Assessment 2021	Amber
Archaeology Officer Comment 2021	Located in a landscape of extensive Iron Age and Roman archaeology with finds of Roman date recorded in the area.
Accessibility RAG Assessment 2025 - Automated	Amber
Accessibility RAG Assessment 2025 - Officer Verified	-

Site Access RAG Assessment 2021	Amber
Site Access Officer Comment 2021	The proposed site is acceptable in principle subject to detailed design.
Transport and Roads RAG Assessment 2025	Amber
Transport and Roads Guideline Comments 2025	Based on the additional information submitted, the overall assessment score has not changed. Any potential impact on the functioning of trunk roads and/or local roads could be reasonably mitigated. The development would need to provide mitigation to reduce the vehicle impact and encourage active travel and public transport use. A Transport Assessment and a Travel Plan will be required. A vehicle trip budget for this allocation is expected to be required.

Noise, Vibration, Odour and Light Pollution RAG Assessment 2023	-
Noise, Vibration, Odour and Light Pollution Guideline Comments 2023	New information provided has not changed the assessment. The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation. Detailed site specific assessments will be required for any future planning applications at this location.
Noise, Vibration, Odour and Light Pollution RAG Assessment 2021	Amber
Noise, Vibration, Odour and Light Pollution Guideline Comments 2021	The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation. The site is capable of being developed to provide healthy internal and external environments in regard to noise / vibration/ odour/ Light Pollution after careful site layout, design and mitigation.
AQMA RAG Assessment 2025	-
Air Quality Officer Comment 2025	-
AQMA RAG Assessment 2023	Amber
Air Quality Officer Comment 2023	The additional information provided does not significantly affect air quality issues or mitigation. Therefore the assessment of the site remains unchanged since the original assessment. The site is located outside an AQMA but there is potential for an impact on AQMA which will require inherent / intrinsic designed in Air Quality mitigation.
AQMA RAG Assessment 2021	Amber

Landscape Comment 2021	The site is college of West Anglia and arable land, located to the north of Milton. Generally, the site exhibits a mixed character with containment in the south and west. The site is outside of the Development Framework Boundary and therefore in the countryside. Preservation of the rural countryside character is important, but the site would essentially see development in the countryside. Residential development is inappropriate here as the site is isolated from the village.

Landscape Comment 2021	The site lies within the Green Belt and consists of 2no. agricultural fields to the rear of linear residential properties fronting onto High Street. Open agricultural fields lie to the west of the site. It is a rural location with wide and local views limited due to the low lying nature of land and intervening vegetation. Development would have a significant adverse impact upon the settlement character. It would be an encroachment in the landscape and an urbanisation of the rural countryside. However, development may be possible with a reduction in residential units and landscape mitigation measures to reduce this harm.
