1. Introduction

- 1.1 The Greater Cambridge Local Plan includes Policy BG/PO: Protecting open spaces, which addresses how important open spaces are considered in the planning process. The policy identifies and protects open spaces, including village greens, parks, sports and recreation areas, allotments, community orchards and Protected Village Amenity Areas, and Local Green Space.
- 1.2 Policy GP/LC: Protection, conservation and enhancement of landscape character addresses areas of importance for the landscape setting of villages, where land with a strong countryside character penetrates or sweeps into villages or provides an important rural break between two parts of villages; these areas are protected as Important Countryside Frontages.
- 1.3 The purpose of this review is to demonstrate that the open spaces and countryside frontages identified for protection in the Proposed Submission Local Plan are reasoned and justified by meeting the policy criteria.
- 1.4 The Protected Open Space Review (2025) outlined how a review was undertaken of all the existing sites in both the Cambridge and South Cambridgeshire adopted Local Plans to check that they still met the criteria to warrant designation or identify any potential amendments (e.g. boundary changes if part of a site had been developed). This process ensured that policy designations remained appropriate and accurately reflected current conditions.
- 1.5 The Protected Open Space Review 2026 builds on the earlier report (2025) but also identifies additional open spaces with an important community function which lie outside the defined development extent and new sites brought forward in new residential development. It also reviews the interaction with other policies in the Local Plan, including allocations and policy areas, so

- 1.6 as not to constrain their primary purpose for delivering growth and/or redevelopment. Further to this, the Review identifies criteria by which unmapped Protected Open Space can be identified as being of environmental and/or recreational importance, and assesses mapped informal open spaces against these, noting that other typologies (e.g. Recreation Grounds) meet such criteria by definition. The Protected Open Space Review 2026 supersedes the Protected Open Space Review 2025.

2. Policy Context

- 2.1 The following outlines the different types of open space designations within the emerging policy for Greater Cambridge, the functions of each type of designation, and an overview of the policy in the local plan. It should be noted that sites do not have to be publicly accessible.
- 2.2 'Made' (adopted) Neighbourhood Plans, which form part of the Development Plan, also designate sites to protect open space. These sites have not been reviewed as they will have been tested separately through the Neighbourhood Planning process and shown on the policies map.

Proposed Submission Greater Cambridge Local Plan

Types of Open Space Designations

- 2.3 The following Open Space Designations are included in the Proposed Submission Greater Cambridge Local Plan:
- **Protected Open Space (POS):** This policy protects Open Spaces of environmental or recreational importance as identified on the policies map, and any undesignated sites that meet at least one of the open space criteria set out in this report. The following open space typologies are designated as Protected Open Spaces within Greater Cambridge:
 - Burial Ground and Churchyards
 - Children and Young People
 - Food Growing Spaces
 - Informal Areas of Open Space
 - Natural Open Space
 - Outdoor Sports Facilities
 - Parks and Recreation Space
- Some open spaces are classified within more than one typology. Where this is the case, a main typology is applied.

- **Protected Village Amenity Areas (PVAAs):** designated on sites within the defined development extent in order to safeguard those areas of undeveloped land within villages which are important to retain. Some may have an important amenity role in providing a setting for buildings or offer tranquil areas where there is minimum activity. Not all PVAAs have public access as some undeveloped areas which are important may be private gardens. They also vary from those which are very open to visual penetration to those which may be enclosed or semi-enclosed.
- **Local Green Space (LGS):** designated for green areas of particular importance to local communities which, once designated, can prevent new development other than in exceptional circumstances, consistent with national policy for Green Belts. A LGS must hold a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife. The green area must be in reasonably close proximity to the community it serves. It must be local in character and not be an extensive tract of land. These sites can protect land outside of a defined development extent.
- **Important Countryside Frontages (ICFs):** where land with a strong countryside character penetrates or sweeps into villages or separates two parts of the built-up area, this enhances the setting, character and appearance of the village. This is done by retaining the sense of connection between the village and its rural origins and surroundings. The frontage where this interface particularly occurs is identified to indicate that the frontage and the open countryside beyond should be kept open and free from development.

Overview of Proposed Submission Policy

- 2.4 **Policy BG/PO: Protecting Open Spaces.** This policy identifies Protected Open Spaces, Protected Village Amenity Areas and Local Green Spaces on the policies map.
- 2.5 The policy states that development will not be permitted if would harm the character, function and/or quality of, or lead to the loss of protected open space. The policy allows for exceptions where there is reprovion of open space equivalent or better standard in terms of quality, quantity and accessibility. Exceptions are permitted, such as within the grounds of educational establishments, where there is clear need which cannot be met elsewhere. In such instances the open space must be satisfactorily replaced to an equivalent or better standard in terms of quality, quantity and accessibility, and the new open space must be fully available before the area of open space can be redeveloped.
- 2.6 For identified PVAAs, development will not be permitted within or adjacent to these areas if it would have an adverse impact on the character, amenity, or tranquillity of the village.
- 2.7 In relation to LGS, the policy states that development will not be permitted where it would adversely impact on the character, function, quality and particular local significance placed on such green areas which make them valued by their local community. Development will only be permitted in exceptional circumstances, consistent with national policy for Green Belts, and in discussions with the local community.
- 2.8 **Policy GP/LC: Protection, conservation and enhancement of landscape character.** This policy identifies Important Countryside Frontages on the Policies map. The policy states that development will not be permitted where it compromises the purposes of an ICF.

3. Approach and methodology

- 3.1 The following sets out the approach and methodology used to assess the sites.

Approach

- 3.2 The Protected Open Space Review (2025) outlined how a desk-based review was undertaken of all the existing sites in both adopted Local Plans to check that they still met the criteria to warrant designation or identify any potential amendments (e.g. boundary changes if part of a site had been developed). This process ensured that policy designations remained appropriate and accurately reflected current conditions. The Protected Open Space Review (2026) followed the same broad approach but applied amended parameters set out below to identify new and amended Protected Open Space sites, including identifying additional sites within newly built out residential developments.
- 3.3 At Proposed Submission stage, protected open spaces meeting relevant typologies (see chapter 4) have been designated in the following types of locations:
- Within defined development extents:
 - Protected Open Spaces
 - Protected Village Amenity Areas, and
 - Local Green Spaces
 - Outside the defined development extents:
 - Protected Open Spaces where they perform an important function for the local community, including recreation grounds and play spaces, allotments, and burial grounds (note that semi natural areas such as nature reserves and wildlife sites have not been designated outside the defined development extent, given the difficulty of identifying a comprehensive set of such sites with accuracy).
 - Local Green Spaces, and
 - Important Countryside Frontages

- 3.4 At Proposed Submission stage, Protected Open Spaces have not been designated in the following types of locations, where they fall within a business park, policy area or allocation which designate land primarily for development:
- Existing business parks in the rural area do not have a defined development extent; for consistency business areas within the Cambridge urban area (such as Cambridge Science Park, West Cambridge and Cambridge Biomedical Campus) and villages will not include protected open space where it could undermine future employment growth.
 - The Local Plan includes new site allocations and site specific policies for the redevelopment of existing sites; protected open space designations have not been included where this could undermine the policy aspirations, noting that some policies may require re-provision.
 - New developments, in particular strategic scale urban extensions and new settlements, can take several years to deliver on the ground. As a result, the Proposed Submission Plan identifies these development sites with a policy area until they are fully built out; qualifying open spaces within these sites will not be identified on the Policies Map until the whole development has been fully built out and a defined development extent has been drawn around the site.

Methodology

- 3.5 The Protected Open Space Review 2026 was completed via a desktop analysis using Google Maps Satellite Imagery and Google Streetview. Sites were assessed against the relevant policy tests outlined in this Report; each site was mapped (and protected open space were categorised into one of the protected open space typologies) and given a unique reference number.
- 3.6 The detailed results of the assessments are provided in Appendices A to D.

4. Summary of Assessment

- 4.1 Chapter 4 outlines the assessment criteria used for each policy designation included with the Greater Cambridge Local Plan policy and provides a summary of the assessment findings.

Protected Open Space (POS)

Assessment Criteria

- 4.2 Protected Open Space are designated where they are assessed as being of environmental and/or recreational importance.
- 4.3 All Protected Open Spaces identified in this Report and included on the Policies Map meet one or more of the below criteria supporting the assessment of environmental and/or recreational importance. Undesignated open spaces are protected by Policy BG/PO Protecting Open Spaces if it can be demonstrated that they meet one or more of the criteria.

Protected Open Space Environmental Importance criteria

- Contribution to setting, character, structure and environmental quality
- Positive landscape features and sense of place - Features such as streams, trees, hedgerows, meadowland which give it sense of place
- Important green break in urban framework
- Form part of a network of open spaces in local area
- Historical, cultural or known archaeological interest
- Enjoyed visually from public places (footpaths, vantage points)
- Contribute to wildlife value and biodiversity – comprise or include, be adjacent to or link to a site with a nature conservation designation, contain habitats worthy of designation, or be a wildlife oasis in area of limited wildlife value

Protected Open Space Recreational Importance criteria

- Important for recreational purposes
- Part of network and hierarchy of recreational open spaces
- Part of sports provision which help meet demand
- Linkage between recreational areas

Open space typologies and how they meet the environmental and recreational importance criteria

4.4 This section explains how the different open space typologies within Greater Cambridge meet the above environmental and/or recreational importance criteria.

4.5 The Councils consider that the following typologies are of environmental and/or recreational importance by definition:

- **Burial Ground and Churchyards** – of environmental importance, often forming part of the setting of historically important buildings and the character, structure and environmental quality of settlements. They also provide public access to their grounds for recreational amenity use;
- **Children and Young People** – part of the hierarchy of recreational open spaces, play spaces, often with play equipment and/or amenity green space, provide recreational opportunities and, in some instances, may contribute to the local environment;
- **Food Growing Spaces** – including allotments and community orchards can be enjoyed recreationally for food growing and, as open spaces, may contribute to the setting, character, structure and environmental quality of settlements;
- **Natural Open Space** – these environmentally important spaces add to local character through positive landscape features and sense of place and, where there is public access, provide space for informal recreation;
- **Outdoor Sports Facilities** – important for recreational purposes, formal sports facilities provide for a range of recreational activities, and open sports fields can also contribute to the local environment and setting;

- **Parks and Recreation Space** – important for recreational purposes and part of the network and hierarchy of recreational open spaces, provide access for recreational use (noting that some of these are for private communities such as university colleges). As green spaces they may also have environmental importance, contributing to the setting, character, structure and environmental quality of settlements.
- **Informal Areas of Open Space** – including semi natural and amenity green spaces, these spaces are of environmental importance, adding to the local setting, character, structure and environmental quality of places, and provide spaces for informal recreation.

4.6 Except for Informal Areas of Open Space, all of the space typologies above include clearly identifiable features such that this report identifies them as being of that typology without further justification. Identifying Informal Areas of Open Space worthy of protection is more open to judgement – this Report therefore assesses such spaces using the detailed criteria from paragraph 4.3.

Assessment results for Protected Open Space

- 4.7 A total of 1,911 sites have been identified as meeting the criteria for designation as Protected Open Space in the Proposed Submission Greater Cambridge Local Plan.
- 4.8 See Appendix A for the full list of all Protected Open Spaces proposed within the Greater Cambridge Local Plan.
- 4.9 See also Appendix E, which responds to comments made to the Draft Plan consultation regarding Protected Open Spaces.

Protected Village Amenity Areas (PVAA)

Assessment Criteria

- 4.10 Sites were evaluated against two questions to determine whether they met the relevant policy criteria to be designated. Every site was given a red, amber or green score against both questions. To proceed to assessment, sites needed to fulfil two criteria; that the site was inside the defined development extent (identified on the Policies Map) and was mainly undeveloped land.
- 4.11 The two questions applied were:
1. Is the undeveloped nature of this land important to the character of the village or for this particular part of the village?
 2. Does the undeveloped nature of this land provide a tranquil area where there is a minimum of activity, important to the amenity of the village or for this particular part of the village?
- 4.12 If a site scored amber or green to at least one of these questions, the criteria to be designated as a PVAA was met.

Assessment results for Protected Village Amenity Areas (PVAA)

- 4.13 A total of 113 sites have been identified as meeting the criteria for designation as Protected Village Amenity Area in the Proposed Submission Greater Cambridge Local Plan.
- 4.14 See Appendix B for the full list of all PVAAs proposed within the Greater Cambridge Local Plan.

Local Green Space (LGS)

Assessment Criteria

- 4.15 To be designated sites had to be considered Local in character and not an extensive tract of land and located within close proximity to the community it serves. The criteria used to determine whether a site should warrant designation as an LGS reflect the [National Planning Policy Framework](#) (paragraph 107), as follows:
- Demonstrably special to the local community – whether the site was proposed by the parish council or representations were received in support of the designation
 - Beauty – whether it makes a contribution to the character and amenity of the village
 - Historical Significance - whether it makes a contribution to the setting of listed buildings and/or a conservation area
 - Recreational Value – whether it provides informal open space and/or recreational value
 - Tranquillity – whether it provides some feeling of remoteness and quiet contemplation
 - Richness of wildlife – whether it is an area which contains a diversity of wildlife
- 4.16 If a site scored green to at least one of these questions, the conditions to be designated as a LGS was met.

Assessment results for Local Green Space (LGS)

- 4.17 The Protected Open Space Review (2025) assessed all the 83 Local Green Spaces designated within the adopted South Cambridgeshire Local Plan (2018), and all continued to meet at least one of the LGS criteria to be designated.

- 4.18 One further site has been assessed as meeting the high bar to be designated in the Proposed Submission Greater Cambridge Local Plan.
- 4.19 See Appendix C for the full list of LGS proposed within the Greater Cambridge Local Plan.
- 4.20 See also Appendix E, which responds to comments made to the Draft Plan consultation regarding LGS.

Important Countryside Frontage (ICF)

Assessment Criteria

- 4.21 Sites were evaluated against the relevant policy criteria to determine their suitability for designation. To proceed to assessment, sites needed to fulfil two criteria; that the site was outside and adjacent to the defined development extent (identified on the Policies Map).
- 4.22 The criteria used to determine whether a site should warrant designation as an ICF consisted of two tests:
- The first test asked whether it was land on a frontage with a strong countryside character that provides an important rural break between two nearby but detached parts of the defined development extent.
 - The second test asked whether the frontage allows land with a strong countryside character to penetrate or sweep into the built-up area providing a significant connection between the street scene and the surrounding rural area.
- 4.23 If a site scored green to at least one of the two tests, the conditions to be designated as an ICF was met.

Assessment results for Important Countryside Frontage (ICF)

- 4.24 The Protected Open Space Review (2025) assessed all the important countryside frontages designated within the adopted South Cambridgeshire Local Plan (2018), and all continued to meet the criteria to warrant designation, with the review identifying amendments to both reduce or extend the extent of a few of ICFs.
- 4.25 No further sites are proposed to be designated in the Proposed Submission Greater Cambridge Local Plan.
- 4.26 See Appendix D for the full list of ICFs proposed within the Greater Cambridge Local Plan.
- 4.27 See also Appendix E, which responds to comments made to the Draft Plan consultation regarding ICFs.

Appendices

Appendix A: Review Results – Protected Open Space

A.1 The full list of Protected Open Spaces included in the Greater Cambridge Local Plan is set out in Tables A1 and A2.

A.2 Table A1 details sites within the following protected open space typologies:

- Burial Ground and Churchyards
- Children and Young People
- Food Growing Spaces
- Natural Open Space
- Outdoor Sports Facilities
- Parks and Recreation Space

A.3 The Informal Areas of Open Space sites are listed in Table A2, together with an assessment of how the sites perform against the policy criteria to demonstrate their environmental and recreational importance.

Table A2: Greater Cambridge Local Plan Protected Open Spaces categorised as Informal Open Space

A.5 The following sites are all Protected Open Space categorised as Informal Open Space; the table demonstrates which of the assessment criteria for environment and recreational importance each site meets:

Environmental Importance

1. Contribution to setting, character, structure and environmental quality
2. Positive landscape features and sense of place - Features such as streams, trees, hedgerows, meadowland which give it sense of place
3. Important green break in urban framework
4. Form part of a network of open spaces in local area

5. Historical, cultural or known archaeological interest
6. Enjoyed visually from public places (footpaths, vantage points)
7. Contribute to wildlife value and biodiversity - nature conservation designation / adjacent or link to, contain habitats worthy of designation, wildlife oasis in area of limited wildlife value

Recreational Importance

8. Important for recreational purposes
9. Part of network and hierarchy of recreational open spaces
10. Part of sports provision which help meet demand
11. Linkage between recreational areas

Appendix E: Issues raised in comments to the Draft Plan Consultation

E.1 A number of comments were received during the Draft Plan Consultation held between December 2025 to January 2026 that related to designated open spaces including suggestions for new sites to be designated. Below summarises the comments which were made along with the response.

Comments raised in relation to Protected Open Space

Summary of issue raised in comments

The draft Policies Map requires updates to include new open spaces, Local Green Spaces, and Protected Village Amenity Areas from the Stapleford & Gt Shelford Neighbourhood Plan adopted in October 2025:

- a. The draft Policies Map should include Stapleford's cemetery (land north of Mingle Lane) as designated open space.
- b. The draft Policies Map should include Gt Shelford's cemetery (off Cambridge Rd) as designated open space.
- c. The draft Policies Map should include Gt Shelford's Davey Field Rugby Football Ground (off Cambridge Rd) as designated open space.
- d. The open space designation at More's Meadow, Gt Shelford (site ref. ZA 032) is incorrectly placed and should be adjusted to reflect the land allocated for allotments and a community garden.
- e. The extensive new countryside park (Chalk Hill Down) between Haverhill Rd (Stapleford) and Hinton Way (Gt Shelford) is not represented as open space on the draft Policies Map.
- f. The Clay Pit on Granhams Rd needs to be included in the open spaces map, as indicated in Map 4 on page 72 of the Stapleford & Gt Shelford Neighbourhood Plan.

Comments highlighting this issue

201613 and 210938 Stapleford Parish Council

Response

- a. The site is a cemetery, meeting the policy criteria as Burial Ground and Churchyards and has been designated.
- b. The site is a cemetery, meeting the policy criteria as Burial Ground and Churchyards and has been designated.
- c. The site is sports pitches, meeting the policy criteria as Outdoor Sports Facilities and has been designated.
- d. POS ZA 032 was incorrectly shown as allotments but is a residential development and has been removed. The allotments and community garden to the rear of The Hectare have been designated, along with the amenity green space within the new residential development at Moore's Meadow.
- e. The site is a nature reserve located outside the defined development extent. The policies map does not designate natural areas outside the defined development extent.
- f. The country park has been approved but is yet to be established on the ground. It therefore does not warrant designation currently.

Summary of issue raised in comments

Leadwell Meadows/Pocket Park should be recognised as Protected Open Space (related to Policy BG/PO)

Comments highlighting this issue

201671 Linton Parish Council

Response

The site is a nature reserve located outside the defined development extent. The policies map does not designate natural areas outside the defined development extent.

Summary of issue raised in comments

I cannot see references to Mill Road Cemetery but hope this important site is mentioned somewhere. It is a closed Victorian cemetery, consecrated, and maintained as both a cemetery and a large green space. As Parishes Committee Chair representing churches owning the land, I much appreciate the Council's care of the site with local and Council volunteer support. It is a significant asset in this built-up area and contributes to meeting the Council's statutory open-space provision.

New site submission - community orchard and associated biodiversity-rich community managed open space

Comments highlighting this issue

211258 & 211259 Friends of St Matthew's Piece (New site submissions 116411 & 116412)

Response

The sites are in use as a community orchard, meeting the policy criteria as Food Growing Spaces and have been designated.

Summary of issue raised in comments

The site should have zero use as residential, non-residential or mixed-use development. It should remain as a pocket of precious and rare green space in this densely built-up ward.

Comments highlighting this issue

211260 Friends of St Matthew's Piece (New site submission 116434)

Response

The site comprises a large tree within a small patch of grass; it does not meet the test to warrant designation as protected open space.

Summary of issue raised in comments

TCC recognise the importance that open spaces play across Cambridge Science Park. All of the open spaces and biodiverse areas within the Science Park have been planned and curated over its 55 year history.

However, TCC OBJECT to the inclusion as currently outlined on the draft policies map. It is considered that the inclusion of numerous other policies within the draft local plan including Policy BG/BG and written elements within Policy S/NEC cover off the retention and reprovion of open space where necessary

Comments highlighting this issue

203977 Trinity College, Cambridge

Response

The Draft Plan policies map included a core area of park and garden which forms part of the structure and character of the business park, providing an important amenity space for employees and visitors, and further pockets of landscaping and informal amenity space. It is accepted that it is not appropriate to designate the smaller pockets of open space, some of which are development plots, so as not to undermine future employment growth. Only the core area of park and garden warrants designation.

Summary of issue raised in comments

We support the principle of a mixed-use development at North Cambridge Academy delivering about 150 homes and a community sports hub.

Request that the northern part of the North Cambridge Academy site be removed from the protected open space designation to allow flexible mixed-use development.

Comments highlighting this issue

206130, 206140 (Meridian trust)

Response

S/C/NCA: North Cambridge Academy, 108, Arbury Road provides flexibility for the loss of protected open space where this is outweighed by the provision of an increased and improved sports facilities.

Comments raised in relation to Local Green Space

Summary of issue raised in comments

Duxford's Brewery Field should be designated as a LGS. The land (1.67 hectares), is owned by Duxford PC who fund a maintenance contract for grass cutting/general maintenance. Site improvements, are funded by grants or by Friends of Duxford Green Spaces. SMT, a local business in Duxford also generously offer 10-15 staff days per year.

It meets the criteria as Brewery Field is in a key location in the village, near the Recreation Ground, Community Centre and primary school. Its position at the edge of the village envelope, adjacent to fields, provides easy access to wildlife corridors and it is a crucial link within the Duxford Nature Network.

The site is used for exercise, pleasure, relaxation, picnics and dog walking by the local community with Festivals of Nature held here in 2023 and 2024 and for air display days. Alongside the tree planting (200 trees and shrubs) and pond, there is an art installation funded by the PC art fund.

Comments highlighting this issue

208635 Duxford Parish Council

Response

The site is of local significance to the community, and meets the policy tests for recreational value, tranquillity, richness of wildlife, and, to some degree, beauty. The site meets the policy criteria for designation as Local Green Space.

Summary of issue raised in comments

Recognise Girton's LGS evidence (landscape, ecology, heritage, recreation).

Assess Area 11 (Hibbert-Ware Garden & Smithy Green) for POS and LGS to ensure protection and enhancement consistent with Local Plan definitions.

We welcome the updated Girton Policies Map and see it as a significant improvement on the 2018 version.

- We would like more open-space areas to be designated directly on the Policies Map rather than via the Neighbourhood Plan, because the Local Plan carries greater weight.
- We argue that protection of open spaces, local green spaces, PVAA and ICF should be at least as strong as the NPPF, with 'exceptional' circumstances judged locally rather than at the Greater Cambridge level.

We recommend that the listed sites (Area 2, Areas 3-4, Areas 5-6, Area 7, Area 8, Area 9, Area 10, Area 11, ICF 1 and ICF 2) be designated as Protected Open Spaces, Local Green Spaces or Important Countryside Features to safeguard flood control, wildlife, landscape and community values.

202222 and 202223 Girton Parish Council

206158, 206159, 206160, 206163 (Girton Neighbourhood Plan Team)

Response

The Parish Council did not submit any information in support of their representations. It is understood the parish is seeking, through the preparation of their neighbourhood plan, to designate various parcels of land as Local Green Space. Without clear evidence to demonstrate the local significance to the community it cannot be demonstrated the sites meet the test for designation within the Local Plan; although they can be taken forwards through the neighbourhood plan.

The sites have been assessed against the policy criteria for Protected Open Space:

- Area 2 – is within the North West Cambridge Area Action Plan boundary; the Eddington site is currently being developed and is defined by a policy area does not have a defined development extent.
- Area 3 – is a playing field, meeting the policy criteria as Outdoor Sports Facilities and has been designated.
- Area 4 – is a playing field, meeting the policy criteria as Outdoor Sports Facilities and has been designated.
- Area 5 – is a proposed playing field but is yet to be provided and has not been designated.
- Area 6 – is arable and semi natural land outside the defined development extent (DDE), so does not meet the policy criteria for designation.
- Area 7 – is the school playing field, meeting the policy criteria as Outdoor Sports Facilities and has been designated.
- Area 8 – is a golf course so does not meet the criteria for designation.
- Area 9 – is a semi natural area outside the defined development extent, so does not meet the policy criteria for designation.
- Area 10 – is arable and semi natural land outside the defined development extent (DDE), so does not meet the policy criteria for designation.
- Area 11 - is an area of informal open space meeting the policy criteria as Informal Areas of Open Space and has been designated.

Two Important Countryside Frontages were assessed against the policy criteria:

- ICF 1 – proposed along the edge of the Eddington policy area; it is not appropriate to consider open space designations until a defined development extent is in place.
- ICF 2 – proposed along the rear of properties fronting St Vicent's Close, and it is not possible for the countryside to penetrate into the village, therefore it does not meet the policy criteria for designation.

Summary of issue raised in comments

I am seeking clarification on the current protections for Longstanton Paddocks. It remains unclear as to why it is not designated as Protected Open Space. I attended a public consultation with a representative from the Longstanton District Heritage Society and appreciated the feedback received post meeting via email, but I still find the protections against development unclear for the Paddocks. I wish to highlight the need for clearer information regarding existing policies that govern the land and its development protections.

Why does the land adjacent to Badgers Holt have a Protected Open Space policy while the paddocks and the land next to the Toads Acre mobile home do not?

Comments highlighting this issue

201695 and 205900 (P Harradine)

Response

The Draft Plan Policies Map erroneously showed an area of semi natural green space at Long Lane being designated as Protected Open Space. This was a mapping error, due to the site area not being snapped to the basemap correctly (in the south western corner) such that it was erroneously shown as being partly within the defined development extent, when in fact it isn't. The Badgers Holt site was identified as being within the policy area for Northstowe, which extended beyond the defined development extent.

As explained at paragraph 3.4, new developments, in particular strategic scale urban extensions and new settlements, can take several years to deliver on the ground. As a result, the Proposed Submission Plan identifies these development sites with a policy area until they are fully built out; qualifying open spaces within these sites will not be identified on the Policies Map until a defined development extent is in place. Therefore the Longstanton Paddocks (and Badgers Holt) sites fall within the policy area and are not designated in the Proposed Submission Local Plan.

Summary of issue raised in comments

While the importance of green space is acknowledged, the scale of the proposed Protected Open Space allocation at Park at St Peter's Lane is disproportionate when viewed in the context of existing protected open and green spaces within Papworth Everard.

The proposed designation is not supported by robust, site-specific evidence and does not demonstrate that the land is of sufficient environmental, recreational, or community value to warrant protection under draft policy BG/PO. As a result, the allocation would unnecessarily constrain sustainable development opportunities in the future on a site set within the defined edge of the bypass, including the delivery of much-needed housing, in a location that is well related to the existing settlement and its services.

The imposition of extensive designations across land owned and controlled by Varrier-Jones Foundation, without prior engagement with the landowner, is unduly restrictive and risks prejudicing the ability of the emerging Local Plan to respond flexibly to future development needs.

Comments highlighting this issue

203398 (The Varrier Jones Foundation)

Response

The open space review was a desk-based exercise and analysed open spaces on their merit against the policy tests (as outlined in Chapter 3). The land identified as Park at St Peter's Lane is an important environmental and recreational space which meets the policy tests. It provides access for recreation, crossed by a number of public paths, forms part of the hierarchy of spaces within and around the village and also contributes to the setting, character, structure of the village.

Comments raised in relation to Important Countryside Frontages

Summary of issue raised in comments

The respondent supports the policy but highlights the need to update the draft Policies Map to include the Stapleford & Gt Shelford Neighbourhood Plan and specifically Policy S&GS 13, which designates a new Important Countryside Frontage.

Comments highlighting this issue

201622 Stapleford Parish Council]

Response

Made Neighbourhood Plan designations are shown on the policies map

Summary of issue raised in comments

We support the policy to protect Important Countryside Frontages where landscape with strong countryside character penetrates or separates villages and retains their sense of connection with their rural surroundings. There are two in Stapleford that meet this objective and the visual and physical tests set out in the GP/LC policy and supporting documents, yet the policy map shows no protection for these frontages even though similar or less important frontages are protected in neighbouring villages. The policy should be consistently applied across the villages and these two ICFs (on Mingle Lane and Gog Magog way) added on the policy map

Comments highlighting this issue

202909 M Foote

Response

There is only a very small gap in the built frontage to Mingle Lane, a field access between two houses, which does not enable land with a strong countryside character to sweep into the built-up area or provide a significant connection between the street scene and surrounding rural area.

At Gog Magog Way there is no defined development extent around Chalk Hill or the Strawberry Fields development, therefore it cannot be considered that there is an important rural break between two nearby but detached parts of the defined development extent.

Neither site meets the policy criteria for designation as ICF

Summary of issue raised in comments

It is considered that the land off Home End does not meet the definition of Important Countryside Frontage. It is surrounded by buildings and a car park. There are sport and recreation facilities and associated car parking areas between the site and the countryside beyond.

Comments highlighting this issue

201959 KG Moss Will Trust & Moss Family

Response

The sport and recreation facilities and associated car parking do not impact openness and countryside connection. There remains a strong countryside character penetrating into the built-up area providing a significant connection between the street scene and the surrounding rural area.

The site continues to meet the policy criteria and should remain designated ICF.

Summary of issue raised in comments

It is considered that the land off Ditton Lane in Fen Ditton does not meet the definition of an Important Countryside Frontage, and it is requested that this designation is deleted from this site.

Comments highlighting this issue

202093 J Francis

Response

The Protected Open Space Evidence Report 2025 assessed this site as follows:

Important Rural Break: • Green

Significant Connection (Street vs Rural): • Green

There has been no visible change, therefore the site continues to meet the policy criteria and should remain designated ICF.

Summary of issue raised in comments

The northern boundary of the Land south of Church Street, east of High Street (HELAA Ref. 40300) is currently designated as an Important Countryside Frontage under Policy NH/13 of the South Cambridgeshire Local Plan 2018 and Draft Policy GP/LC proposes to retain this designation. However, the Site does not have a strong countryside character and it is visually enclosed by significant vegetation screening; there are no views out to the countryside side to protect. Furthermore, the Vision document shows how a break in the built development could still be retained through providing new landscaping and open space along the northern boundary. As set out in our comments to Draft Policy GP/LC, the Councils should remove the Important Countryside Frontage designation from this Site.

206698 (E W Pepper Ltd)

Response

The Protected Open Space Evidence Report 2025 assessed this site as follows:

Important Rural Break: • Green

Significant Connection (Street vs Rural): • Green

There has been no visible change, therefore the site continues to meet the policy criteria and should remain designated ICF.

Summary of issue raised in comments

The Station Road frontage of the Site, together with the Station Road frontage of Baggot Hall farm to the east, is proposed to continue to be an 'Important Countryside Frontage', under Policy GP/LC: Protection and enhancement of landscape character.

The Great Places Topic Paper (2025) states that a Protected Open Space Review (2025) was a desk-based review which demonstrated that open spaces identified for protection are reasoned and justified by meeting relevant policy criteria.

Jesus College question the robustness of the Review being only desk-based and considers a more detailed assessment is needed that includes a site visit to understand the site-specific context and landscape character.

Comments highlighting this issue

203436 (Jesus College)

Response

A proportionate approach has been taken to the Protected Open Space Review, as an evidence base to support a robust position on Policies BG/PO and GP/LC in the Local Plan. The Councils have a clear understanding of the role of each site based upon the approach taken to the assessment. Many sites, particularly the Important Countryside Frontages, have already been through an examination for the adopted South Cambridgeshire (and Cambridge City) Local Plans. Therefore, it was entirely appropriate for the 2025 Review to focus on whether there had been any change in circumstances to warrant a change of position for these sites using a desk-based approach.

The Protected Open Space Evidence Report 2025 assessed this site as follows:

Important Rural Break: • Red

Significant Connection (Street vs Rural): • Green

There has been no visible change, therefore the site continues to meet the policy criteria and should remain designated ICF.
