Suitable Site Area (ha)	2.48
Ward/Parish	Barrington
Greenfield or Previously Developed?	Greenfield
Category of site	Dispersal: Villages
Category of settlement	Within or adjacent to group village
Current use(s)	Agricultural Land / Building
Proposed development	Residential
Proposed employment floorspace (m2)	0
Proposed residential capacity	30-50
Suitability	-
Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	
Flood Risk Officer Comment 2026	
Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood zone: Wholly in Flood Zone 1; Surface water flooding: 8% lies in a 1 in 1000 year event, 1% lies in a 1 in 100 year event and 1% lies in a 1 in 30 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	
Flood Risk Officer Comment 2021	
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	Amber
Landscape Comment 2025	This relatively flat, low-lying parcel of land is outside the Barrington development framework but well contained by existing built form to the south, west and partially to the east. There are a limited number of sensitive visual receptors within the surrounding countryside. The site could accommodate some development with mitigation informed by a landscape and visual impact assessment.
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	
Landscape Comment 2021	
Biodiversity and Geodiversity RAG Assessment 2026	
Biodiversity and Geodiversity Officer Comments 2026	
Biodiversity and Geodiversity Guideline Comments 2026	
Biodiversity and Geodiversity RAG Assessment 2025	Amber

Biodiversity and Geodiversity Officer Comments 2025	A development of the size and scale described would likely meet the criteria set out by Natural England that would raise concerns regarding impacts to statutory protected sites. This includes increases in recreational pressure on nearby SSSIs.
Biodiversity and Geodiversity Guideline Comments 2025	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2023	
Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023

Biodiversity and Geodiversity Guideline Comments 2021	
Policy RAG Rating 2026	
Policy Officer Comment 2026	
Policy RAG Rating 2025	Green
Policy Officer Comment 2025	Site is not on a protected open space designation. Any impact of the proposed development could be reasonably mitigated or compensated.
Policy RAG Rating 2023	
Policy Officer Comment 2023	
Policy RAG Rating 2021	
Policy Officer Comments 2021	
Historic Environment RAG Assessment 2026	
Historic Environment Comments 2026	
Historic Environment RAG Assessment 2025	Amber
Historic Environment Comments 2025	There is a listed building at the northern edge of the site and several more near the church and village centre. Development could adversely affect the setting of these heritage assets but it is likely mitigation would be possible through layout and landscaping.
Historic Environment RAG Assessment 2023	
Historic Environment Comments 2023	

Historic Environment RAG Assessment 2021	
Historic Environment Comments 2021	
Archaeology RAG Assessment 2026	
Archaeology Officer Comment 2026	
Archaeology RAG Assessment 2025	Amber
Archaeology Officer Comment 2025	The site is located in the historic core of the village, with potential for medieval archaeology. Archaeological investigations would be necessary in advance of development.
Archaeology RAG Assessment 2023	
Archaeology Officer Comment 2023	
Archaeology RAG Assessment 2021	
Archaeology Officer Comment 2021	
Accessibility RAG Assessment	Amber
Accessibility Comment	Adequate accessibility to key local services, transport, and employment opportunities.
Site Access RAG Assessment 2026	
Site Access Officer Comment 2026	
Site Access RAG Assessment 2025	Red
Site Access Officer Comment 2025	The site has been scored as Red. The proposed access into the site from the adopted public highway is unsuitable to serve the number of units proposed.
Site Access RAG Assessment 2023	
Site Access Officer Comment 2023	
Site Access RAG Assessment 2021

Adopted Development Plan Policies RAG 2026	Amber

Adopted Development Plan Policies Comment 2026	Development of the site has some potential policy constraints, but these could be overcome through the planning application process.
Flood Risk RAG Assessment 2026	
Flood Risk Officer Comment 2026	
Flood Risk RAG Assessment 2025	Green
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: None
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Green
Flood Risk Officer Comment 2021	The site is at low risk of flooding (within flood zone 1) and no risk from surface water flooding
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is in in a transitional landscape between Claylands and Chalklands characters. The landscape impacts of the development are likely to be minimal due to the existing level of enclosure of the site; however, the development should be mindful of its very rural location and surrounding and consider reducing the numbers to retain the context of it surrounding character and to ensure adequate space for a suitable vegetation boundary treatment.
Biodiversity and Geodiversity RAG Assessment 2026	
Biodiversity and Geodiversity Officer Comments 2026

Landscape Comment 2023	
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is somewhat exposed as an outlier to the village. Views towards it from Cambridge Road are very open and available over the low and gappy hedges. The site is equally visible from Comberton Road and parts of Washpit Lane before intervening topography screens the view. The gap presented to the High Street by this narrow portion of green belt, allows for a significant view from the field gate.

Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI. All non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. There is a waterbody running adjacent to the northern boundary that may require mitigation. There are no apparent priority habitats within the site; however, there are grasslands which, given the underlying geology, could be calcareous in nature. Hedges and wooded boundaries are also on site that are likely to have ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site is an area of pasture between the Church and Leete's Lane within the Green Belt. The High Street frontage of the site is designated an Important Countryside Frontage. All boundaries are heavily vegetated with the only significant gap found at the field gate in the centre of the frontage. From this point, the view is narrowed to the gap at the rear of the site to countryside beyond, which is rolling farm and woodlands. The impact of development on this site would be low due to its enclosed nature; however, the impact on the Important Countryside Frontage would be very high and could not be mitigated.

Landscape Comment 2023	
Landscape RAG Assessment 2021	Green
Landscape Comment 2021	The site is a large field with its western edge completely open against the High Street. The site is suitable for development due to its contained area and presence on the High Street. The impact on landscape character is low to negligible. If development took place landscape mitigation would be required along all boundaries with sufficient space for large trees and at an appropriate width to filter views from the surrounding landscape or from neighbours.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential development will require assessment of recreational pressure on nearby SSSIs. Any development is likely to require consultation with Natural England. Eversden and Wimpole Woods Special Area of Conservation is 1.4km south-west. The SAC is designed due to the presence of barbastelle bats; impact on this species will need to be considered and a Habitats Regulations Assessment may be required. Boundary habitats including hedgerows and adjacent woodland may qualify as Habitats of Principal Importance/be of high ecological value and support protected or notable species. Otherwise, habitats are likely to be of low ecological value. Applications will need to achieve 10% measurable biodiversity net gain either on-site or off-site to meet emerging UK Government and local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site comprises agricultural land, outside of the Development Framework Boundary, but abutting it, and extends north west into the countryside. The site is largely open, it is enclosed by the village in the east, but forms part of the wider open arable setting elsewhere. The site is large and would essentially see development in the countryside, extending the village considerably, moving away from the existing pattern of loose knit housing formed around main roads altering the character of the village. Development of the site should reflect the density and pattern of the existing village with development restricted to areas closest to the roadside. Landscape mitigation measures would be required to successfully integrate development into the rural setting.

Biodiversity and Geodiversity RAG Assessment 2023	
Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All planning applications outside of existing settlement boundaries would require consultation with Natural England. All residential developments will require consideration of recreational impacts on nearby SSSIs. Site is 2.4km from Eversden and Wimpole Woods SAC, designated for rare barbastelle bat populations. Habitats within the scheme unlikely to be important for this species but lighting should be carefully designed and enhancement opportunities sought. Boundary habitats may qualify as Habitats of Principal Importance/be of ecological value. Arable habitats likely to be of low ecological value although may support farmland bird populations.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Biodiversity and Geodiversity RAG Assessment 2025	
Biodiversity and Geodiversity Officer Comments 2025	

Biodiversity and Geodiversity Guideline Comments 2025	
Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	A Preliminary Ecological Appraisal has been provided to support the application. This indicates that impacts from increased recreational pressures upon nearby SSSI's is unlikely, due to site containing less than 50 units. However, the assessment acknowledges that further guidance from Natural England will be required. Therefore, there is no change to the assessment scoring. Based on the proposed masterplan, it is now considered likely that a 10% net gain in biodiversity can be achieved.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. A watercourse runs adjacent to the northeast boundary of the site that will require surveys and probable mitigation. There are no apparent priority habitats within the site; however, there are, grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2021	The site is partially in and partially outside of the development framework boundary following the pattern of the neighbouring properties, it also abuts the Conservation Area. The wider landscape setting is largely rural comprising rolling arable parcels of land with large, scattered blocks of woodland and sometimes orchards, south bound is the main village. Preservation of the rural countryside character is important; however, a reduced density development on this site may be appropriate, subject to landscape mitigation measures, specifically to limit views from the countryside looking into the site with additional tree and hedgerow planting to boundaries.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. The site is approximately 160m from the Orwell Clunch Pit SSSI. There are no apparent priority habitats within the site; however, there are grasslands, wooded areas, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Historic Environment RAG Assessment 2023	
Historic Environment Comments 2023	
Historic Environment RAG Assessment 2021	Red
Historic Environment Comments 2021	This site is in the historic core of Orwell. New development has been focussed to the south of High Street. This is a sensitive site, the Grade I Church of St Andrew and the former Rectory form a focal group within the village. Development to the rear of the former rectory with its attendant access has the potential to cause harm to the setting of the church and the conservation area. This harm cannot be reasonably mitigated.

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Amber
Landscape Comment 2023	Additional information has been submitted in support of the representation but does not include any information which affects the landscape assessment and therefore the RAG rating remains amber.
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site is in the countryside and currently has enough screening on site to limit views but could benefit further screening north to limit views of the countryside looking into the site. Preservation of the rural countryside character is important. The site abuts the Protected Village Amenity Area and should retain character and tranquillity of the village. This area of the site could incorporate open space and must not be densified. Density and pattern of new developments must reflect that of the existing village.

Historic Environment Comments 2025	

Historic Environment RAG Assessment 2023	Amber
Historic Environment Comments 2023	Taking into consideration the additional information that has been submitted and the assessment made of the significance of the site, the RAG rating should be changed to amber. Development of the site could have an impact on the local heritage assets, but that impact could be reasonably mitigated.
Historic Environment RAG Assessment 2021	Red
Historic Environment Comments 2021	This field is on the western most edge of Orwell and is lined to by linear residential development to the south and to the north. The development context is detached houses with large gardens. The west of the site lies opposite a Grade I registered park and garden. Some small level of development might be possible, but it would need to respect the residential context and the views into and out of the Wimpole Hall site.

Landscape Comment 2021	An irregular shaped large site outside the development framework and a rural location. Wide views are limited but local and amenity views are high. Development upon this site would have a significant adverse impact to the local landscape character. It would be an encroachment into the landscape, an urbanisation of the rural landscape and permanent. Even with a reduction in residential units with landscape mitigation measures the harm would still be adverse, unacceptable and incongruous with the rural landscape.

Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site comprises three separate parcels of arable land. The parcels are referred to as Parcel A, Parcel B and Parcel C. The site would essentially see development in the countryside for all three sites. Preservation of the rural countryside is important. However, the development logically extends along High Street and Barrington Road creating a linear settlement pattern which is consistent with the form along the northern part of Orwell. Parcel C may be harmful as it extends back farthest. Landscape mitigation required. Development not to adversely impact woodland adjacent to parcels B and C.

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require an assessment of recreational impacts on nearby SSSIs. All planning applications will require consultation with Natural England. The site is 2.3km from Eversden and Wimpole Woods Special Area of Conservation, designated for rare barbastelle bat populations. Impacts on this species will need to be considered e.g. retention of woodland boundary/trees and sensitive lighting scheme. Woodland and boundary hedgerows may qualify as Habitats of Principal Importance/be of high ecological value and support protected and notable species. Grassland quality will also need to be assessed, but may be agricultural grassland of low ecological value.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	Development throughout the site would have a significant adverse impact to the wide and local landscape character and views. It would be an encroachment into the countryside, permanent, isolated, an urbanisation of the rural landscape and the removal of an existing open agricultural field. However, with the removal of residential units and restricting commercial development to the east the harm would be reduced subject to landscape mitigation works. Typical measures would include the following: existing boundary planting to be protected, retained and strengthened

Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All residential developments will require an assessment of recreational impacts on nearby SSSIs. All planning applications will require consultation with Natural England. The site is 2.6km from Eversden and Wimpole Woods Special Area of Conservation, designated for rare barbastelle bat populations. Impacts on this species will need to be considered e.g. retention of woodland and trees and sensitive lighting scheme. Woodland and boundary hedgerows may qualify as Habitats of Principal Importance/be of high ecological value and support protected and notable species. Grassland quality will also need to be assessed. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find off-site compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Policy RAG Rating 2026	Green
Policy Officer Comment 2026	The site is wholly outside of protected open space. Detrimental open space impacts are not anticipated.

Flood Risk RAG Assessment 2025	Amber
Flood Risk Officer Comment 2025	Flood Zone: Wholly in Flood Zone 1. Surface Water Flooding: 1% lies in a 1 in 30 year event. 1% lies in a 1 in 100 year event. 1% lies in a 1 in 1000 year event
Flood Risk RAG Assessment 2023	
Flood Risk Officer Comment 2023	
Flood Risk RAG Assessment 2021	Amber
Flood Risk Officer Comment 2021	The site is within flood zone 2 (taking into account climate change) and/or is within an area at high, medium or low risk from surface water flooding.
Landscape RAG Assessment 2026	
Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Red
Landscape Comment 2023	Additional text has been submitted to support the representation but does not include any detailed information about landscape and so the RAG assessment remains Red.
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site comprises two parcels of agricultural land outside of the development framework boundary and extends south east into the countryside. The site is well enclosed to the east and west, but is largely open in areas north and south and forms part of the wider arable setting. The site is very large and this proposal moves away from the existing pattern of loose knit housing formed around main roads and will alter the character of the village.

Biodiversity and Geodiversity RAG Assessment 2023	Amber
Biodiversity and Geodiversity Officer Comments 2023	No additional information has been provided in relation to ecology impacts and mitigation and therefore there is no change to the site assessment scoring.
Biodiversity and Geodiversity Guideline Comments 2023	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder applications will require consultation with Natural England regarding Eversden and Wimpole Woods SAC. There is a drain that runs through the site east to west that may require surveys and possible mitigation. There are no other apparent priority habitats within the site; however, there are grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find offsite compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Historic Environment RAG Assessment 2026	
Historic Environment Comments 2026	

Historic Environment RAG Assessment 2025	
Historic Environment Comments 2025	
Historic Environment RAG Assessment 2023	Amber
Historic Environment Comments 2023	The additional information states that the pervious comments were wrong in saying that the development was near Town Green Road. This is not the case, the comment stated that the proposed development had the potential to harm the setting of the CA and the historical form of the village which had seen limited new development along Town Green Road. The revised information states the promoted development could avoid harm to heritage assets through careful design and layout but does not add any further information therefore the RAG rating remains amber.
Historic Environment RAG Assessment 2021	Amber
Historic Environment Comments 2021	The site contributes to the setting of the Conservation Area. Development in the numbers proposed has the potential to harm the setting of the Conservation Area and the historical from of the village which has seen limited new development along Town Green Road. Limited development might be possible on part of the site but this would need to respect the prevailing density and character of the Conservation Area.

Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Amber
Biodiversity and Geodiversity Officer Comments 2021	All new housing developments will require assessment of increased visitor pressure on nearby SSSI, and all non-householder planning applications will require consultation with Natural England. There are no apparent priority habitats within the site; however, there are wooded areas, grasslands, hedges, and wooded boundaries on site that are likely to have ecological value. Applications may find provision of a 10% net gain in biodiversity difficult within their red line boundaries and may need to find off-site compensation to comply with up-coming National legislation and developing local policies.
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	
Landscape Comment 2023	
Landscape RAG Assessment 2021	Red
Landscape Comment 2021	The site would have a high magnitude of impact on the landscape in this area. The views across the site are expansive and very open. The setting of the Wimpole Avenue and Wimpole Hall would be affected by the presence of development in this area. Development would harm the existing character of the site in an unalterable way. The village of Wimpole would be overwhelmed by a new development in this area and lose its current character and it is questionable if the village could withstand expansion within the directly adjacent land.

Biodiversity and Geodiversity Officer Comments 2023	
Biodiversity and Geodiversity Guideline Comments 2023	
Biodiversity and Geodiversity RAG Assessment 2021	Red
Biodiversity and Geodiversity Officer Comments 2021	All residential developments would require consideration of recreational impact on nearby SSSIs/SAC. All planning applications would require consultation with Natural England. Site is 2.2km from Eversden and Wimpole Woods Special Area of Conservation, designated for internationally important barbastelle bat populations. The site is likely to be within the core foraging zone and so the proposed allocation is likely to be unachievable without significant impact on the SAC population, contrary to the Habitats Regulations. Given that habitats on site are most likely low value for barbastelle bats, a smaller scale allocation with additional habitat creation for the species may be possible if very sensitively designed (including lighting), also depending on Natural England's view. The River Cam County Wildlife site forms the southern boundary of the site; direct and indirect (recreational) negative impacts on the CWS would need to be avoided. Hedgerows, wooded boundaries, watercourses and trees may qualify as Habitats of Principal Importance/be of high ecological value and may support protected and notable species. Arable habitats are likely to be of low ecological value, although may support farmland bird populations. Buildings may support roosting bats (if suitable).
Biodiversity and Geodiversity Guideline Comments 2021	Development of the site would have a detrimental impact on designated sites, or those with a regional or local protection which cannot be reasonably mitigated or compensated as appropriate.
Policy RAG Rating 2026	Green
Policy Officer Comment 2026	The site is wholly outside of protected open space. Detrimental open space impacts are not anticipated.

Landscape Comment 2026	
Landscape RAG Assessment 2025	
Landscape Comment 2025	
Landscape RAG Assessment 2023	Amber
Landscape Comment 2023	An additional statement has been submitted and new illustrative site layout provided with an increase in housing numbers from 9 to 13. The new information does not include any additional information affecting the landscape assessment and so the RAG rating remains amber.
Landscape RAG Assessment 2021	Amber
Landscape Comment 2021	The site has an enclosed character. It is mostly outside of the development framework boundary and abuts it in the north. The site would essentially see development in the countryside. Preservation of the rural countryside is important. However, the development logically extends along Leaden Hill creating a linear settlement pattern which is consistent with the form of Orwell. The orchard should be retained. Buildings should respond to the existing character. Site boundaries are to be strengthened for mitigation purposes.

Biodiversity and Geodiversity RAG Assessment 2026	Amber

Biodiversity and Geodiversity Officer Comments 2026	A development of the size and scale described has the potential to impact statutory and non-statutory protected sites, their cited attributes, and functionally linked habitats or protected species. The proposed site lies adjacent to multiple SSSIs and additionally falls within the Impact Risk Zone for Eversden and Wimpole Woods SAC; designated for its population of western barbastelle bats. Any future applications will require consultation with Natural England. The boundary contains non-statutory designated sites and priority habitats, and thus will likely require bespoke mitigation or compensation to remove any risk of harm. A development of the type described would likely be eligible for mandatory biodiversity net gains.
Biodiversity and Geodiversity Guideline Comments 2026	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection, but the impact could be reasonably mitigated or compensated.

Policy Officer Comments 2021	
Historic Environment RAG Assessment 2026	Red
Historic Environment Comments 2026	Development on the scale outlined would affect the setting of a very large number of heritage assets in Meldreth, Shepreth, Whaddon, Dyer's Green, Orwell and beyond. It is likely to significantly impact the valuable rural setting of numerous listed buildings and conservation areas, harming the distinctiveness and separation between villages. This high level of harm could not be reasonably mitigated.

Historic Environment Comments 2023	
Historic Environment RAG Assessment 2021	
Historic Environment Comments 2021	
Archaeology RAG Assessment 2026	Red
Archaeology Officer Comment 2026	The proposal is located in a landscape of high archaeological significance, with sites of late prehistoric, Roman, Saxon and medieval date known in the area. It is highly likely that sites of equivalent status to nationally designated assets will be encountered. On the basis of current information we would advise against the allocation of this site for development.

Transport and Roads RAG Assessment 2026	Red
Transport and Roads Guideline Comments 2026	All of the roads connecting to the site are unsuitable for the development, with little certainty that the roads could be upgraded. The potential impact of development of this scale on the functioning of trunk roads (A10 and the A505, which are already severely congestion in peak times) could not be mitigated. The site has low accessibility and will need significant public transport and active travel links to the surrounding area, which does not appear to be possible for the development as the development land does not appear to be able to connect to active travel and public transport routes. There are two sites which are split by intervening land meaning a lack of cohesive routes between the two, further reducing the potential for high-quality active travel and bus routes.

Landscape RAG Assessment 2026	Red
Landscape Comment 2026	The site covers an extensive tract of land between Meldreth, Shepreth and Orwell and is mostly in the Rhee tributaries lowland farmlands landscape character area (3C). Supporting plans were not made available but, based on the site extents and number of homes, the proposed development would have a permanent, negative impact on the landscape, changing it from a rural landscape to a settlement. This would be an irreversible change to the landscape character and not in keeping with the surrounding landscape context.

Biodiversity and Geodiversity RAG Assessment 2026	Amber

Biodiversity and Geodiversity Officer Comments 2026	The site is immediately adjacent to SSSI sites (Barrington Chalk Pit and Barrington Pit) and close to other SSSI sites, including Orwell Clunch Pit and L-Moor Shepreth. A development of the size and scale described would likely meet the criteria set out by Natural England that would raise concerns regarding impacts to statutory protected sites. This includes increases in recreational pressure on nearby statutory protected sites. The proposed development lies adjacent/near to a non-statutory designated site and may/would likely require bespoke mitigation or compensation to remove any risk of harm.
Biodiversity and Geodiversity Guideline Comments 2026	Development of the site may have a detrimental impact on a designated site, or those with a regional or local protection but the impact could be reasonably mitigated or compensated.
