

Land at Mill Lane Sawston

A map of Land at Mill Lane Sawston

Site information	-
Site ID	115101
HELAA Site ID	40052
Suitable Site Area (ha)	1.48
Ward/Parish	Sawston
Greenfield or Previously Developed?	Greenfield
Category of site	Dispersal: Villages / Transport Corridor
Category of settlement	Within or adjacent to group village
Current use(s)	Agricultural Land / Building
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	20-30
Suitability	-
Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	Amber
Flood Risk Officer Comment 2026	Flood Zones: 7% is in Flood Zone 2. Climate Change: 100% is in a climate-change-adjusted flood zone. Surface Water: 20% lies in a 1-in-1,000-year event. 11% lies in a 1-in-100-year event. 4% lies in a 1-in-30-year event.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood zone: Partly in Flood Zone 2 (7%); Surface water flooding: 4% lies in a 1 in 30 year event, 11% lies in a 1 in 100 year event and 20% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	Red
Landscape Comment 2025	Having considered the additional information submitted, the assessment score has not changed. The site falls outside the development framework and is adjacent to an allotment site. Development of the site would not enhance the local Landscape Character Area, which is eroded and fragmented by transport corridors and suburbanisation of large commuter villages like Sawston. The allotment provides a characteristic edge to the village allowing a soft and buffered transition between the more built-up areas of the village and the A1301. Previous comments continue to apply.
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Red

Landscape Comment 2021	The site is a rectangular field adjacent to an allotment site. The boundaries are made up of hedges, hedgerows and intermittent trees and other vegetation but poorly maintained and gappy in places. The southern and western boundaries are also formed by the presence of a drainage ditch. This site is beyond and separated from the village framework resulting it being isolated. Development would encroach into the countryside and remove some of the landscape buffer between the village and the A1301 Sawston bypass. It would also result in the loss of openness of the adjoining Green Belt and adversely affect the setting of the village.
Biodiversity and Geodiversity RAG Assessment 2026	
Biodiversity and Geodiversity Officer Comments 2026	
Biodiversity and Geodiversity Guideline Comments 2026	
Biodiversity and Geodiversity RAG Assessment 2025	
Biodiversity and Geodiversity Officer Comments 2025	
Biodiversity and Geodiversity Guideline Comments 2025	
Biodiversity and Geodiversity RAG Assessment 2023	
Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. Any residential developments above 50 outside of current urban area will require consultation with Natural England. There are no apparent priority habitats within the site; however, there are grasslands, hedges and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2026	Green
Policy Officer Comment 2026	The site is wholly outside of protected open space. Detrimental open space impacts are not anticipated.
Policy RAG Rating 2025	

Policy Officer Comment 2025	
Policy RAG Rating 2023	
Policy Officer Comment 2023	
Policy RAG Rating 2021	Green
Policy Officer Comments 2021	Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.

Flood Risk Officer Comment 2021	
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	Red
Landscape Comment 2025	The site is separated from the Stapleford by a significant area of undeveloped land. The character of the landscape is somewhat suburban with industrial influences and an eroding landscape character. Development would be resisted from a landscape perspective due to its location in the countryside, impacts on the Green Belt and the separation between settlements, and the likelihood of further erosion of landscape character.

Landscape Comment 2023	
Landscape RAG Assessment 2021	
Landscape Comment 2021	
Biodiversity and Geodiversity RAG Assessment 2026	
Biodiversity and Geodiversity Officer Comments 2026	
Biodiversity and Geodiversity Guideline Comments 2026	

Biodiversity and Geodiversity RAG Assessment 2025	Amber
Biodiversity and Geodiversity Officer Comments 2025	A development of the size and scale described would likely meet the criteria set out by Natural England that would raise concerns regarding impacts to statutory protected sites. This includes increases in recreational pressure on nearby SSSIs. The proposed site may contain priority habitat which will require assessment and possible compensation if removed. Where there is a likelihood of protected and priority species being impacted a full assessment must be undertaken. A development of the type described would likely be eligible for mandatory biodiversity net gains.
Biodiversity and Geodiversity Guideline Comments 2025	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2023

Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	Amber
Flood Risk Officer Comment 2026	Flood Zones: Site is wholly within Flood Zone 1. Climate Change: Site is not within a climate-change-adjusted flood zone. Surface Water: 4% lies in a 1-in-1,000-year event. 1% lies in a 1-in-100-year event.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 100 year event. 3% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional information submitted is a response to the original assessments. Any proposed development within this site is outside development framework, and would cause harm to the local openness, character and views in this area, which would be unalterable and not possible to mitigate against.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development upon this site would have a significant adverse impact to the wide and local landscape character and views. It would be an encroachment into the landscape, permanent, remove open agricultural fields and an urbanisation of the rural countryside. Even with a reduction in units the harm with landscape mitigation measures the harm would still be adverse and unacceptable

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site comprises a piece of agricultural land with several small-large buildings on hardstanding outside of the Development Framework Boundary, and therefore in the countryside. Despite efforts in boundary treatment the site is has an extremely open and exposed allowing open views from all areas. Preservation of the rural countryside character is important and so boundary treatment will be important. Development in this location must be appropriate to density and pattern of the existing village, the proposed number of units is likely to detract from the existing village character. Landscape mitigation required to enhance the village gateway.

Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	Amber
Flood Risk Officer Comment 2026	Flood Zones: Site is wholly within Flood Zone 1. Climate Change: Site is not within a climate-change-adjusted flood zone. Surface Water: 2% lies in a 1-in-1,000-year event. 1% lies in a 1-in-30-year event.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 2% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional information provided submits a reduced red line area for development and a reduction in units from 1148 to 300. However previous assessment of proposed development causing irreparable encroachment on the countryside and a negative impact on the landscape character remains, therefore there is no change to the assessment scoring.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development upon this site would have a significant adverse impact upon the wide and local landscape character and views. It would be an encroachment into the countryside, permanent and an urbanisation of the open rural landscape. Even with a reduction in residential units with landscape mitigation measures the harm would be significantly adverse and unacceptable.

Policy Officer Comments 2021	
Historic Environment RAG Assessment 2026	

Historic Environment Comments 2026	
Historic Environment RAG Assessment 2025	
Historic Environment Comments 2025	
Historic Environment RAG Assessment 2023	Amber
Historic Environment Comments 2023	There are no listed buildings or conservation areas in or near the site. Whittlesford Conservation Area is over 400m to the south while Sawston Conservation Area is some distance to the east and neither are likely to be affected. The Borough Hill scheduled ancient monument is immediately to the south, partly overlapping the site boundary. Development on the scheduled monument would be unachievable although suitable landscaping and mitigation might be possible to develop other parts of the site.

Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	200 to 230
Suitability	-
Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	Red
Flood Risk Officer Comment 2026	Flood Zones: Site is wholly within Flood Zone 1. Climate Change: 5% is in a climate-change-adjusted flood zone. Surface Water: 1% lies in a 1-in-1,000-year event. 1% lies in a 1-in-100-year event. 1% lies in a 1-in-30-year event. The site is a dry island.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 1% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2026	Red
Landscape Comment 2026	Having considered the updated information submitted, the site assessment remains the same. The site plays an important role in buffering the settlement of Sawston from the intrusiveness of the A1301. Development would introduce urbanisation into the rural character of the fields and put pressure on the TPO tree group.
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	New information questions the previous landscape assessment but does not alter the initial proposal. Therefore it does not address our concerns regarding encroachment into the countryside, urbanisation of the rural landscape, the increase in the settlement and potential harm to the protected trees. The RAG rating remains red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	Development throughout this site would have a significant adverse impact upon the landscape character. It would be an encroachment into the countryside, urbanisation of the rural landscape and a significant increase in the settlement. The site is dissected north to south by a band of trees covered by a Tree Preservation Order.

Historic Environment RAG Assessment 2025	
Historic Environment Comments 2025	
Historic Environment RAG Assessment 2023	
Historic Environment Comments 2023	
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	There are no major heritage concerns with development of this site, however development would need to pay special regard to the setting of the Grade II village college and its surroundings to the east of the site.
Archaeology RAG Assessment 2026	Amber
Archaeology Officer Comment 2026	The site is located in a landscape of Iron Age activity, including the nationally important Borough Hill to the east. Associated features are likely to be present in the proposal area. Field evaluation would be necessary in support of a planning application to determine the suitability of the site for development.
Archaeology RAG Assessment 2025	
Archaeology Officer Comment 2025	
Archaeology RAG Assessment 2023	
Archaeology Officer Comment 2023	
Archaeology RAG Assessment 2021	Amber
Archaeology Officer Comment 2021	Located on the western edge of the historic settlement with archaeology of medieval date recorded to the north.
Accessibility RAG Assessment	Green
Accessibility Comment	Good accessibility to key local services, transport, and employment opportunities.
Site Access RAG Assessment 2026	Amber
Site Access Officer Comment 2026	Based on the additional information, the site assessment has been amended to amber as two points of access can be achieved. The proposed site is acceptable in principle subject to detailed design. The removal of the turning head on White Field Way to facilitate the emergency access is not recommended.
Site Access RAG Assessment 2025	
Site Access Officer Comment 2025	

Site Access RAG Assessment 2023	Red
Site Access Officer Comment 2023	Based on the new information provided, the site access assessment remains unchanged. The proposed site is unacceptable. White Field Way is not an adopted public highway and therefore two points of access cannot be guaranteed as required.
Site Access RAG Assessment 2021	Red
Site Access Officer Comment 2021	If over 100 dwellings two points of access are required to accord with the advice of the Cambridgeshire Fire and Rescue.
Transport and Roads RAG Assessment 2026	Amber
Transport and Roads Guideline Comments 2026	Having considered the updated site information, the site assessment rating remains amber. Any potential impact on the functioning of trunk roads and/or local roads will need to be mitigated. The development would need to provide mitigation to reduce the vehicle impact and encourage active travel and public transport use.

Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	
Flood Risk Officer Comment 2026	
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Partly in Flood Zone 2 (16%). Surface Water Flooding: 1% lies in a 1 in 30 year event. 2% lies in a 1 in 100 year event. 15% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site comprises several small parcels including Sawston riding school. Whilst there is existing built development on part of the site, development of the wider parcel would encroach into the countryside and remove some of the landscape buffer between the village and the A1301 Sawston bypass. It would also result in the loss of openness in the Green Belt and adversely affect the setting of the village.

Biodiversity and Geodiversity RAG Assessment 2023	
Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Residential developments of 50+ dwellings would require consultation with Natural England. Boundary hedgerows/trees may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Grassland quality will need to be assessed, but may be of low ecological value. Buildings may support roosting bats (if suitable).
Biodiversity and Geodiversity Guideline Comments 2021	Development throughout the whole site would have a significant adverse impact to the landscape character and views. It would be an encroachment into the countryside, permanent, removal of rural paddocks and an urbanisation of the rural landscape. However, with a significant reduction in units the harm could be reduced subject to landscape mitigation measures, including a new landscape buffer provided upon its western boundary to reflect existing settlement edge and new development to be offset from the western boundary to integrate into the landscape.

Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	This site comprises a builders yard with a large area of parking, which is within the development framework, and extended land to the rear beyond the framework. Limited development, responding to the pattern and density of surrounding development and focused on the road frontage where there is existing development, with strengthened boundaries, would avoid significant landscape impacts. However, the wider site would encroach into the countryside and remove some of the landscape buffer between the village and the A1301 Sawston bypass. It would also result in the loss of openness of the adjoining Green Belt in the southern part of the site and surrounding land and adversely affect the setting of the village.

A map of Land south of Babraham Road, Sawston (H/1(c))

Site information	-
Site ID	115912
HELAA Site ID	OS030
Suitable Site Area (ha)	12.08
Ward/Parish	Sawston
Greenfield or Previously Developed?	Greenfield
Category of site	Integrating homes and jobs - Southern cluster
Category of settlement	Within or adjacent to Rural Centre
Current use(s)	
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	260
Suitability	-
Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	Amber
Flood Risk Officer Comment 2026	Flood Zones: Site is wholly within Flood Zone 1. Climate Change: Site is not within a climate-change-adjusted flood zone. Surface Water: 3% lies in a 1-in-1,000-year event.
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 3% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site contains areas at high, or medium risk from surface water flooding and/or the site contains some land in Flood Zones 2 and/or 3 but there is sufficient land in Flood Zone 1 to accommodate at least 5 additional dwellings or an increase of 500 square metres of employment floorspace.

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is within the Development Framework Boundary abutting the Greenbelt. The site is contained in the south east but otherwise has a very open, rural character. Residential development is appropriate here given the adjacent site use. The proposed number of units for new development must respond well to the local context and character such as the existing form and scale of similar development within the village. The character of the landscape setting should be respected and key views to and from the village retained.
Biodiversity and Geodiversity RAG Assessment 2026

Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	Residential developments would require an assessment of recreational impact on nearby SSSIs. Consultation with Natural England required for any residential development over 50 units and industrial development over 1000m ² . Site is 310m from Sawston Meadows SSSI. Alternative green space likely to be required. Arable habitats like to be low ecological value although may support farmland bird populations. Boundary trees and hedgerows are may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. All applications should achieve 10% net biodiversity gain to meet the NPPF, Local Plan Policy NH/4 and emerging local and UK Government Policy.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2026	Green
Policy Officer Comment 2026	The site is wholly outside of protected open space. Detrimental open space impacts are not anticipated.
Policy RAG Rating 2025	
Policy Officer Comment 2025	
Policy RAG Rating 2023	
Policy Officer Comment 2023	
Policy RAG Rating 2021	Green
Policy Officer Comments 2021	Site is not on protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.

Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	
Flood Risk Officer Comment 2021	
Landscape RAG Assessment 2026	Green
Landscape Comment 2026	The site is an industrial area between the Railway and River Cam on the river plain north west of Sawston. Existing woodland and tree belts provide screening and enclosure to the western edges of the site but the north and east are more open and exposed. The site is suitable for redevelopment providing the landscape character, context and existing woodland are carefully integrated into the design and the design mitigates impact on the surrounding landscape and views.

Landscape Comment 2021	
Biodiversity and Geodiversity RAG Assessment 2026	Amber

Biodiversity and Geodiversity Officer Comments 2026	All new large non-residential developments outside of current settlements and in excess of 0.2 ha, or any discharge of water or liquid waste to ground or stream, and any infrastructure such as warehousing/industry over 1000 m ² floorspace will require Natural England consultation. Dernford Fen SSSI lies approximately 50 m to the north of the site, it has been cited for being a rare example of rough fen and carr, with a diverse range of habitats and plant assemblages. An area to the north of the SSSI is designated as a County Wildlife Site for its grasslands. There are no apparent priority habitats within the site; however, there are buildings, grasslands, woodland areas, hedges, and wooded boundaries on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2026	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape RAG Assessment 2026	Red
Landscape Comment 2026	Due to the very large scale of the development proposal and the potential harm to landscape character, this site has been granted a red rating. Consent has previously been granted for the central part of the site, but not for the proposed extended site. It may be possible to integrate development with the surrounding landscape context on some parts of the site, but not to the extent currently proposed as this would have significant adverse impacts on the landscape which cannot be mitigated given the extent and quantum of development proposed.

Policy RAG Rating 2023	
Policy Officer Comment 2023	
Policy RAG Rating 2021	
Policy Officer Comments 2021	
Historic Environment RAG Assessment 2026	Red

Historic Environment Comments 2026	Within the site is a scheduled monument (Borough Hill). The southern boundary of the site overlaps with or is within 100m of the Whittlesford Conservation Area. The southern part of the site is also within 100m of several listed buildings, including the Grade I listed church. Development of the northern aspect of the site for commercial/employment space could have a detrimental impact on a designated or non-designated heritage asset or the setting of a designated or non-designated heritage asset, but the impact could be reasonably mitigated with appropriate densities, positioning, landscaping buffering etc. However, developing the southern portion of the site with 300+ residential dwellings would cause substantial harm, or severe or significant “less than substantial harm” to the setting of designated heritage assets (grade I listed church and the conservation area) which cannot be reasonably mitigated. Therefore, the site has been given an overall rating of red.

Historic Environment RAG Assessment 2023	
Historic Environment Comments 2023	
Historic Environment RAG Assessment 2021	
Historic Environment Comments 2021	
Archaeology RAG Assessment 2026	Amber
Archaeology Officer Comment 2026	The site is located in a landscape of high archaeological significance with extensive prehistoric archaeology likely. Central to the site is the nationally significant Iron Age site, Borough Hill, which is designated as a Scheduled Monument. Extensive archaeological investigation, including desk based assessment, non intrusive and intrusive surveys, will be necessary to inform the suitability of the site for development. These works should be undertaken to inform any planning application. Measures to protect and enhance Borough Hill should also be brought forward as part of any application for development.
