Category of site	Integrating homes and jobs - Southern cluster
Category of settlement	Within or adjacent to Rural Centre
Current use(s)	-
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	35
Suitability	-
Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (8%). Partly in Flood Zone 3 (81%).. Surface Water Flooding: 17% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	Development on this site would essentially form a new village edge and encroach closer to the railway line and further out into the countryside. Preservation of the rural countryside character is important.. Development here would see a loss of the current allotments and potential reprovision at the north end of the site. The site of the current allotments would be transformed into housing and the land between the two proposed to be public open space/parkland. New developments must reflect the form, scale and proportions of the existing vernacular buildings of the area.
Biodiversity and Geodiversity RAG Assessment 2025	-

Biodiversity and Geodiversity Guideline Comments 2023	-

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. The eastern boundary of the site lies adjacent to the Hobson Brook (award watercourse) which will require survey and probable mitigation. I am aware of a population of water voles in the area and that there has been a recent outbreak of a schedule 9 invasive species within the brook at this location which will require assessment. There are no apparent priority habitats within the site; however, there are grasslands, woodland areas, ditches, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Adopted Development Plan Policies RAG 2025	Amber

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 9% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Residential development upon this site would have a significant adverse impact to the settlement character. It would be urbanisation of the rural landscape and an encroachment into the countryside. Development would amalgamate both Granham's Farm with the settlement of Great Shelford and remove the existing small field typically found on the edge of the village. Even with a reduction in residential units harm would still be significant adverse and incongruous with the rural characteristics of Great Shelford.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development throughout the site would have a significant adverse impact to the local landscape character, views and visual amenity. However, with a reduction in residential units this harm would be reduced subject to the following landscape mitigation measures: development to reflect existing linear street facing pattern, long thin rear gardens to be included, existing boundary planting to be protected and retained other than access requirements, new landscape buffer planting to be included to the east of the site to reflect existing settlement edge and a rural approach to be encouraged.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. There are no apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	This is medium sized site located to the north east of the village of Great Shelford. Other than 2no. residential plots and Hinton Road to the east the site is bordered by large open agricultural fields. Wide and local views of the site are high but internal views are negligible due to mature vegetative cover within the site. Development upon this site would have a significant adverse impact to the landscape character. It would be inconsistent with the existing landscape character and an urbanisation of the rural countryside.

Flood Risk Officer Comment 2021	The site is within flood zones 3a or 3b.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development as proposed on the illustrative masterplan would significantly harm the rural character of both areas. Limited development could be achieved but not on the scale illustrated on either area. The visibility and sensitivity of both sites means that any limited development would need to be sympathetic to the rural character and the setting of the city. Due to the open and highly visibility nature of both areas there would be significant adverse impact on the setting of the City with such a large combined development as proposed and that it could not be adequately mitigated in such sensitive locations.

Noise, Vibration, Odour and Light Pollution Guideline Comments 2023	-
Noise, Vibration, Odour and Light Pollution RAG Assessment 2021	Amber

Noise, Vibration, Odour and Light Pollution Guideline Comments 2021	This site is cross boundary but is mainly located within SCDC. It is not appropriate for City to fully comment / recommend on suitability for allocation. The submission is two site (a) to West of Cambridge Road. Traffic noise from M11, Hauxton Road and Addenbrookes Road (A1301). (b) to East of Cambridge Road / Railway) Railway noise to West and industrial / commercial / business type operational noise from to the North. High levels of traffic noise will influence the suitability and deliverability of site and density proposed. Road traffic noise levels, arising from the use of the M11, are very high. Residential development immediately adjacent to the M11 and Hauxton road would be extremely challenging. The proposed site will be affected by road traffic noise from nearby main roads but is acceptable in principle subject to appropriate detailed design considerations and mitigation.

Adopted Development Plan Policies Comment 2025	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (42%). Partly in Flood Zone 3 (3%).. Surface Water Flooding: 5% lies in a 1 in 100 year event. 18% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	-
Flood Risk Officer Comment 2023	-
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2025	-
Landscape Comment 2025	-
Landscape RAG Assessment 2023	-
Landscape Comment 2023	-
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	There are limited views to and from the site, and it is enclosed by existing development and mature vegetation. It is likely that with suitable landscape mitigation, the site could be developed without significant adverse visual landscape impacts. However, the land forms part of the transitional area of enclosed fields between the village and the countryside beyond Hobson's Brook. Great Shelford has developed into a long ribbon development along Cambridge road with much of the transitional land degraded by encroaching development. It is considered, where pockets of this back land remains, it should be retained and not developed.
